Peter Gray's evolutionary perspective and emphasis on critical thinking have made his rigorous yet accessible introduction to psychology a widely respected classroom favourite, edition after edition. Now thoroughly revised, with the help of co-author David Bjorklund, Psychology invites and stimulates students to investigate the big ideas in psychological science. Psychology can also be purchased with the breakthrough online resource, LaunchPad, which offers innovative media content, curated and organised for easy assignability. LaunchPad's intuitive interface presents quizzing, flashcards, animations and much more to make learning actively engaging.

[Human Relations](#) Franklin Classics

Combining theory, research, and applications, this popular text guides college students on how to become self-regulated learners. Students gain knowledge about human motivation and learning as they improve their study skills. The focus is on relevant information and features to help students to identify the components of academic learning that contribute to high achievement, to master and practice effective learning and study strategies, and then to complete self-regulation studies that teach a process for improving their academic behavior. A framework organized around motivation, methods of learning, time management, control of the physical and social environment, and monitoring performance makes it easy for students to recognize what they need to do to become academically more successful. Pedagogical features include Exercises, Follow-Up Activities, Student Reflections, Chapter-end Reviews, Key Points, and a Glossary. New in the Fifth Edition Discussion of the importance of sleep in learning and memory Revised and updated chapter on self-regulation of emotions Current research on impact of students' use of technology including digital learning platforms and tools, social media, and online learning Updated Companion Website resources for students and instructors

[A Concise Introduction](#) Routledge

More than any other textbook, Don and Sandra Hockenbury's Psychology relates the science of psychology to the lives of the wide range of students taking the introductory course. Now Psychology returns in a remarkable new edition that shows just how well-attuned the Hockenburys are to the needs of today's students and instructors.

[Psychology](#) Worth

Influenced by astronomy education research, 21st Century Astronomy offers a complete pedagogical and media package that facilitates learning by doing, while the new one-column design makes the Fifth Edition the most accessible introductory text available today.

[An Introduction to Brain and Behavior](#) McGraw-Hill Education

This fully revised and updated edition of Social Psychology is an engaging exploration of the question, "what makes us who we are?" presented in a new, streamlined fashion. Grounded in the latest research, Social Psychology explains the methods by which social psychologists investigate human behavior in a social context and the theoretical perspectives that ground the discipline. Each chapter is designed to be a self-contained unit for ease of use in any classroom. This edition features new boxes providing research updates and "test yourself" opportunities, a focus on critical thinking skills, and an increased emphasis on diverse populations and their experiences.

The Psychology of Health and Health Care: A Canadian Perspective, 3Ce is a valuable resource for Canadian students, instructors and practitioners of psychology, nursing, medicine, public health and epidemiology. This all-Canadian text introduces the field of health psychology and explains how psychological concepts can be applied to health care delivery in Canada. A new chapter on the Systems of the Body brings a more biological focus to the text, while real-life examples bring immediacy and increased understanding to students. The chapter on health and the internet has been condensed to become a focused module, suitable for class discussion and assignments. The text is refreshed with a new more pleasing two-colour format, and brought up-to-date with updated research and literature with a focus on the Canadian perspective in healthcare. With new information on the privatization of health care, self-accountability, and an expanded section on the feminization of medicine, this text is more current and focused than ever before on the state of healthcare in Canada.

[A Focus on Self-Regulated Learning](#) Macmillan Higher Education

More than any other introductory textbook, Don and Sandra Hockenbury's Discovering Psychology makes the story of psychology a captivating, highly personal experience for all kinds of students. Without sacrificing science, the authors draw on personal experiences and other real stories to illustrate essential concepts and important research directions in a recognizable, relatable way. This is especially true in the area of cutting-edge neuroscience, which the Hockenburys make extremely teachable and utterly absorbing without oversimplifying the presentation. Special Package: Each student copy of Discovering Psychology, Sixth Edition is

packaged with the book's Study Guide and Worth Publishers' new Three-Dimensional Brain. DSM 5 Updates Available for Fall 2014 classes, this update version features new content from Sandra Hockenbury in response to the release of the DSM-5. This new content is integrated into the text without changing pagination or the structure of the chapters. A special DSM 5 Supplement by Sandra Hockenbury is available for Fall 2013 and Spring and Summer 2014 courses.

[A Collector's Edition](#) Wadsworth Publishing Company

"This book is designed to help students organize their thinking about psychology at a conceptual level. The focus on behaviour and empiricism has produced a text that is better organized, has fewer chapters, and is somewhat shorter than many of the leading books. The beginning of each section includes learning objectives; throughout the body of each section are key terms in bold followed by their definitions in italics; key takeaways, and exercises and critical thinking activities end each section"--BCcampus website.

[The Science in Context](#) Macmillan Higher Education

Announcing a new Myers/DeWall text, created specifically for the Fall 2019 AP® course framework! You are likely familiar with the name Dr. David G. Myers. Now, he and his new co-author, Nathan DeWall, bring you a book that will allow you to use College Board's new Personal Progress Checks and Dashboard more effectively. This updated edition includes 100% of the new course content in the new nine-unit structure. All teacher and student resources will also be updated to correlate to the new student edition; this includes the TE, TRFD, TB, Strive, and LaunchPad. Everything will publish in summer 2020 such that you can use this new program for Fall 2020 classes. If you're not familiar with Myers/DeWall texts, you are in for a treat! Drs. Myers and DeWall share a passion for the teaching of psychological science through wit, humor, and the telling of poignant personal stories (individually identified in the text by the use of each author's initials [DM and ND]). Through close collaboration, these authors produce a unified voice that will teach, illuminate, and inspire your AP® students.

[Motivation and Learning Strategies for College Success](#) Psychology

Provides the most Support for Student Learning and Success Lifespan Development, 7/e by Denise G. Boyd and Helen L. Bee thoroughly and accessibly addresses the most critical concepts of development. Through their engaging writing style, the authors have made more abstract material about developmental theories approachable to students. Readers will appreciate both the applied nature of this title and the clarity of the authors' presentation of current research. Students will emerge from your course with a thorough understanding of developmental science and will be able to apply this understanding to their own lives.

[Wong's Essentials of Pediatric Nursing](#) Macmillan

More than any other introductory textbook, Don and Sandra Hockenbury's Discovering Psychology makes the story of psychology a captivating, highly personal experience for all kinds of students. This convenient, money-saving package is a must-have for students training for a career in nursing. It includes the Wong's Essentials of Pediatric Nursing textbook and Virtual Clinical Excursions 3.0.

[Industrial/organizational Psychology](#) Routledge

Now your students can become intelligent consumers of scientific research, without being overwhelmed by the statistics! Jaccard and Becker's text teaches students the basic skills for analyzing data and helps them become intelligent consumers of scientific information. Praised for its real-life applications, the text tells students when to use a particular statistic, why they should use it, and how the statistic should be computed and interpreted. Because many students, given a set of data, cannot determine where to begin in answering relevant research questions, the authors explicate the issues involved in selecting a statistical test. Each statistical technique is introduced by giving instances where the test is most typically applied followed by an interesting research example (each example is taken from psychology literature).

[The Solar System](#) John Wiley & Sons

Worth is proud to publish the Third Edition of How Children Develop by Robert S. Siegler, Judy S. DeLoache, and Nancy Eisenberg—the leading textbook for the topically-organized child development course. Providing a fresh perspective on the field of child development, the authors emphasize fundamental principles, enduring themes, and important recent studies to provide a unique contribution to the teaching of child development.

[8th Edition](#) Worth Publishers

More than any other introductory psychology textbook, the Hockenburys' brief book presents the discipline with a unique understanding of today's students—emphasizing its relevance and immediate impact on their lives. Without sacrificing science, the authors draw on personal experiences and anecdotes to illustrate essential concepts and important research direction. The "Fourth Edition" incorporates hundreds of new research studies throughout, with particular attention to areas of intensive current research and enduring student interest, including neuroscience, lifespan development, memory, and gender and culture issues. Also new is the dramatically enhanced media and supplements package, offering more ways than ever to help students make the study of psychology a part of their world.

[Discovering Psychology](#) Worth Publishers

In this fresh new offering to the Intro Psychology course, authors John Cacioppo and Laura Freberg portray psychology as being an integrative science in two ways. First, they have written a text that reflects psychology's rightful place as a hub science that draws from and is cited by research in many other fields. Second, this text presents psychology as a unified science that seeks a complete understanding of the human mind, rather than as a loosely organized set of autonomous subspecialties. As psychology moves rapidly toward maturity as an integrative, multidisciplinary field, the introductory

course offers an opportunity to teach all of psychology in one place and at one time. This text reflects that evolution--and the authors' excitement about it. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

The Dark Knight of the Soul Macmillan

"A research-based text and assessment package that helps students visualize chemistry as they solve problems. The exciting NEW Sixth Edition expands on the visualization pedagogy from coauthor Stacey Lowery Bretz and makes it even easier to implement in the classroom. Based on her chemistry education research on how students construct and interpret multiple representations, art in the book and media has been revised to be more pedagogically effective and to address student misconceptions. NEW projected visualization questions help instructors assess students' conceptual understanding in lecture or during exams. A NEW Interactive Instructor's Guide provides innovative ways to incorporate research-based active learning pedagogy into the classroom"--

Discovering Psychology Worth Publishers

Sandra Hockenbury and new coauthor Susan Nolan ' s remarkable textbook is grounded in the belief that all kinds of students can develop a real understanding of psychology and lasting scientific literacy. The authors act on that belief by using relatable personal stories to communicate the concepts of psychological science (and the process of science itself), and by presenting important research in a clear not oversimplified way. Hockenbury and Nolan also take full advantage of online learning, creating activities in LaunchPad that have students thinking about psychology as scientists do. New co-author, Susan Nolan of Seton Hall University was recently designated a Master Teacher by the Society for Teaching Psychology. She regularly gives talks about incorporating scientific literacy into the introductory course and across the psychology curriculum.

Discovering Psychology Macmillan Higher Education

In its first edition, Richard Straub's text was acclaimed for its solid scientific approach, emphasis on critical thinking, real-world applications, exquisite anatomical art, and complete media/supplements package. The thoroughly updated new edition builds on those strengths to provide an even more effective introduction to the psychology behind why we get sick, how we stay well, how we react to illness, and how we relate to the health care system and health care providers.
