Since the Chinese Communist Party (CCP) embarked on a programme of 'reform and openness' in the late 1970s, Chinese society has undergone a series of dramatic transformations in almost all

realms of social, cultural, economic and political life and the People's Republic of China (PRC) has emerged as a global power. China's post-1978 transition from 'socialist plan' to 'market socialism' has also been accompanied by significant shifts in how the practice and objects of government are understood and acted upon. China's Governmentalities outlines the nature of these shifts, and contributes to emerging studies of governmentality in non-western and non-liberal settings, by

showing how neoliberal discourses on governance, development, education, the environment, community, religion, and sexual health, have been raised in other contexts. In doing so, it opens discussions of governmentality to 'other worlds' and the glocal politics of the present. The book will appeal to scholars from a wide range of disciplines interested in the work of Michel Foucault, neo-liberal strategies of governance, and governmental rationalities in contemporary

China.

Communications have always been, and are still a vital part of the Army's fighting power. Only with clear and trusted communications can commanders support, control, and lead their units and soldiers. The evolution of electrical communications in the last 150 years has been one of the most important developments humanity has ever witnessed. As the advantages that from ever more complex equipment became apparent the need for a technical arm of the Army, who

specialised in communication systems, became apparent. The Royal Corps of Signals was founded in 1920 and since its founding the Corps has been leading the development of communications; delivering them in a variety of operational theatres.

Physical Security Reliability Standard (US Federal Energy Regulatory Commission Regulation) (FERC) (2018 Edition) The Law Library presents the complete text of the Physical Security Reliability Standard (US Federal Energy Regulatory Commission Regulation) (FERC) (2018 Edition). Updated as of May 29, 2018 The Federal Energy Regulatory Commission (Commission) approves Reliability Standard CIP-014-1 (Physical Security). The North American Electric Reliability Corporation, the Commission-certified Electric Reliability Organization, submitted Reliability Standard

CIP-014-1 for Commission approval in response to a Commission order issued on March 7, 2014. The purpose of Reliability Standard CIP-014-1 is to enhance physical security measures for the most critical Bulk-Power System facilities and thereby lessen the overall vulnerability of the Bulk-Power System against physical attacks. In addition, the Commission directs NERC to develop one modification to Reliability Standard CIP-014-1 and submit an informational filing. Chlorophyll a Fluorescence: A Signature of Photosynthesis highlights chlorophyll (Chl) a fluorescence as a convenient, non-invasive, highly sensitive, rapid and quantitative probe of oxygenic photosynthesis. Thirty-one chapters, authored by 58 international experts, provide a solid foundation of the basic theory, as well as of the application of the rich information contained in the Chl a fluorescence signal as it relates to photosynthesis and plant productivity. Although the primary photochemical reactions of photosynthesis are highly efficient, a small fraction of absorbed

photons escapes as Chl fluorescence, and this fraction varies with metabolic state, providing a basis for monitoring quantitatively various processes of photosynthesis. The book explains the mechanisms with which plants defend themselves against environmental stresses (excessive light, extreme temperatures, drought, hyper-osmolarity, heavy metals and UV). It also includes discussion on fluorescence imaging of leaves and cells and the remote sensing of Chl fluorescence from terrestrial, airborne, and satellite bases. The book is intended for use by graduate students, beginning researchers and advanced undergraduates in the areas of integrative plant biology, cellular and molecular biology, plant biology, biochemistry, biophysics, plant physiology,

global ecology and agriculture.

This book gives an inside look on what security work is really like. Written for new security guards who have a passion for keeping people safe and who want to be the best security professionals they can be. For people just starting out the book will answer questions like: Is security just for making quick money, or is it a worthwhile career? If it is an essential career, do I have what it takes to handle it? If I want to be a security professional, does that mean becoming a police officer? And many more It includes advise and wisdom from an industry expert and thought-provoking questions that will inform, inspire, and motivate readers, at the start of what we hope is a promising career.

This book was written in response to

significant recent advances in understanding the mechanisms of parasitism in the Orobanchaceae, and breakthroughs in the control of the parasitic weeds *Striga* and *Orobanche*. It consists of 26 contributions by internationally recognized leading scientists. The main book chapters are grouped into two parts: · Part I – The Orobanchaceae and Their Parasitic Mechanisms · Part II – The Weedy Orobanchaceae and Their Control

The first part provides cutting-edge information on all key aspects of plant parasitism, such as the structure, development and function of the haustorium; nutrient transfer and the physiology of the parasite-host association; host reaction to parasitic plants; seed production and germination; the

strigolactones and host-parasite signaling mechanisms; the parasite genome, phylogenetics, evolution and epigenetics; and ecology. Topics of the second part include: the problem posed by the weedy parasites; population diversity and dynamics; molecular diagnosis of seed banks; and detailed discussion of the various management strategies, including agronomic, chemical and biotechnological approaches, as well as host breeding for resistance, allelopathy and biological control. This book is intended for plant scientists, university lecturers and students, agronomists and weed specialists, breeders and farmers, extension personnel and experts in tropical and subtropical agriculture.

Practical Security Training is designed to help security departments develop effective security forces from the personnel screening and selection process to ensuring that proper, cost-efficient training is conducted. Using the building block and progressive method approach allows security staff to become increasingly more effective and more confident. Flexible and practical, these tools allow security practitioners to adapt them as needed in different environments. Considering hypothetical situations and case studies, performing drills and continually evaluating performance, the security staff can be better prepared to deal with both routine and emergency situations. Advocates performance related training similar to that in a military environment Describes performance-oriented drills Considers and analyzes hypothetical situations

This book focuses on privacy and security concerns in big data and differentiates between privacy and security and privacy requirements in big data. It focuses on the results obtained after applying a systematic mapping study and implementation of security in the big data for utilizing in business under the establishment of “Business Intelligence”. The chapters start with the definition of big data, discussions why security is used in business infrastructure and how the security can be improved. In this book, some of the data security and data protection techniques are focused and it presents the challenges and suggestions to meet the requirements of computing, communication and storage capabilities for data mining and analytics

applications with large aggregate data in business.

This book is a critical feminist analysis of sex trafficking. Arguing that trafficking in girls and women is a product of the social construction of gender and other dimensions of power and status within a particular culture and at a particular

historical moment, this book offers the necessary locally grounded analysis. Focusing on the case of Nepal, from where 5,000 to 7,000 thousands of Nepali girls and women are trafficked each year primarily to India, Mary Crawford assesses how the social construction of trafficking - the concept and its representation in discourse - are influenced by the dynamics of gender, caste, and the development establishment. The defining figure is an innocent, naïve young girl being lured or duped into leaving the safety of her village. The trafficking victim is portrayed as "backward"; however, she is "backward" in specific ways that resonate with Nepal's struggle to resist

and yet encompass Western influence. This view may lead to paradoxical effects in which efforts to protect girls and women instead restrict their human rights. Rather than seeing women as universalized victims, Crawford assesses how the social construction of trafficking in a particular society affects girls and women who live in that society. In this book, the author's voice as a woman, a feminist, and a social scientist immersed in a "foreign" way of life, illuminates aspects of this process and highlights the subjectivity of urban women. It makes the connection between Nepali subjectivities and a problem of international significance, the trafficking of girls and women. The book

provides a model for other locally grounded accounts of sex trafficking to counter the universalizing rhetoric of the mass media and some anti-trafficking activists, filling a niche in South Asian Studies and Women's Studies.

This test preparation guide is designed to assist security guards in preparing for theministry's mandatory test. The guide will outline key areas that security guards shouldbe familiar with to ensure they perform their duties in accordance with the

Private Security and Investigative Services Act, 2005 (PSISA) and its regulations. The subjects covered align with the ministry's Training Syllabus for Security Guards. Although the guide is meant to assist candidates in preparing for and writing the test, it does not constitute a training manual, and is not a substitute for an in-person training course. At the end of each section of this test preparation guide, you will find links to external resources that may be of further assistance to you. Many of these will bring you to various laws and regulations; it is recommended that you have an overall understanding of these and how they relate to key topics covered in the test. Other links will bring you to existing training materials available to the public. While these materials may contain valuable information, please keep in mind that they were not specifically designed for Ontario's security guard and private investigator training and testing program. About the Test The ministry's tests were developed by subject matter experts (SMEs) in the private security and investigative services industry who worked with the ministry's test development consultant, CASTLE Worldwide Inc. The SMEs developed the test questions using a protocol of writing and review that conforms to the best practices of psychological and test development standards. They comprehensively reviewed and validated each question for appropriateness of the answers and correct answer keys. A panel of SMEs also reviewed and tested the questions and participated in setting the cut scores (pass marks) for the tests. The security guard test is in a written, 60 question, multiple choice format. Test appointments are 2 hours in duration, 75 minutes of which is the allotted test completion time.

Taxaceae and Cephalotaxaceae: Biodiversity, Chemodiversity, and Pharmacotherapy accounts for the biodiversity and chemodiversity of these medicinal plants, examining and synthesizing existing research into their biology, chemistry and pharmacotherapy. The title examines how pharmacophylogeny allows sustainable conservation and exploitation, presents how these plants work from the chemical level upward, and examines associated microbe compounds. Chapters present a summary of biological and biochemical research of Taxaceae plants, progress in mining their chemodiversity, mining

pharmacotherapy utility from their chemodiversity and biodiversity, drug metabolism and pharmacokinetic diversity of their medicinal compounds, mining pharmacotherapy utility from associated microbes, and more. Sections cover the biodiversity, chemodiversity and pharmacotherapy of Cephalotaxus medicinal plants, Amentotaxus, Pseudotaxus and Torreya medicinal plants. The book envisages that multiple omics platforms and advanced systems biology will allow further exploration of Taxaceae and Cephalotaxaceae, thus streamlining the future drug supply chain. Covers the biodiversity and chemodiversity of Taxaceae/Cephalotaxus medicinal plants. Considers how a pharmacophylogeny framework can benefit conservation and

This book is dedicated to those who have
something to hide. It is a book about
"privacy preserving data publishing" -- the
art of publishing sensitive personal data,
collected from a group of individuals, in a
form that does not violate their privacy.
This problem has numerous and diverse

areas of application, including releasing
Census data, search logs, medical records,
and interactions on a social network. The
purpose of this book is to provide a detailed
overview of the current state of the art as
well as open challenges, focusing particular
attention on four key themes: RIGOROUS
PRIVACY POLICIES Repeated and highly-
publicized attacks on published data have
demonstrated that simplistic approaches to
data publishing do not work. Significant
recent advances have exposed the
shortcomings of naive (and not-so-naive)
techniques. They have also led to the
development of mathematically rigorous
definitions of privacy that publishing
techniques must satisfy; METRICS FOR
DATA UTILITY While it is necessary to
enforce stringent privacy policies, it is

equally important to ensure that the published version of the data is useful for its intended purpose. The authors provide an overview of diverse approaches to measuring data utility; **ENFORCEMENT MECHANISMS** This book describes in detail various key data publishing mechanisms that guarantee privacy and utility; **EMERGING APPLICATIONS** The problem of privacy-preserving data publishing arises in diverse application domains with unique privacy and utility requirements. The authors elaborate on the merits and limitations of existing solutions, based on which we expect to see many advances in years to come.

Economics can be a lens for understanding the behavior of schools, districts, states, and nations in meeting education needs of their populaces, as well as for understanding the individual decisions made by administrators, teachers, and students. Insights from economics help decision makers at the state level understand how to raise and distribute funds for public schools in an equitable manner for both schools and taxpayers. Economics also can assist researchers in analyzing effects of school spending and teacher compensation on student outcomes. And economics can provide important insights into public debates on issues

such as whether to offer vouchers for subsidizing student attendance at private schools. This two-volume encyclopedia contains over 300 entries by experts in the field that cover these issues and more. Features: This work of 2 volumes (in both print and electronic formats) contains 300-350 signed entries by significant figures in the field. Entries conclude with cross-references and suggestions for further readings to guide students to in-depth resources. Although organized in A-to-Z fashion, a thematic “Reader’s Guide” in the front matter groups related entries by topic. Also in the front matter, a chronology provides students with historical perspective on the development of

education economics and finance as a field of study The entire work concludes with a Resources appendix and a comprehensive Index. In the electronic version, the index, Reader's Guide, and cross references combine to provide effective search-and-browse capabilities.
