Videbeck Psychiatric-Mental Health Nursing, 6th Ed. + Prepu for Videbeck's Psychiatric-mental Health Nursing, 6th Ed. + Marquis Leadership Roles and Management Functions in Nursing, 8th Ed. Lippincott Williams & Wilkins Varcarolis' Foundations of Psychiatric-Mental Health Nursing, 8th Edition is the most comprehensive RN psychiatric nursing text on the market! Awarded second place in the 2018 AJN Book of the Year Awards in Psychiatric

Mental Health Nursing category. User-friendly by design, it simplifies the often-intimidating subject of psychiatric-mental health nursing with a practical, clinical perspective. This edition was revised in conjunction with a readability expert to support clarity and ease of understanding. Chapters follow the nursing process framework and progress from theory to application, preparing your students for clinical practice with real-world examples. New to this edition are full-page illustrated explanations about the neurobiology of disorders

and associated medications, criteria from the American Psychiatric Association's Diagnostic and Statistical Manual of Mental Disorders, 5th edition (DSM-5) for major disorders, completely revised Evidence-Based Practice boxes, and a fully rewritten chapter on Dying, Death, and Grieving to provide students with essential information about difficult topics. Mentor-like writing style reinforces important information and helps in applying textbook content to the clinical setting. Coverage of key topics and emerging nursing trends keep you current

with best practices in the field. Considering Culture boxes discuss the importance of person-centered care in providing competent care to diverse populations in various clinical situations. Vignettes with vivid mini-stories prepare you for real-world practice with personal, descriptive characterizations of patients with specific psychiatric disorders. Health Policy Boxes introduce the role you can play in advocating for patients and the profession. Clinical chapters follow the six-step nursing process, providing consistent guidelines for comprehensive

assessment and intervention. NEW! Full-page illustrated explanations about the neurobiology of disorders and associated medications. NEW! DSM-5 guidelines from the American Psychiatric Association's Diagnostic and Statistical Manual of Mental Disorders are fully incorporated in the text, and include updated NANDA content. NEW! Completely revised Evidence-Based Practice boxes. NEW! Revised chapter on Dying, Death and Grieving gives you all the vital information you need. NEW! Ten NCLEX-style questions and answers at the

end of each chapter. Pillitteri 7e Text; Plus Videbeck 6e Text Package Mosby Incorporated This package contains the following products:

nursing programs that devote less than six weeks to psychiatric/mental health nursing -- the stress-adaptation model as its conceptual framework -- Each disorder includes: historic and epidemiologic factors, background assessment data, predisposing factors/symptomatology, common nursing diagnoses with standardized guidelines for intervention in care, outcome criteria, reassessment, evaluation, and	medications/treatment modalities -- Assessment based on criteria from DSM IV -- Chapters include objectives, glossary, case studies with critical thinking exercises, NCLEX-style chapter review questions, care plans and critical pathways, and approved NANDA diagnoses -- Special topics include crisis intervention, psychobiology, psychopharmacology, sociocultural concepts, therapeutic groups, family as a group, and	the suicidal client -- Contains selected case studies or Build Your Critical Thinking Skills boxes with three questions per case -- Includes standardized care plans with scientific rationales for every nursing intervention -- Appendix includes critical pathways and a list of common psychiatric behaviors and associated NANDA nursing diagnoses Essential of Psychiatric Mental Health Nursing, 6th Ed. + Psychiatric Drugs F A Davis Company
--	---	---

Exploring the full psychiatric nursing curriculum, from theoretical foundations to interventions for commonly encountered disorders, *Psychiatric Mental Health Nursing 6th Edition* provides a practical focus on the skills and concepts students need for successful practice.

Throughout the book, students have opportunities to practice specific nursing interventions, build therapeutic communication skills, and apply content within the framework of the nursing process. A study guide built into every chapter reinforces student learning and builds critical reasoning skills. The

Sixth Edition is enhanced by new Best Practice boxes, new chapters, updated content, an increased focus on cultural considerations, a new design, and a new Psych Nursing Online Video Series that shows realistic patient scenarios and asks students to make decisions and answer questions about the video clip. In addition, the Sixth Edition is supported by online tools that cultivate deeper understanding and increased competency, including PrepU's adaptive quizzing and DocuCare, educational electronic health record software.

-- Uses the stress-adaptation model as its conceptual framework -- The latest classification of psychiatric

disorders in DSM IV -- Access to 50 psychotropic drugs with client teaching guidelines on our website -- Each chapter based on DSM IV diagnoses includes tables with abstracts describing recent research studies pertaining to specific psychiatric diagnoses -- Within the DSM IV section, each chapter features a table with guidelines for client/family education appropriate to the specific diagnosis -- Four new chapters: Cognitive Therapy, Complementary Therapies, Psychiatric Home Health Care, and Forensic Nursing -- Includes critical pathways for working in case management situations -- Chapters include

objectives, glossary, case studies using critical thinking, NCLEX-style chapter review questions, summaries, and care plans with documentation standards in the form of critical pathways -- The only source to thoroughly cover assertiveness training, self-esteem, and anger/aggression management -- Key elements include historic and epidemiologic factors; background assessment data, with predisposing factors/symptomatology for each disorder; common nursing diagnoses with standardized guidelines for intervention in care; and outcome criteria, guidelines for reassessment, evaluation of

care, and specific medication/treatment modalities -- Special topics include the aging individual, the individual with HIV/AIDS, victims of violence, and ethical and legal issues in psychiatric/mental health nursing -- Includes information on the Mental Status exam, Beck depression scale, and Holmes & Rahe scale defense mechanisms criteria
Essentials of Psychiatric Mental Health Nursing, 6th Ed. + Psychiatric Mental Health Nursing Success, 2nd Ed. Pearson Education India
A 2017 AJN Book of the

Year Award winner, *Essentials of Psychiatric Mental Health Nursing: A Communication Approach to Evidence Based Care*, 4th Edition, offers the perfect balance of essential nursing interventions and clinical content. It incorporates a reader-friendly style, and an emphasis on therapeutic communication and evidence-based practice. Perfect for shorter psychiatric nursing courses, this streamlined psychiatric text includes need to know information and key DSM-5 content you need to pass

your course and prepare for the NCLEX®. A neurobiology of the brain teaching tool provides a visual depiction of how the disorder affects brain function — and what drugs are used to treat it. Additionally, this new edition includes Giddens Concept boxes, Integrative Care boxes, updated clinical disorders chapters, and new use of nursing diagnosis language International Classification for Nursing Practice (ICNP) which smooths your transition into practice, as this is a

common language shared with many electronic health record documentation systems Neurobiology of the brain feature provides a visual depiction on how the disorder affects brain function and what drugs are used to treat the disorder. Applying Evidence Based Practice boxes throughout the clinical chapters pose a question, walk you through the process of gathering evidence-based data from a variety of sources, and present a plan of care based on the evidence. Vignettes describing psychiatric

patients and their disorders add more practical application to the chapter material. DSM-5 diagnostic criteria identify medical diagnostic criteria for most major disorders. Applying Critical Judgment introduces clinical situations in psychiatric nursing at the end of all chapters with thought provoking questions that engage critical thinking. NEW! Integrative Care boxes address alternative therapies to treat psychiatric illnesses. NEW! Giddens Concept boxes at the beginning of each chapter tie

to the topics discussed in that chapter. UPDATED! Clinical disorders chapters such as Schizophrenia, Bipolar Disorders and Somatoform Disorders, and many others reflect the latest evidence-based research and practice. NEW! ICNP nursing diagnosis language smooths your transition into practice, as this is a common language shared with many electronic health record documentation systems. UPDATED! Cultural Considerations sections include more updated and relevant

material, whenever possible in the clinical chapters, and address cultural considerations with various patients and appropriate care.

Mental Health Nursing F A Davis Company

A thoughtful, portable clinical companion, Varcarolis' Manual of Psychiatric Nursing Care Planning: An Interprofessional Approach, 6th Edition, provides you with the latest diagnostic information available, including the DSM-5 and patient problems, for accurate assessment and diagnosis of patients. This clinically-based guide offers

quick and easy access to the latest psychiatric nursing care planning guidelines for a range of settings including the inpatient unit, home care, or community mental health setting. Designed to accompany Foundations of Psychiatric-Mental Health Nursing, the refreshed and updated edition is a perfect reference for learning to create psychiatric nursing care plans. A thoroughly revised patient centered assessment, including the DSM-5, supplies you with the latest diagnostic information available for accurate assessment and diagnosis of patients. The latest patient problems,

assessment and treatment strategies, and psychotropic drug information keep you up-to-date with the most current information. Care plans containing patient problems, etiology, assessment findings/diagnostic cues, outcome criteria, long- and short-term goals, and interventions and rationales offer plans of care for a wide range of psychiatric nursing diagnoses. Talk-based therapies covered and referred to in a dedicated chapter on psychotherapeutic models. Promising brain stimulation therapies are addressed in a separate chapter NEW! A separate sleep disorder

chapter addresses alterations present in all psychiatric disorders. NEW! Updated medications equip you with the latest information on medications used with psychiatric patients. NEW! Updated, refreshed, and refined Manual improves overall design and reduces extraneous content to focus on essential clinical information. *Pkg Psychiatric Mental Health Nursing 6th and Nursing Diagnoses in Psychiatric Nursing 8th* Wolters Kluwer Law & Business This full-color book uses a concise format to provide a source of fundamental psychiatric/mental health

nursing information for students working in psychiatric/mental health facilities. Nursing process is the framework within which delivery of nursing care is described for individuals diagnosed with disorders from the DSM-IV-TR 2000. A CD including learning activities, case studies with critical thinking questions, assessment tools, nearly 60 psychotropic med drug monographs, chapter review questions, care plans and critical pathways and client education teaching guides is included. The book also contains 21 sample Client Teaching Guides containing information related to

psychotropic meds and psychiatric illnesses that can be reproduced for clients.

This student-driven textbook uses the nursing process framework and emphasizes therapeutic communication with examples and pharmacology throughout. Interventions focus on all aspects of client care, including communication, client and family education, and community resources, as well as their practical application in various clinical settings. The chapters are short, and the writing style is direct in order to facilitate reading comprehension and student learning. New! Unfolding Patient Stories,

written by the National League for Nursing, are an engaging way to begin meaningful conversations in the classroom. Cartoon-like images to explain difficult concepts. An in-book study guide, built into every chapter, provides questions to reinforce student learning and build clinical reasoning skills. Watch and Learn icons identify disorders directly related to the online video series. Therapeutic Communication Dialogues provide examples of nurse-client interactions to help students build skills in this

vital aspect of mental health nursing.

that devote less than six weeks to psychiatric/mental health nursing -- Uses the stress-adaptation model as its conceptual framework -- Each disorder includes: historic and epidemiologic factors, background assessment data, predisposing factors/symptomatology, common nursing diagnoses with standardized guidelines for intervention in care, outcome criteria, reassessment, evaluation, and medications/treatment modalities -- Assessment based on criteria from DSM

IV -- Chapters include objectives, glossary, case studies with critical thinking exercises, NCLEX-style chapter review questions, care plans and critical pathways, and approved NANDA diagnoses -- Special topics include crisis intervention, psychobiology, psychopharmacology, sociocultural concepts, therapeutic groups, family as a group, and the suicidal client -- Contains selected case studies or Build Your Critical Thinking Skills boxes with three questions per case -- Includes

standardized care plans with scientific rationales for every nursing intervention -- Appendix includes critical pathways and a list of common psychiatric behaviors and associated NANDA nursing diagnoses Foundations of Psychiatric Mental Health Nursing A Clinical Approach This new edition of a bestselling, evidence-based textbook provides a comprehensive overview of psychiatric and mental health nursing. Keeping service users and their recovery at the centre of

care, the holistic approach will help nurses to gain the tools and understanding required to work in this complex area. Extensively updated for this new edition, the text looks at: Aspects of mental health nursing: covering topics such as ethics, developing therapeutic relationships and supervision. The foundations of mental health nursing: discussing diagnosis, assessment and risk. Caring for those experiencing mental health distress: looking at wide range of troubles including anxiety,

bipolar disorder, eating disorders and issues around sexuality and gender. Care planning and approaches to therapeutic practice: exploring ideas, pathways and treatments such as recovery, CBT, psychodynamic therapies and psychopharmacology. Services and support for those with mental health distress: covering topics such as collaborative work, involvement of service users and their families and carers, and a range of different mental healthcare settings. Mental health nursing in the

twenty-first century: highlighting emerging and future trends including the political landscape, physical health and health promotion, and technological advances. This accessible and comprehensive textbook integrates service user perspectives throughout and includes student-friendly features such as learning outcomes, key points summaries, reflection points and further reading sections. It is an essential resource for all mental health nursing students, as well as an invaluable reference for

practising nurses.
