This book can be described as a development of my Masters thesis, 'The Economics of A. R. J. Turgot' written at the University of Sydney in 1961-62. It has therefore been a long time in the making and, needless to say, I incurred many an intellectual debt during this period which I would like to acknowledge here. My thanks go first to Professor J. R. Wilson, who supervised my Masters thesis and who read part of this manuscript in draft, to the late Professor Jacob Viner whose tremendous knowledge of the history of economics was put at my disposal on several occasions, and to Professor R. L. Meek with whom I discussed this work in conversation and correspondence and who has given assistance in several other ways. I also owe a great debt of gratitude to a large number of librarians for their assistance in unearthing infrequently used material housed in the collections over which they preside. In particular, I wish to acknowledge thanks to the librarians of the Fisher Library at the University of Sydney, the Public Library of New South Wales, the Australian National Library, the British Library of Economics and Political Science, the British Museum, the Goldsmiths'

Library at the University of London, the Kress Collection at the Baker Library at Harvard, the Seligman Collection at the Butler Library at Columbia University, and the Bibliotheque nationale.

In the past stars have been studied as cogs in a mass entertainment industry selling desires and ideologies. But since the 1970s, new approaches have reopened debate, as film and cultural studies try to account for the active role of the star in producing meanings, pleasures, and identities for a diversity of audiences. Stardom brings together for the first time some of the

major writing of the last decade which seeks to understand the phenomenon of stars and stardom. Gathered under four headings - The System, Stars and Society, Performers and Signs, Desire and Politics - these essays represent a range of approaches drawn from film history, sociology, textual analysis, audience research, psychoanalysis, and cultural politics. They raise important issues about the politics of representation and the cultural limitations and possibilities of stars.

A step-by-step guide to crafting a compelling scholarly book proposal—and seeing your book through to successful publication The scholarly book proposal may be academia's most mysterious genre. You have to write one to get published, but most scholars receive no training on how to do so—and you may have never even seen a proposal before you're expected to produce your own. The Book Proposal Book cuts through the mystery and guides prospective authors step by step through the process of crafting a compelling proposal and pitching it to university presses and other academic publishers. Laura Portwood-Stacer, an experienced developmental editor and publishing consultant for academic authors, shows how to select the right presses to target, identify audiences and competing titles, and write a project description that will grab the attention of

editors—breaking the entire process into discrete, manageable tasks. The book features over fifty time-tested tips to make your proposal stand out; sample prospectuses, a letter of inquiry, and a response to reader reports from real authors; optional worksheets and checklists; answers to dozens of the most common questions about the scholarly publishing process; and much, much more. Whether you're hoping to publish your first book or you're a seasoned author with an unfinished proposal languishing on your hard drive, *The Book Proposal Book* provides honest, empathetic, and invaluable advice on how to overcome common sticking points and get your book published. In the United States, preschool education is characterized by the dominance of a variegated private sector and patchy, uncoordinated oversight of the public sector.

Tracing the history of the American debate over preschool education, Andrew Karch argues that the current state of decentralization and

fragmentation is the consequence of a chain of reactions and counterreactions to policy decisions dating from the late 1960s and early 1970s, when preschool advocates did not achieve their vision for a comprehensive national program but did manage to foster initiatives at both the state and national levels. Over time, beneficiaries of these initiatives and officials with jurisdiction over preschool education have become ardent defenders of the status quo. Today, advocates of greater government involvement must take on a diverse and entrenched set of constituencies resistant to policy change. In his close analysis of the politics of preschool education, Karch demonstrates how to apply the concepts of policy feedback, critical junctures, and venue shopping to the study of social policy.

When a dissertation crosses my desk, I usually want to grab it by its metaphorical lapels and give it a good shake. “ You know something! ” I would say if it could hear me. “ Now tell it to us in language we can understand! ” Since its publication in 2005, *From Dissertation to Book* has helped thousands of young academic authors get their books beyond the thesis committee and into the hands of interested publishers and general readers. Now revised and updated to reflect the evolution of scholarly publishing, this edition includes

a new chapter arguing that the future of academic writing is in the hands of young scholars who must create work that meets the broader expectations of readers rather than the narrow requirements of academic committees. At the heart of *From Dissertation to Book* is the idea that revising the dissertation is fundamentally a process of shifting its focus from the concerns of a narrow audience—a committee or advisors—to those of a broader scholarly audience that wants writing to be both informative and engaging. William Germano offers clear guidance on how to do this, with advice on such topics as rethinking the table of contents, taming runaway footnotes, shaping chapter length, and confronting the limitations of jargon, alongside helpful timetables for light or heavy revision. Germano draws on his years of experience in both academia and publishing to show writers how to turn a dissertation into a book that an audience will actually enjoy, whether reading on a page or a screen. Germano also acknowledges that not all dissertations can or even should become books and explores other, often overlooked, options, such as turning them into journal articles or chapters in an edited work. With clear directions, engaging examples, and an eye for the idiosyncrasies of

academic writing, *From Dissertation to Book* reveals to recent PhDs the secrets of careful and thoughtful revision—a skill that will be truly invaluable as they add “ author ” to their curriculum vitae.

A little more than seventy-five years ago, Kate L. Turabian drafted a set of guidelines to help students understand how to write, cite, and formally submit research writing. Seven editions and more than nine million copies later, the name Turabian has become synonymous with best practices in research writing and style. Her *Manual for Writers* continues to be the gold standard for generations of college and graduate students in virtually all academic disciplines. Now in its eighth edition, *A Manual for Writers of Research Papers, Theses, and Dissertations* has been fully revised to meet the needs of today ’ s writers and researchers. The Manual retains its familiar three-part structure, beginning with an overview of the steps in the research and writing process, including formulating questions, reading critically, building arguments, and revising drafts. Part II provides an overview of citation practices with detailed information on the two main scholarly citation styles (notes-bibliography and author-date), an array of source types with contemporary examples, and detailed guidance on citing online resources. The final section treats all matters of editorial style, with

advice on punctuation, capitalization, spelling, abbreviations, table formatting, and the use of quotations. Style and citation recommendations have been revised throughout to reflect the sixteenth edition of *The Chicago Manual of Style*. With an appendix on paper format and submission that has been vetted by dissertation officials from across the country and a bibliography with the most up-to-date listing of critical resources available, *A Manual for Writers* remains the essential resource for students and their teachers.
