Communicating Health and Illness SAGE
Even students capable of writing excellent essays still find their first major political science research paper an intimidating experience. Crafting the right research

question, finding good sources, properly summarizing them, operationalizing concepts and designing good tests for their hypotheses, presenting and analyzing quantitative as well as qualitative data are all tough-going without a great deal of guidance and encouragement. Writing a Research Paper in Political Science breaks down the research paper into its constituent parts and shows students what they need to do at each stage to successfully complete each component until the paper is finished. Practical summaries, recipes for success,

worksheets, exercises, and a series of handy checklists make this a must-have supplement for any writing-intensive political science course. New to the Fourth Edition: A non-causal research paper woven throughout the text offers explicit advice to guide students through the research and writing process. Updated and more detailed discussions of plagiarism, paraphrases, "drop-ins," and "transcripts" help to prevent students from misusing sources in a constantly changing digital age. A more detailed discussion of "fake news" and

disinformation shows students how to evaluate and choose high quality sources, as well as how to protect oneself from being fooled by bad sources. Additional guidance for writing abstracts and creating presentations helps students to understand the logic behind abstracts and prepares students for presentations in the classroom, at a conference, and beyond. A greater emphasis on the value of qualitative research provides students with additional instruction on how to do it.

Editing Across Media SAGE Publications

Requirements for professional media editing have undergone enormous technological change. Editors still edit copy. But today they do much more. Mass media editors must demonstrate skills from computerized pagination to social media monitoring, from image manipulation to Search Engine Optimization. The need for editing skills is reaching far beyond traditional journalism and into all areas of mass media, from newspapers to strategic communication. Public relations practitioners are expected to edit. Even advertising creative professionals must edit. And journalists taking on new roles as social media editors need to understand editing at the speed of digital media. This textbook aims to prepare university-level students for these expanded editing roles in

an age of convergence. Thirteen authors representing many years of collective media experience examine both traditional editing roles and new editing needs. While many mass media students will not become professional editors, this textbook assumes nearly all will need competent editing knowledge to produce products of professional quality. Editing, the authors believe, remains a bedrock skill for all students who hope to be successful in the mass media. Instructors considering this book for use in a course may request an examination copy here.

JSL invites the submission of manuscripts that contribute to the exchange of ideas and scholarship about schools and leadership. All theoretical and methodological approaches are welcome. We do not advocate or practice a bias toward any mode of inquiry (e.g., qualitative vs. quantitative; empirical vs. conceptual; discipline-based vs. interdisciplinary) and instead operate from the assumption that all careful and methodologically sound research has the potential to contribute to our understanding of school leadership. We strongly encourage authors to consider both the local and global implications of their work. The journal's goal is to clearly communicate with a diverse audience including both school-based and university-based educators. The journal embraces a

board conception of school leadership and welcomes manuscripts that reflect the diversity of ways in which this term is understood. The journal is interested not only in manuscripts that focus on administrative leadership in schools and school districts, but also in manuscripts that inquire about teacher, student, parent, and community leadership.

Resources in Education Legare Street Press

In this thoroughly researched and documented book, the #1 New York Times bestselling co-author of *Unfit for Command: Swift Boat Veterans Speak Out Against John Kerry* explains why the extreme leftism of an Obama presidency would leave the United States weakened, diminished and divided, why Obama must be defeated -- and how he can be. Barack Obama stepped onto the national political stage when the then-Illinois State senator addressed the 2004 Democratic National Convention. Soon after Obama was elected to the U.S. Senate, author Jerome Corsi began researching Obama's personal and political background. Scrupulously sourced with more than 600 footnotes,

The Obama Nation is the result of that research. By tracing Obama's career and influences from his early years in Hawaii and Indonesia, the beginnings of his political career in Chicago, his voting record in the Illinois legislature, his religious training and his adoption of Christianity through to his recent involvement in Kenyan politics, his political advisors and fundraising associates and his meteoric campaign for president, Jerome Corsi shows that an Obama presidency would, in his words, be "a repeat of the failed extremist politics that have characterized and plagued Democratic Party politics since the late 1960s." In this stunning and comprehensive new book, the reader will learn about: Obama's extensive connections with Islam and radical politics, from his father and step-father's Islamic backgrounds, to his Communist and socialist mentors in Hawaii and Chicago, to his long-term and close associations with former Weather Underground heroes William Ayers and Bernadette Dohrn -- associations much

closer than heretofore revealed by the press. Barack and Michelle's 20-year-long religious affiliation with the black-liberation theology of former Trinity United Church of Christ Reverend Jeremiah Wright, whose sermons have always been steeped in a rage first expressed by Franz Fanon, Stokely Carmichael and Malcolm X, a rage that Corsi shows has deep meaning for Obama. Obama's continuing connections with Kenya, the homeland of his father, through his support for the candidacy of Raila Odinga, the radical socialist presidential contender who came to power amid Islamist violence and church burnings. Obama's involvement in the slum-landlord empire of the Chicago political fixer Tony Rezko, who helped to bankroll Obama's initial campaigns and to purchase of Barack and Michelle's dream-home property. The background and techniques of the Obama campaign's cult of personality, including the derivation of the words "hope" and change." Obama's far-left domestic policy, his controversial votes on

abortion, his history of opposition to the Second Amendment, his determination to raise capital-gains taxes, his impractical plan to achieve universal health care, and his radical plan to tax Americans to fund a global-poverty-reduction program. Obama's naïve, anti-war, anti-nuclear foreign-policy, predicated on the reduction of the military, the eradication of nuclear weapons and an overconfidence in the power of his personality, as if belief in change alone could somehow transform international politics, achieve nuclear-weapons disarmament and withdrawal from Iraq without adverse consequences, for us, for the Iraqis or for Israel. Meticulously researched and documented, The Obama Nation is the definitive source for information on why and how Barack Obama must be defeated -- not by invective and general attacks, but by detailed arguments that are well-researched and fact-based.
