Operator, Organizational, and Direct Support Maintenance Manual for Test Set, Electronics System, AN/TSM-100A (NSN 4933-01-047-3389). Routledge

Despite record sales and an ever-growing global industry, the simple fact is that videogames are disappearing. Most obviously, the physical deterioration of discs, cartridges, consoles and controllers means that the data and devices will crumble to dust and eventually will be lost forever. However, there is more to the disappearance of videogames than plastic corrosion and bit rot. Best Before examines how the videogames industry's retail, publishing, technology design, advertising and

marketing practices actively produce obsolescence, wearing out and retiring old games to make way for the always new, just out of reach, 'coming soon' title and 'next generation' platform. Set against the context of material deterioration and the discursive production of obsolescence, Best Before examines the conceptual and practical challenges faced within the nascent field of game preservation. Understanding videogames as rich, complex and mutable texts and experiences that are supported and sustained by cultures of gameplay and fandom, Best Before considers how - and even whether - we might preserve and present games for future generations.

Management Accounting Case Book PediaPress  
Advances in Digital Forensics VI describes original  
research results and innovative applications in the  
discipline of digital forensics. In addition, it highlights  
some of the major technical and legal issues related to  
digital evidence and electronic crime investigations. The  
areas of coverage include: Themes and Issues, Forensic  
Techniques, Internet Crime Investigations, Live  
Forensics, Advanced Forensic Techniques, and Forensic  
Tools. This book is the sixth volume in the annual series  
produced by the International Federation for Information  
Processing (IFIP) Working Group 11.9 on Digital  
Forensics, an international community of scientists,  
engineers and practitioners dedicated to advancing the  
state of the art of research and practice in digital  
forensics. The book contains a selection of twenty-one  
edited papers from the Sixth Annual IFIP WG 11.9  
International Conference on Digital Forensics, held at the  
University of Hong Kong, Hong Kong, China, in January  
2010.

A Manual for Design of Hot Mix Asphalt with  
Commentary Routledge  
Generational Use of New Media examines and  
contrasts how younger and older people, representing  
different generations, engage with the new media that  
they increasingly encounter in everyday life.  
Exploring the various assumptions about the degrees  
to which younger and older people are more or less  
willing to use, or are capable of using, new media, the  
social circumstances under which they do so and the  
very design of those media, this book critically  
examines the gap that is assumed to exist between  
younger users of new media and older non-users.  
Thematically organised and offering comparative  
analyses of the generational use of new media and  
technology, this timely volume presents the latest  
research and rich new empirical material gathered in  
the EU, USA and Hong Kong, to reflect on societal  
practices and the practical implications of building a  
more inclusive information society.

Transportation Research Board  
This book contains a collection of quantitative procedures in  
common use in pharmacology and related disciplines. It is  
intended for students and researchers in all fields who work  
with drugs. Many physicians, especially those concerned with  
clinical pharmacology, will also find much that is useful. The  
procedures included may be considered "core" since they are  
generally applicable to all classes of drugs. Some of the  
procedures deal with statistics and, hence, have even wider  
application. In this new edition we have increased the number

of procedures from 33 (in the first edition) to 48. Other  
procedures have been revised and expanded. Yet the basic  
philosophy of this new edition remains unchanged from the  
first. That is, the pharmacologic basis of each procedure is  
presented, along with the necessary formulas and one or more  
worked examples. An associated computer program is included  
for each procedure and its use is illustrated with the same  
worked example used in the text. The discussions of theory  
and the sample computations are brief and self-contained, so  
that all computations can be made with the aid of a pocket  
calculator and the statistical tables contained in Appendix A.  
Yet it is realized that the proliferation of lower-priced  
microcom puters is likely to mean that more and more readers  
will utilize a computer for most calculations. Accordingly, we  
have modified the format of the book to facilitate computer  
usage.
