Concepts of Biology is designed for the single-semester introduction to biology course for non-science majors, which for many students is their only college-level science course. As such, this course represents an important opportunity for students to develop the necessary knowledge, tools, and skills to make informed decisions as they continue with their lives. Rather than being mired down with facts and vocabulary, the typical non-science major student needs information presented in a way that is easy to read and understand. Even more importantly, the content should be meaningful. Students do much better when they understand why biology is relevant to their everyday lives. For these reasons, Concepts of Biology is grounded on an evolutionary basis and includes exciting features that highlight careers in the biological sciences and everyday applications of the concepts at hand. We also strive to show the interconnectedness of topics within this extremely broad discipline. In order to meet the needs of today's instructors and students, we maintain the overall organization and coverage found in most syllabi for this course. A strength of Concepts of Biology is that instructors can customize the book, adapting it to the approach that works best in their classroom. Concepts of Biology also includes an innovative art program that incorporates critical thinking and clicker questions to help students understand--and apply--key concepts.

Discover the incredible true story of how one of history's most successful potato farmers began life as a slave and worked until he was named the "Potato King of the World"! Junius G. Groves came from humble beginnings in the Bluegrass State. Born in Kentucky into slavery, freedom came when he was still a young man and he intended to make a name for himself. Along with thousands of other African Americans who migrated from the South, Junius walked west and stopped in Kansas. Working for a pittance on a small potato farm was no reason to feel sorry for himself, especially when he's made foreman. But Junius did dream of owning his own farm, so he did the next best thing. He rented the land and worked hard! As he built his empire, he also built a family, and he built them both on tons and tons and tons of potatoes. He never quit working hard, even as the naysayers doubted him, and soon he was declared Potato King of the World and had five hundred acres and a castle to call his own. From award winning author Tonya Bolden and talented illustrator Don Tate comes a tale of perseverance that reminds us no matter where you begin, as long as you work hard, your creation can never be called small potatoes.
