Varcarolis' Foundations of Psychiatric-Mental Health Nursing, 8th Edition is the most comprehensive RN psychiatric nursing text on the market! Awarded second place in the 2018 AJN Book of the Year Awards in Psychiatric Mental Health Nursing category. User-friendly by design, it simplifies the often-intimidating subject of psychiatric-mental health nursing with a practical, clinical perspective. This edition was revised in conjunction with a readability expert to support clarity and ease of understanding. Chapters follow the nursing process framework and progress from theory to application, preparing your students for clinical practice with real-world examples. New to this edition are full-page illustrated explanations about the neurobiology of disorders and associated medications, criteria from the American Psychiatric Association's Diagnostic and Statistical Manual of Mental Disorders, 5th edition (DSM-5) for major disorders, completely revised Evidence-Based Practice boxes, and a fully rewritten chapter on Dying, Death, and Grieving to provide students with essential information about difficult topics. Mentor-like writing style reinforces important information and helps in applying textbook content to the clinical setting. Coverage of key topics and emerging nursing trends keep you current with best practices in the field. Considering Culture boxes discuss the importance of person-centered care in providing competent care to diverse populations in various clinical situations. Vignettes with vivid mini-stories prepare you for real-world practice with personal, descriptive characterizations of patients with specific psychiatric disorders. Health Policy Boxes introduce the role you can play in advocating for patients and the profession. Clinical chapters follow the six-step nursing process, providing consistent guidelines for comprehensive assessment and intervention. NEW! Full-page illustrated explanations about the neurobiology of disorders and associated medications. NEW! DSM-5 guidelines from the American Psychiatric Association's Diagnostic and Statistical Manual of Mental Disorders are fully incorporated in the text, and include updated NANDA content. NEW! Completely revised Evidence-Based Practice boxes. NEW! Revised chapter on Dying, Death and Grieving gives you all the vital information you need. NEW! Ten NCLEX-style questions and answers at the end of each chapter.

A Communication Approach to Evidence-Based Care F A Davis Company

Take an evidence-based, holistic approach to mental health nursing with the text that is concise, engaging, and informative. You will gain the knowledge and skills you need to effectively treat patients with physiological and psychological disorders. The 6th Edition reflects the practice of mental health nursing today, including DSM-5, NANDA-I 2012-2014, and the latest standards of care outlined by the Quality and Safety Education for Nurses (QSEN) Institute. Build a solid foundation of basic concepts; then explore nursing interventions for the most common to complex psychiatric disorders. The distinctive voice and dedicated vision of Mary C. Townsend will guide you every step of the way.

Psychiatric Mental Health Nursing Wolters Kluwer Law & Business

This full-color book uses a concise format to provide a source of fundamental psychiatric/mental health nursing information for students working in psychiatric/mental health facilities. Nursing process is the framework within which delivery of nursing care is described for individuals diagnosed with disorders from the DSM-IV-TR 2000. A CD including learning activities, case studies with critical thinking questions, assessment tools, nearly 60 psychotropic medication monographs, chapter review questions, care plans and critical pathways and client education teaching guides is included. The book also contains 21 sample Client Teaching Guides containing information related to psychotropic medications and psychiatric illnesses that can be reproduced for clients.

The craft of caring CRC Press

Exploring the full psychiatric nursing curriculum, from theoretical foundations to interventions for commonly encountered disorders, Psychiatric Mental Health Nursing 6th Edition provides a practical focus on the skills and concepts students need for successful practice. Throughout the book, students have opportunities to practice specific nursing interventions, build therapeutic communication skills, and apply content within the framework of the nursing process. A study guide built into every chapter reinforces student learning and builds critical reasoning skills. The Sixth Edition is enhanced by new Best Practice boxes, new chapters, updated content, an increased focus on cultural considerations, a new design, and a new Psych Nursing Online Video Series that shows realistic patient scenarios and asks students to make decisions and answer questions about the video clip. In addition, the Sixth Edition is supported by online tools that cultivate deeper understanding and increased competency, including PrepU's adaptive quizzing and DocuCare, educational electronic health record software.

Lippincott's Manual of Psychiatric Nursing Care Plans Lippincott

Williams & Wilkins

A 2017 AJN Book of the Year Award winner, *Essentials of Psychiatric Mental Health Nursing: A Communication Approach to Evidence Based Care*, 4th Edition, offers the perfect balance of essential nursing interventions and clinical content. It incorporates a reader-friendly style, and an emphasis on therapeutic communication and evidence-based practice. Perfect for shorter psychiatric nursing courses, this streamlined psychiatric text includes need to know information and key DSM-5 content you need to pass your course and prepare for the NCLEX®. A neurobiology of the brain teaching tool provides a visual depiction of how the disorder affects brain function — and what drugs are used to treat it. Additionally, this new edition includes Giddens Concept boxes, Integrative Care boxes, updated clinical disorders chapters, and new use of nursing diagnosis language International Classification for Nursing Practice (ICNP) which smooths your transition into practice, as this is a common language shared with many electronic health record documentation systems. Neurobiology of the brain feature provides a visual depiction on how the disorder affects brain function and what drugs are used to treat the disorder. Applying Evidence Based Practice boxes throughout the clinical chapters pose a question, walk you through the process of gathering evidence-based data from a variety of sources, and present a plan of care based on the evidence. Vignettes describing psychiatric patients and their disorders add more practical application to the chapter material. DSM-5 diagnostic criteria identify medical diagnostic criteria for most major disorders. Applying Critical Judgment introduces clinical situations in psychiatric nursing at the end of all chapters with thought provoking questions that engage critical thinking. NEW! Integrative Care boxes address alternative therapies to treat psychiatric illnesses. NEW! Giddens Concept boxes at the beginning of each chapter tie to the topics discussed in that chapter. UPDATED! Clinical disorders chapters such as Schizophrenia, Bipolar Disorders and Somatoform Disorders, and many others reflect the latest evidence-based research and practice. NEW! ICNP nursing diagnosis language smooths your transition into practice, as this is a common language shared with many electronic health record documentation systems. UPDATED! Cultural Considerations sections include more updated and relevant material, whenever possible in the clinical chapters, and address cultural considerations with various patients and appropriate care.

Psychiatric/Mental Health Nursing F A Davis Company

This new edition of a bestselling, evidence-based textbook provides a comprehensive overview of psychiatric and mental health nursing. Keeping service users and their recovery at the centre of care, the holistic approach will help nurses to gain the tools and understanding required to work in this complex area. Extensively updated for this new edition, the text looks at: Aspects of mental health nursing: covering topics such as ethics, developing therapeutic relationships and supervision. The foundations of mental health nursing: discussing diagnosis, assessment and risk. Caring for those experiencing mental health distress: looking at wide range of troubles including anxiety, bipolar disorder, eating disorders and issues around sexuality and gender. Care planning and approaches to therapeutic practice: exploring ideas, pathways and treatments such as recovery, CBT, psychodynamic therapies and psychopharmacology. Services and support for those with mental health distress: covering topics such as collaborative work, involvement of service users and their families and carers, and a range of different mental healthcare

settings. Mental health nursing in the twenty-first century: highlighting emerging and future trends including the political landscape, physical health and health promotion, and technological advances. This accessible and comprehensive textbook integrates service user perspectives throughout and includes student-friendly features such as learning outcomes, key points summaries, reflection points and further reading sections. It is an essential resource for all mental health nursing students, as well as an invaluable reference for practising nurses.
