Mental health and psychosocial support

(MHPSS) is a term used to describe a wide range of actions that address social, psychological and psychiatric problems that are either pre-existing or emergency-induced. These actions are carried out in highly different contexts by organizations and people with different professional backgrounds, in different sectors and with different types of resources. All these different actors--and their donors--need practical assessments leading to recommendations that can be used immediately to improve people's mental health and well-being. Although a range of assessment tools exist, what has been missing is an overall approach that clarifies when to use which tool for what purpose. This document offers an approach to

assessment that should help you review information that is already available and only collect new data that will be of practical use, depending on your capacity and the phase of the humanitarian crisis. This document is rooted in two policy documents, the IASC Reference Group's (2010) "Mental Health and Psychosocial Support in Humanitarian Emergencies: What Should Humanitarian Health Actors Know?" and the "Sphere Handbook's Standard on Mental Health" (Sphere Project, 2011). It is written primarily for public health actors. As the social determinants of mental health and psychosocial problems occur across sectors, half of the tools in the accompanying toolkit cover MHPSS assessment issues relevant to other sectors as

well as the health sector.

Alarm Management for Process Control, Second Edition CRC Press

Harnessing people power for profit Staffing has become the second-fastest-growing industry in the United States, largely by serving a lean business world in which companies are forced to downsize and merge in order to stay competitive. The work still has to be done, but now outsourcing to staffing services, especially for specialized business and technical skills, covers it. This hands-on guide, from Entrepreneur magazine's highly successful StartUp series, shows the budding entrepreneur how to set up and operate a firm that can supply person power for a narrow or broad range of business needs.

Among other topics, *Start Your Own Staffing Service* covers: Different types of staffing services and the markets they serve
Researching the market to find a lucrative niche
Determining the best financing, location, and business plan
Recruiting and retaining top-quality staffing personnel
Attracting and keeping high-value clients
Whether it serves a huge market, such as office and clerical personnel, or a niche market like engineering or medical specialties, a staffing service can be a real revenue producer for a savvy businessperson who is knowledgeable about matching people's skills with the needs of businesses.

Universal-Publishers Quality Assurance of Aseptic Preparation Services Standards Handbook (also known as the Yellow Guide) provides standards for unlicensed aseptic preparation in the UK, as well as practical information to aid implementation of the standards. The handbook delivers essential standards in a practical way and in a format that will be useful for

pharmacy management, staff working in aseptic preparation units and those whose role it is to audit the services. The accompanying support resources help with understanding the complexities of relevant topics including microbiology, radiopharmaceuticals, advanced therapy medicinal products, technical (quality) agreements and capacity planning. All the standards have been revised and updated for this 5th edition. The text is produced on behalf of the Royal Pharmaceutical Society (RPS) and the NHS Pharmaceutical Quality Assurance Committee. New in this edition:

Replaces the 4th edition standards and forms the basis for an ongoing audit program in the NHS. Many new and revised standards. Greater emphasis on Pharmaceutical Quality Systems; the responsibilities of pharmacy management, Chief Pharmacists (or equivalent), has been expanded in line with developments in Good Manufacturing Practice. Reformatted into 2 parts: standards and support resources. This is a new collaboration between the RPS and NHS. Since the previous edition the RPS has become the professional body for pharmacists and pharmaceutical

scientists. RPS launched these standards as part of a library of professional standards and a programme of work to create standards for all areas of pharmacy. The Handbook is essential for pharmacists, hospital pharmacy management and technical services teams, and auditors of unlicensed NHS hospital pharmacy aseptic preparation services in the UK, pharmacists and regulators. The text is used to inform standards used in several other countries.

Clinical Pathways in Stroke Rehabilitation

This open access book focuses on practical clinical problems that are frequently encountered in stroke rehabilitation. Consequences of diseases, e.g. impairments and activity limitations, are addressed in rehabilitation with the overall goal to reduce disability and promote participation. Based on the available best external evidence, clinical pathways are

described for stroke rehabilitation bridging the gap between clinical evidence and clinical decision-making. The clinical pathways answer the questions which rehabilitation treatment options are beneficial to overcome specific impairment constellations and activity limitations and are well acceptable to stroke survivors, as well as when and in which settings to provide rehabilitation over the course of recovery post stroke. Each chapter starts with a description of the clinical problem encountered. This is followed by a systematic, but

concise review of the evidence (RCTs, systematic reviews and meta-analyses) that is relevant for clinical decision-making, and comments on assessment, therapy (training, technology, medication), and the use of technical aids as appropriate. Based on these summaries, clinical algorithms / pathways are provided and the main clinical-decision situations are portrayed. The book is invaluable for all neurorehabilitation team members, clinicians, nurses, and therapists in neurology, physical medicine and rehabilitation, and related

"Today Singapore ranks sixth in the world in healthcare outcomes well ahead of many developed countries, including the United States. The results are all the more significant as Singapore spends less on healthcare than any other high-income country, both as measured by fraction of the Gross Domestic Product spent on health and by costs per person. Singapore achieves these results at less than one-fourth the cost of healthcare in the United

States and about half that of Western European countries. Government leaders, presidents and prime ministers, finance ministers and ministers of health, policymakers in congress and parliament, public health officials responsible for healthcare systems planning, finance and operations, as well as those working on healthcare issues in universities and think-tanks should know how this system works to achieve affordable excellence."--Publisher's website.

Temporary employment is on the rise. In uncertain economic times, many businesses view employing temps as a cost-effective strategy to both maximize productivity and foster flexibility. Being noticed and ultimately hired by clients in this increasingly competitive market requires staffing services and temps to perform at new levels of excellence. Working with staffing service firms and temps for over 20 years, Cathy A. Reilly has learned a thing or two about the staffing

industry and the bottom line: what temporary employment success looks like to a client. No matter where you are in this three-sided working arrangement, *The Temp Factor: The Complete Guide to Temporary Employment for Staffing Services, Clients, and Temps* is the most comprehensive and innovative manual on temporary employment you will find. This up-to-date book is written for anyone working within the temporary employment industry, whether you are just starting out or possess years of experience. It provides readers with basic information to build upon, fresh

perspectives, and better solutions to meet today's business staffing challenges. The Temp Factor is a valuable resource for temporary employees, clients and staffing services seeking to achieve distinction and a competitive edge.

Annual Review

This book elevates alarm management from a fragmented collection of procedures, metrics, experiences, and trial-and-error, to the level of a technology discipline. It provides a complete treatment of best practices in alarm management. The technology and approaches found here provide the opportunity to completely understand the what, the why, and the how of successful alarm systems. No modern industrial enterprise, particularly in such areas as chemical processing, can operate without a secure and reliable

infrastructure of alarms and controls—they are an integral part of all production management and control systems. Improving alarm management is an effective way to provide operators with high-value support and guidance to successfully manage industrial plant operations. Readers will find: Recommendations and guidelines are developed from fundamental concepts to provide powerful technical tools and workable approaches; Alarms are treated as indicators of abnormal situations, not simply sensor readings that might be out of position; Alarm

improvement is intimately linked to infrastructure management, including the vital role of plant maintenance to alarm management, the need to manage operators' charter to continue to operate during abnormal situations vs. cease operation, and the importance of situation awareness without undue reliance upon alarms. The ability to appreciate technical issues is important, but this book requires no previous specific technical, educational, or experiential background. The style and content are very accessible to a broad industrial audience from board operator to

plant manager. All critical tasks are explained with workflow processes, examples, and insight into what it all means. Alternatives are offered everywhere to enable users to tailor-make solutions to their particular sites.
