This title examines the structure of approximate solutions of optimal control problems considered on subintervals of a real line. Specifically at the properties of approximate solutions which are independent of the length of the interval. The results illustrated in this book look into the so-called turnpike property of optimal control problems. The author generalizes the results of the turnpike

property by considering a class of optimal control problems which is identified with the corresponding complete metric space of objective functions. This establishes the turnpike property for any element in a set that is in a countable intersection which is open everywhere dense sets in the space of integrands; meaning that the turnpike property holds for most optimal control problems. Mathematicians working in optimal control and the calculus of variations and graduate students will find this book useful and valuable due to its presentation of solutions to a number of difficult problems in optimal control and presentation of new approaches, techniques and methods.

While many materials undergo phase change at a fixed temperature, soil systems exhibit a definite zone of phase change. The variation of unfrozen water with temperature causes a soil system to freeze or thaw over a finite temperature range. Exact and approximate solutions are given for conduction phase change of plane layers of soil with unfrozen water contents that vary linearly and quadratically with temperature. The temperature and phase change depths were found to vary significantly from those predicted for the constant-temperature or Neumann problem. The thermal conductivity and specific heat of the soil within the mushy zone varied as a function of unfrozen water content. It was found that the effect of specific heat is negligible, while the effect of variable thermal conductivity can be accounted for by a proper choice of thermal properties used in the constant-thermal-property solution.

The salient features of the present edition are: All the Problems and Solutions have been thoroughly revised in the light of up-to-date amendments in Income tax Law and Rules for Assessment Year 2020-21. Almost all numerical questions given at the end of the chapters of the authors' other publications on Income-tax (viz., Income-tax Law and Accounts, Aaykar Vidhan evam Lekhe, Law and Practice of Income-tax) have been solved in this book and the number printed within brackets at the end of the questions in other publications is the problem number of this book. The selection and sequence of the questions are well planned and systematic so as to cover all ticklish points within a reasonable number of questions. Wherever needed, detailed explanatory notes have been given at the end of solutions. Candidates preparing for C.A., Company Secretaries, Cost and Works Accountants, and Income-tax Departmental Examinations, will, particularly, find the book very useful. It will also be useful for candidates preparing for B.Com. and M.Com. Examinations of various Indian Universities.

Practical Finance for Property Investment provides readers with an introduction to the most fundamental concepts, principles, analytical methods, and tools useful for making investing and financing decisions regarding income-producing property. The book begins by considering how to value income-producing property by forecasting a property's cash flows and estimating appropriate

discount rates. It then discusses how both debt and private equity are used as methods to finance a property's acquisition. The book provides a thorough discussion of the taxation of property income as well as how investors can quantify the risks to investing in property. The book concludes with important considerations for investors when their investment thesis does not come to fruition. Practical Finance for Property Investment offers a unique and novel pedagogy by pairing each book chapter with an in-depth real-world case study, which forces readers to confront the occasional tensions between finance theory and property investment practice. The book is designed for investors and students interested in learning what finance theory implies about property investment. Readers and Instructors can access electronic resources, including the spreadsheets used in the textbook, at the book's website: www.routledge.com/9780367333041.

The expert contributors from around the globe provide unique case studies to guide indigenous communities and their partners in protecting their intellectual property. Addressing the poor fit between western regimes of intellectual property rights and the requirements for safeguarding indigenous cultural resources, the authors describe positive efforts at protecting indigenous knowledge. It is an important resource for advocates for indigenous and human rights and

legal scholars.

The Art of Wholesaling Properties: How to Buy and Sell Real Estate without Cash or Credit distills the experiences of two of the nation's largest real estate wholesalers who, all told, have flipped over one thousand homes. Aram Shah and Alex Virelles present a step-by-step guide that explains how others may replicate their proven methods in their own wholesaling ventures. Reading this book will give investors the A-to-Z insights they need for cashing in on the fastest and most profitable ways to flip paper in the real estate market. Moving along a strategic step at a time, The Art of Wholesaling Properties explains how to • make offers that actually get accepted; • find hidden, motivated sellers; • use a real estate agent to find gold mines through the MLS; • build a strong list of cash buyers; • negotiate with sellers using proven and tested scripts; • assign or double close on properties; • master the A-B, B-C transaction; • deploy a team and put the business on autopilot; and • achieve financial freedom without using cash or credit! If you find the prospects of making money exciting, if you get the feeling there is wealth hidden in the real estate market in your

community, and if you desire to learn demonstrably successful techniques to apply in your own ventures, then The Art of Wholesaling Properties: How to Buy and Sell Real Estate without Cash or Credit will give you the guidance and education you need to begin wholesaling homes and generating profits without using your own cash or credit.

Intellectual property rights and their overlaps are considered in light of rights purposes, relying on the concept of a balance of rights as the measuring rod for assessment of the consequences resulting from the exercise of overlapping rights. Identifying the complex interface between different types of intellectual property rights, this book discusses the use of these rights and their effect on a diverse group of stakeholders, from individual users of e-books to large corporations operating search engines on the internet. The book suggests solutions to potentially objectionable uses of overlapping rights in an attempt to provide judiciary and law practitioners with an analytical framework for resolving disputes of overlaps in the intellectual property system. In doing so, the author investigates how use of intellectual property rights associated with one segment of the system can affect the carefully crafted balance of rights held by various stakeholders in an overlapping segment. In particular, the book suggests that a properly construed doctrine of misuse of intellectual property rights would provide an adequate response to the challenge posed by improper use of overlapping intellectual property rights. This book is of particular interest to law

practitioners, managers in advanced technology and media industries, academics, and university students who work with or analyze intellectual property and new technologies.

I qualified as an Accountant in 1992. I recall lining up for my degree thinking to myself why did I study Accounting I would have preferred to do Psychology. I wanted to be in a professional that involved helping people and didnt see how crunching numbers fit in with that desire. However, I continued with study in financial areas including a Masters Degree in Taxation, a Diploma of Financial Planning, a Diploma of Finance, a Diploma of Real Estate

and a Diploma of Property Advice. During this time I worked for the Australian Taxation Office as an Auditor and Fraud Investigator for 11 years before opening my own practice in 2002. Despite my skills and qualifications in the financial arenas my interest in Psychology continued and I completed extensive personal development courses including Crossroads I & II, Being Empowered through Service Training (BEST) and Beyond the Edge (BTE). I then went onto complete the Christopher Howard Academy of Wealth & Achievement which was focussed on qualifying to be a Results Coach, NLP practitioner and Presenter. I have now commenced undertaking Beyond Success courses. Combining all of the above financial and personal development courses together I guess I can be best described as a Wholistic Financial Coach. My passion is assisting clients create wealth and protect wealth for their future and future generations. This passion is displayed through my Wholistic approach to financial advising. My advice is Wholistic because it covers the whole of a clients financial needs and the whole of a clients lifecycle. I find my clients often need financial advice but they also really need someone to hold their hand and support them as they take the steps they need to take to achieve their financial goals. Working in the financial

professional for over 20 years I realised that one of the biggest challenges facing clients when they seek financial advice who to turn to? Advice given by Accountants, Financial Planners, Mortgage Brokers and Real Estate agents all differs dramatically and is heavily dependent on where the advisors commission or payments came from. There are no advisors that cover all aspects of advice and are therefore independent of commissions. So I qualified, and now advise, in all of the professions. My firm is called Wholistic Financial Solutions (WFS) and the clients describe WFS as dynamic, diverse, personalised, knowledgeable and client focused. The firm prides itself in being accessible and responsive. Catherine prefers her clients to get ongoing, accurate and timely advice during the year, whenever it is needed. In addition to all of the above, my proudest achievement is my four young children, Jese, Harley, Khiana and Luann and I always ensure that I balance my professional life with time out to spend quality time with them.
