A Guide for Students of the Social and Behavioral Sciences Taylor & Francis When a dissertation crosses my desk, I usually want to grab it by its metaphorical lapels and give it a good shake. " You know something! " I would say if it could hear me. " Now tell it to us in language we can understand! " Since its publication in 2005, From Dissertation to Book has helped thousands of young academic authors get their books beyond the thesis committee and into the hands of interested publishers and general readers. Now revised and updated to reflect the evolution of scholarly publishing, this edition includes a new chapter arguing that the future of academic writing is in the hands of young scholars who must create work that

meets the broader expectations of readers rather than the narrow requirements of academic committees. At the heart of *From Dissertation to Book* is the idea that revising the dissertation is fundamentally a process of shifting its focus from the concerns of a narrow audience—a committee or advisors—to those of a broader scholarly audience that wants writing to be both informative and engaging. William Germano offers clear guidance on how to do this, with advice on such topics as rethinking the table of contents, taming runaway footnotes, shaping chapter length, and confronting the limitations of jargon, alongside helpful timetables for light or heavy revision. Germano draws on his years of experience in both academia and publishing to show writers how to turn a dissertation into a book that an audience will actually enjoy, whether reading on a page or a screen. Germano also acknowledges that not all dissertations can or even should become books and explores other, often overlooked, options, such as turning them into journal articles or chapters in an edited work. With clear directions, engaging examples, and an eye for the idiosyncrasies of academic writing, *From Dissertation to Book* reveals to recent PhDs the secrets of careful and thoughtful revision—a skill that will be truly invaluable as they add “author” to their curriculum vitae.

Americans have always put the past to political ends. The Union laid claim to the Revolution--so did the Confederacy. Civil rights leaders said they were the true sons of liberty--so did Southern segregationists. This book tells the story of the centuries-long struggle over the meaning of the nation's founding, including the battle waged by the Tea Party, Glenn Beck, Sarah Palin, and

evangelical Christians to "take back America." Jill Lepore, Harvard historian and New Yorker staff writer, offers a careful and concerned look at American history according to the far right, from the "rant heard round the world," which launched the Tea Party, to the Texas School Board's adoption of a social-studies curriculum that teaches that the United States was established as a Christian nation. Along the way, she provides rare insight into the eighteenth-century struggle for independence--a history of the Revolution, from the archives. Lepore traces the roots of the far right's reactionary history to the bicentennial in the 1970s, when no one could agree on what story a divided nation should tell about its unruly beginnings. Behind the Tea Party's Revolution, she argues, lies a nostalgic and even heartbreaking yearning for an imagined past--a time less troubled by ambiguity, strife, and uncertainty--a yearning for an America that never was. *The Whites of Their Eyes* reveals that the far right has embraced a narrative about America's founding that is not only a fable but is also, finally, a variety of fundamentalism--anti-intellectual, antihistorical, and dangerously antipluralist. In a new afterword, Lepore addresses both the recent shift in Tea Party rhetoric from the Revolution to the Constitution and the diminished role of scholars as political commentators over the last half century of public debate.

The Professor Is In University of Michigan Press

The Indigenous Paleolithic of the Western Hemisphere is a reclaimed history of the deep past of Indigenous people in North and South America during the Paleolithic. Paulette F. C. Steeves mines evidence

from archaeology sites and Paleolithic environments, landscapes, and mammalian and human migrations to make the case that people have been in the Western Hemisphere not only just prior to Clovis sites (10,200 years ago) but for more than 60,000 years, and likely more than 100,000 years. Steeves discusses the political history of American anthropology to focus on why pre-Clovis sites have been dismissed by the field for nearly a century. She explores supporting evidence from genetics and linguistic anthropology regarding First Peoples and time frames of early migrations. Additionally, she highlights the work and struggles faced by a small yet vibrant group of American and European archaeologists who have excavated and reported on numerous pre-Clovis archaeology sites. In this first book on Paleolithic archaeology of the Americas written from an Indigenous perspective, *The Indigenous Paleolithic of the Western Hemisphere* includes Indigenous oral traditions, archaeological evidence, and a critical and decolonizing discussion of the development of archaeology in the Americas.

This book can be described as a development of my Masters thesis, 'The Economics of A. R. J. Turgot' written at the University of Sydney in 1961-62. It has therefore been a long time in the making and, needless to say, I incurred many an intellectual debt during this period which I would like to acknowledge here. My thanks go first to Professor J. R. Wilson, who supervised my Masters thesis and who read part of this manuscript in draft, to the late Professor Jacob Viner whose tremendous knowledge of the history of economics was put at my disposal on several occasions, and to Professor R. L. Meek with whom I discussed this work in conversation and correspondence and who has given assistance in several other ways. I also owe a great debt of gratitude to a large number of librarians for their assistance in unearthing infrequently used material housed in the collections over which they preside. In particular, I wish to acknowledge thanks to the librarians of the Fisher Library at the University of Sydney, the Public Library of New South Wales, the Australian National Library, the

British Library of Economics and Political Science, the British Museum, the Goldsmiths' Library at the University of London, the Kress Collection at the Baker Library at Harvard, the Seligman Collection at the Butler Library at Columbia University, and the Bibliotheque nationale.

The death of the book has been duly announced, and with it the end of brick-and-mortar libraries, traditional publishers, linear narrative, authorship, and disciplinarity, along with the emergence of a more equitable discursive order. These essays suggest that it won't be that simple. While the contributors to this volume are enthusiastic about the possibilities created by digital technologies, they also see the new media raising serious critical issues that force us to reexamine basic notions about rhetoric, reading, and the nature of discourse itself.
