FOREWORD FROM KRISTIN NEFF 'Kristin Neff offers

practical, wise guidance on the path of emotional healing and deep inner transformation.' Tara Brach, PhD, author of *Radical Acceptance* Kristin Neff PhD, is a professor in educational psychology, and the world's expert on self-compassion. A pioneer who established self-compassion as a field of study, Kristin offers a powerful solution for combating negativity and insecurity - the symptoms of living in a high-pressure world.

Through tried and tested exercises and audio downloads, readers learn the 3 core components that will help to heal destructive emotional patterns so that you can become healthier, happier, and replace negative and destructive measures of self-worth and success with a kinder and non-judgemental approach. Self-

Compassion recognises that we all have weaknesses and limitations, but in accepting this we can discover new ways to achieve improved self-confidence, contentment and reach our highest potential. Simply, easily and compassionately. Kristin Neff's expert and practical advice offers a completely new set of personal development tools that will benefit everyone. 'A

portable friend to all readers ... who need to learn that the Golden Rule works only if it's reversible: We must learn to treat ourselves as well as we wish to treat others.' Gloria Steinem 'A beautiful book that helps us all see the way to cure the world - one person at a time - starting with yourself. Read it and start the journey.' Rosie O'Donnell

Healthcare providers, consumers, researchers and policy makers are inundated with unmanageable amounts of information, including evidence from healthcare research. It has become impossible for all to have the time and resources to find, appraise and interpret this evidence and incorporate it into healthcare decisions. Cochrane Reviews respond to this challenge by identifying, appraising and synthesizing research-based evidence and presenting it in a standardized format, published in The Cochrane Library (www.thecochranelibrary.com). The Cochrane Handbook for Systematic Reviews of Interventions contains methodological guidance for the preparation and maintenance of Cochrane intervention reviews. Written in a clear and accessible format, it is the essential manual for all those preparing, maintaining and reading Cochrane reviews. Many of the principles and methods described here are appropriate for systematic reviews applied to other types of research and to systematic reviews of interventions undertaken by others. It is hoped therefore that this book will be invaluable to all those who want to understand the role of systematic reviews, critically appraise published reviews or perform reviews themselves.

'The strength of this book is in the determined approach it takes to helping the reader learn the subject matter by the inclusion of explanations of key terms and exercises. If coupled with tutorial support, this will encourage students to work harder at the subject matter - always a challenge in what many students perceive as the least accessible and interesting part of psychology. It is well worth considering as a core methods text for undergraduates or for masters students new to psychology'- John Hegarty, Times Higher Educational Supplement, Textbook Guide Research Methods and Statistics in Psychology is an accessible introduction to the principal research methods and statistical procedures that underpin psychological research. With a broad range of support materials and features it is the ideal textbook to accompany both a first and second year course. Key features of this new textbook: - Accompanying website: an interactive resource for both both teachers and students including powerpoint slides of lecture notes, self-test multiple choice questions and answers for students as well as other on-line features. To access these please click on the Companion Website logo above - Coverage of the full research process in psychology from the ground up, addressing issues to do with research goals, problem definition and hypothesis, methodological choices and strategy and ethical controversies. - Complete coverage of the key quantitative and qualitative methods now recognised in psychology. - A host of textbook features including checklists of research evaluation and improvement, discussion questions and exercises; and annotated further reading at the end of every chapter. - Appendices in the back of the textbook in conjunction with the accompanying website - step-by-step guide to performing key statistical tests and a guide to writing up experiments and reports in psychology. Research Methods and Statistics in Psychology is a comprehensive and student-friendly introductory textbook that deals with psychological research issues in depth, but which places an emphasis on the conceptual and practical skills necessary to become a good researcher.
