St Swithun was an obscure ninth-century bishop of Winchester about whom little was, and is, known. But following the translation of his relics from a conspicuous tomb into the Old Minster, Winchester, on 15 July 971, the massive rebuilding of the cathedral, and a vigorous publicity campaign by Bishop Aethelwold (963-84), St Swithun became one of the most popular and important English saints, whose cult was widespread not only in England but also in Ireland, Scandinavia, and France. The present volume includes new and full editions of all the relevant texts - hagiographical, liturgical, and historical - in Latin, Old English, and Middle English, many of which have never been published before: these illuminate the origins and development of St Swithun's cult. No dossier of an important English saint has been published on this scale until now: the wealth of this volume sheds new light not

only on St Swithun himself, but also on the times during which his cult was at the peak of its popularity.

'In liturgical study, and especially in

English liturgical study, the subject of the daily office has always been something of the poor relation', writes the author in his preface. This volume aims to do something to fill that gap. It begins with a detailed examination of the Jewish background and of the practice of daily prayer in the first three centuries of the Church, and goes on to trace the evolution of the divine office in both its monastic and secular forms in East and West down to the time of St. Benedict. Intended as a replacement for *The Influence of the Synagogue upon the Divine Office* by C. W. Dugmore (Alcuin Club Collection No. 45), it not only incorporates the results of recent research by continental scholars and others but also challenges traditional assumptions at a number of important points, offering a fresh interpretation of the evidence.

In this collection of essays, Antonia Gransden brings out the virtues of medieval writers and highlights their attitudes and habits of thought. She traces the continuing influence of Bede, the greatest of early medieval English historians, from his death to the 16th century. Bede's clarity and authority were welcomed by generations of monastic historians. At the other end is a humble 14th-century chronicle produced at Lynn with little to add other than a few local references.

This new title in the What Works in Offender Rehabilitation series of handbooks reviews and brings up to date the 'What Works' literature in sexual offender theory, assessment, rehabilitation, risk management, prevention and policy. By evaluating current assessment frameworks and intervention programmes, it not only discusses theory and treatment efficacy but provides professionals with an evidence-based approach to the management and rehabilitation of individuals who have sexually offended, and the prevention of sexual abuse perpetration. Empirical findings of treatment effectiveness are presented and discussed by renowned international researchers and clinicians from around the world. The conceptual and theoretical material is presented with a strong emphasis on how it should be translated into real-world policy and practice in order to reduce re-offending effectively.

An apostolic lifestyle characterized by total material renunciation, homelessness, and begging was practiced by monks throughout the Roman Empire in the fourth and fifth centuries. Such monks often served as spiritual advisors to urban aristocrats whose patronage gave them considerable authority and independence from episcopal control. This book is the first comprehensive study of this type of Christian poverty and the challenge it posed for episcopal authority and the promotion of monasticism in late antiquity. Focusing on devotional practices, Daniel Caner draws together diverse testimony from Egypt, Syria, Asia Minor, and elsewhere—including the Pseudo-Clementine Letters to Virgins, Augustine's On the Work of Monks, John Chrysostom's homilies, legal codes—to reveal gospel-inspired patterns of ascetic dependency and teaching from the third to the fifth centuries. Throughout, his point of departure is social and cultural history, especially the urban social history of the

late Roman empire. He also introduces many charismatic individuals whose struggle to persist against church suppression of their chosen way of imitating Christ was fought with defiant conviction, and the book includes the first annotated English translation of the biography of Alexander Akoimetos (Alexander the Sleepless). *Wandering, Begging Monks* allows us to understand these fascinating figures of early Christianity in the full context of late Roman society.

In this new commentary Muddiman questions the assumption that if Ephesians is not by Paul it must be wholly accounted for as an example of post-Pauline pseudepigraphy. He explores an alternative: that it is an authentic letter subsequently edited and expanded with the aim of adjusting the Pauline tradition to meet a new situation. All the perspectives of major modern scholars are discussed and assessed particularly on the question of Ephesians' relationship to Colossians. The implications for the question of the authorship on Paul's theology are extensively explored.

Seventeen respected colleagues and former students of David C.

Steinmetz have contributed to this important collection of essays produced in honor of Steinmetz's sixtieth birthday. The burden of the present volume is to examine the sources and resources and to illustrate the continuities and discontinuities in the exegetical tradition leading into and through the Reformation. Specifically, this collection of essays proposes to highlight the historical context of Reformation exegesis and to describe how a truly contextual understanding signals a highly illuminating turn in Reformation studies. The three essays included in Part 1 offer background perspectives on Reformation-era exegesis. Richard A. Muller provides background on biblical interpretation in the Reformation

from the perspective of the Middle Ages. Karlfried Froelich examines the fourfold exegetical method presented on the eve of the Reformation by Johannes Trithemius. John B. Payne offers a view of Erasmus's exegetical method in its relation to the approaches of Zwingli and Bullinger. The five essays included in Part 2 explore exegesis and interpretation in the early Reformation. Kenneth Hagen examines Luther's many approaches to the text of Psalm 116. Carl M. Leth discusses Balthasar Hubmaier's "Catholic" exegesis of the power of the keys in Matthew 16:18-19. Timothy J. Wengert takes on the issue of method, specifically the impact of humanist rhetoric on the exegetical method of Philip Melanchthon. Irena Backus examines Martin Bucer's efforts to make sense of the difficult chronology of John 5-7 in the light of his dialogue with the exegetical tradition. W.P. Stephens addresses Zwingli's understanding of John 6:63, a text crucial to Zwingli's eucharistic debate with Luther. The seven essays included in Part 3 examine continuity and change in mid-sixteenth-century biblical interpretation. Susan E Schreiner probes Calvin's relation to the sixteenth-century debate regarding the grounds of certainty. Craig S. Farmer examines the exegesis of Bern theologian Wolfgang Musculus against the background of a catena of medieval readings of John 8. Joel E. Kok discusses the question of

Bullinger ' s status as an exegete in relation to Calvin, with a special focus on the exegesis of Romans. John L. Thompson considers the survival of allegorical argumentation in Peter Martyr Vermigli ' s Old Testament exegesis. Lyle D. Bierma shows a clear relationship between Zacharias Ursinus ' s exposition of Exodus 20:8-11 and aspects of interpretations offered by Calvin, Vermigli, Bullinger, and Melancthon. John L Farthing offers a fresh study of Girolamo Zanchi ' s interpretation of Gomer ' s harlotry in Hosea 1-3. Robert Kolb considers the doctrine of Christ in Nikolaus Selnecker ' s interpretation of Psalms 8, 22, and 110. Following a concluding essay by the editors on the significance of precritical exegesis, the final section of the volume, prepared by Micken L. Mattox, presents an up-to-date bibliography of the writings of David C. Steinmetz.

In the past two decades a number of studies have shown that abnormalities in the function and structure of coronary microcirculation can be detected in several cardiovascular diseases. On the basis of the clinical

setting in which it occurs, coronary microvascular dysfunction (CMD) can be classified into four types: CMD in the absence of any other cardiac disease; CMD in myocardial diseases; CMD in obstructive epicardial coronary artery disease; and iatrogenic CMD. In some instances CMD represents an epiphenomenon, whereas in others it represents an important marker of risk or may contribute to the pathogenesis of myocardial ischemia, thus becoming a possible therapeutic target. This book provides an update on coronary physiology and a systematic assessment of microvascular abnormalities in cardiovascular diseases, in the hope that it will assist clinicians in prevention, detection and management of CMD in their everyday activity.
