This book is devoted to schizotypal personality. It provides a comprehensive overview of our knowledge from some of the world's leading researchers in the field, and includes reviews of genetics, neurodevelopment, assessment, psychophysiology, neuropsychology and brain imaging. Central themes are the exploration of categorical and dimensional approaches to the understanding of schizotypal disorder and its relationship to schizophrenia. Valuable introductory and concluding chapters set in context the sometimes divergent opinions and findings presented by the book's contributors and there are reviews of methodological issues and assessment schedules for the benefit of researchers in the field. In setting out to answer, from

phenomenological, psychological and neurobiological perspectives, the fundamental question 'What is schizotypal disorder?' and to develop coherent etiological models, this book will serve as an authoritative resource for clinicians and researchers interested in this major personality disorder. This volume is concerned, above all, with the legal background and the juristic issues behind the ideology and practice of the medieval Crusades. This is an area that the author was the first to investigate systematically, and there are two particular reasons for his approach: one, the conviction that the historical phenomenon of the Crusades can only be adequately understood within the context of the legal systems that permeated the age; the other, that so much of the documentary evidence " be it charters, decrees even chronicles " was produced by people whose perceptions had been shaped by the law. A number of articles focus on the roles of individual crusaders, or address ideological questions, including the very concept of Holy War. Others deal with practical issues and the nature of the obligations incurred by a crusader, and examine the consequences these had, both for the institutions of medieval Europe and for the

crusader's own family relationships. Ce recueil s'attache avant tout au contexte l'égal et aux questions juridiques qui se trouvent à la base de l'idéologie et de la pratique des Croisades au Moyen Age. L'auteur a été le premier à entreprendre des recherches de façon systématique dans ce domaine; deux raisons précises sont à l'origine de cette démarche premièrement, la conviction que seule la connaissance du contexte des systèmes légaux dont l'époque était imprégnée, permet de bien comprendre le phénomène historique des Croisades; deuxièmement, le fait que quantité de documents "témoins" chartes, décrets, ou encore chroniques "sont l'œuvre de gens dont la perception était grandement influencée par la loi. Un nombre d'études se concentrent sur la rôle individuel de certains croisés, ou s'adressent à des questions d'idéologie, y compris le concept même de la Guerre Sainte. D'autres traitent de questions d'ordre pratique, ainsi que de la nature des engagements contractés par le croisé; ils en examinent le

'In liturgical study, and especially in English liturgical study, the subject of the daily office has always been something of the poor relation', writes the author in his preface. This volume aims to do something to fill that gap. It begins with a detailed examination of the Jewish background and of the practice of daily prayer in the first three centuries of the Church, and goes on to trace the evolution of the divine office in both its monastic and secular forms in East and West down to the time of St. Benedict. Intended as a replacement for *The Influence of the Synagogue upon the Divine Office* by C. W. Dugmore (Alcuin Club Collection No. 45), it not only incorporates the results of recent research by continental scholars and others but also challenges traditional assumptions at a number of important points, offering a fresh interpretation of the evidence.

In Renaissance Italy a good execution was both public

and peaceful—at least in the eyes of authorities. In a feature unique to Italy, the people who prepared a condemned man or woman spiritually and psychologically for execution were not priests or friars, but laymen. This volume includes some of the songs, stories, poems, and images that they used, together with first-person accounts and ballads describing particular executions. Leading scholars expand on these accounts explaining aspects of the theater, psychology, and politics of execution. The main text is a manual, translated in English for the first time, on how to comfort a man in his last hours before beheading or hanging. It became an influential text used across Renaissance Italy. A second lengthy piece gives an eyewitness account of the final hours of two patrician Florentines executed for conspiracy against the Medici in 1512. Shorter pieces include poems written by prisoners on the eve of their execution, songs sung by the condemned and their comforters, and popular broadsheets reporting on particular executions. It is richly illustrated with the small panel paintings that were thrust into prisoners' faces to distract them as they made the public journey to the gallows. Six interdisciplinary essays explain the contexts and meanings of these writings and of execution rituals generally. They explore the relation of execution rituals to late medieval street theater, the use of art to comfort the condemned, the literature

that issued from prisons by the hands of condemned prisoners, the theological issues around public executions in the Renaissance, the psychological dimensions of the comforting process, and some of the social, political, and historical dimensions of executions and comforting in Renaissance Italy.

An apostolic lifestyle characterized by total material renunciation, homelessness, and begging was practiced by monks throughout the Roman Empire in the fourth and fifth centuries. Such monks often served as spiritual advisors to urban aristocrats whose patronage gave them considerable authority and independence from episcopal control. This book is the first comprehensive study of this type of Christian poverty and the challenge it posed for episcopal authority and the promotion of monasticism in late antiquity. Focusing on devotional practices, Daniel Caner draws together diverse testimony from Egypt, Syria, Asia Minor, and elsewhere—including the Pseudo-Clementine Letters to Virgins, Augustine's On the Work of Monks, John Chrysostom's

homilies, legal codes—to reveal gospel-inspired patterns of ascetic dependency and teaching from the third to the fifth centuries. Throughout, his point of departure is social and cultural history, especially the urban social history of the late Roman empire. He also introduces many charismatic individuals whose struggle to persist against church suppression of their chosen way of imitating Christ was fought with defiant conviction, and the book includes the first annotated English translation of the biography of Alexander Akoimetos (Alexander the Sleepless). *Wandering, Begging Monks* allows us to understand these fascinating figures of early Christianity in the full context of late Roman society.

Language is crucial in child development. Therefore, general questions such as what are the possible challenges in language acquisition or such as how well the/my child is doing, are commonly present for researchers, clinicians, teachers, and parents. Parent-child interaction offers a privileged setting to observe children's behavior in multiple communicative situations, which often is only available to the parents/caregivers. For this reason, within the broad

range of methods used to assess children's development, parental questionnaires are widely used being a non-invasive and inexpensive instrument to obtain information which is otherwise difficult to obtain. Data obtained with the many questionnaires covering various aspects of child development and communicative competence are equally relevant for basic research and everyday clinical practice. Development and use of parental questionnaires as well as data interpretation frequently require an interdisciplinary and cross-sector approach, bringing together developmental psychologists and practitioners. This interdisciplinarity is assumed but rarely addressed directly.

The essays collected in the second volume are concerned principally with the tenth-century renaissance of English learning, largely in response to the initiatives of a small number of energetic scholars and teachers, such as Dunstan and Ethelwold. In combination these studies

illustrate the idiosyncratic, but advanced, state of Anglo-Saxon learning.
