With age-appropriate, inquiry-centered curriculum materials and sound teaching practices, middle school science can capture the interest and energy of adolescent students and expand their understanding of the world around them.

Resources for Teaching Middle School Science, developed by the National Science Resources Center (NSRC), is a valuable tool for identifying and selecting effective science curriculum materials that will engage students in grades 6 through 8.

The volume describes more than 400 curriculum titles that are aligned with the National Science Education Standards. This completely new guide follows on the success of

Resources for Teaching Elementary School Science, the first in the NSRC series of annotated guides to hands-on, inquiry-centered curriculum materials and other resources for science teachers. The curriculum materials in the new guide are grouped in five chapters by scientific area: Physical Science, Life Science, Environmental Science, Earth and Space Science, and Multidisciplinary and Applied Science. They are also grouped by type: core materials, supplementary units, and science activity books. Each annotation of curriculum material includes a recommended grade level, a description of the activities involved and of what students can be expected to learn, a list of accompanying materials, a reading level, and ordering information. The curriculum materials included in this book were selected by panels of teachers and scientists using evaluation criteria developed for the guide. The criteria reflect and incorporate goals and principles of the National Science Education Standards. The annotations designate the specific content standards on which these curriculum pieces focus. In addition to the curriculum chapters, the guide contains six chapters of diverse resources that are directly relevant to middle school science. Among these is a chapter on educational software and multimedia programs, chapters on books about science and teaching, directories and guides to science trade books, and periodicals for teachers and students. Another section features institutional resources. One chapter lists about 600 science centers, museums, and zoos where teachers can take middle school students for interactive science experiences. Another chapter describes nearly 140 professional associations and U.S. government agencies that offer resources and assistance. Authoritative, extensive, and thoroughly indexed, this is the only guide of its kind. **Resources for Teaching Middle School Science** will be the most used book on the shelf for science teachers, school administrators, teacher trainers, science curriculum

specialists, advocates of hands-on science teaching, and concerned parents.

This guide is intended to assist elementary and secondary schools as they plan compliance with the Americans with Disabilities Act (ADA), conduct required self-evaluation and transition plans, and make appropriate modifications. The eight chapters correspond with the regulations and include many worksheets and examples. Chapter 1 briefly discusses each of the ADA's titles, especially Title II which assures access to all programs and services provided by state and local government agencies. In Chapter 2 the emphasis is on the law's definition of a "qualified individual with a disability." Chapter 3 identifies action steps toward compliance and offers a three-phase process for completing self-evaluation planning. Chapter 4 reviews the general prohibitions against discrimination contained in Title II regulations, especially schools' obligation to provide a "free and appropriate public education." Chapter 5 explains ADA provisions concerning recruitment, hiring, and other employment-related issues. Program accessibility is the focus of Chapter 6. Chapter 7 explains Title II requirements for ensuring effective communication for persons with visual, hearing, and speech disabilities. Chapter 8 reviews the enforcement procedures for Title II and the remedies available if an institution is determined not to be in compliance. The last section identifies relevant sources of information. (DB)
