Uncle Tom's Cabin Harlequin

Careers in astronomy for women (as in other sciences) were a rarity in Britain and Ireland until well into the twentieth century. The book investigates the place of women in astronomy before that era, recounted in the form of biographies of about 25 women born between 1650 and 1900 who in varying capacities contributed to its progress during the eighteenth, nineteenth and early twentieth centuries. There are some famous names among them whose biographies have been written before now, there are others who have received less than their due recognition while many more occupied inconspicuous and sometimes thankless places as assistants to male family members. All deserve to be remembered as interesting individuals in an earlier opportunity-poor age. Placed in roughly chronological order, their lives constitute a sample thread in the story of female entry into the male world of science. The book is aimed at astronomers, amateur astronomers, historians of science, and promoters of women in science, but being written in non-technical language it is intended to be of interest also to educated readers generally.

"Frightening and fun!" –Neil Patrick Harris, New York Times bestselling author
The Magic Misfits Readers will be scared silly in this spooky and hilarious middle grade series starter about a town chock-full of monsters and the kids who must unravel centuries of secrets to save it. Will Hunter thought his life couldn't get any worse: His parents just got divorced, his best (and only) friend now is his dog, Fitz, and his mom moved them from New York City to the middle-of-nowhere town called East Emerson. But Will was wrong—things are about to get way worse. Because East Emerson is filled with a whole lot of monsters, and he's the only person who can see them. When all the town pets (including Fitz) go missing, Will suspects there's something sinister going on. So he joins forces with outcast Ivy and super-smart Linus to uncover the ancient secrets of East Emerson. Besides, nothing bad could happen when three sixth graders team up against monsters, magic, myths, and mad science . . . right?

This book is a guide to scientific communication for students and researchers in psychology and related subjects. It is unique in that it combines under one cover practically everything the reader needs to know to communicate effectively in articles, books, grant proposals, prospectuses, talks, and lectures. The emphasis is on tips and practical advice that social scientists can actually use to improve communication. Robert Sternberg reviews rules for effective prose in a variety of formats, debunks common misconceptions about writing, highlights commonly misused words and gives instruction on the preparation of tables, figures, and bibliographies. For the third edition, the author has added entirely new chapters on 'How to Win Acceptances from Psychology Journals: Twenty-One Tips for Better Writing', 'Writing a Grant or Contract Proposal', 'Writing Book Proposals' and 'Writing a Lecture', and has expanded the chapter on 'References for the Psychology Paper'. He has also updated the volume's references. This book is an essential purchase for all psychologists and aspiring psychologists.

APA 7th Manual Made Easy: Full Concise Guide Simplified for Students Independently Published

It is the best known book about American slavery, and was so incendiary upon its first publication in 1852 that it actually ignited the social flames that led to Civil War less than a decade later. What began as a series of sketches for the Cincinnati abolitionist newspaper *The National Era* scandalized the North, was banned in the South, and ultimately became the bestselling novel of the 19th century. Today, controversy over this melodramatic tale of the dignified slave Tom, the brutal plantation owner Simon Legree, and Stowe's other vividly drawn characters continues, as modern scholars debate the work's newly appreciated feminist undertones and others decry it as the source of enduring stereotypes about African Americans. As one of the most influential books in U.S. history, it deserves to be read by all students of literature and of the American story. American abolitionist and author HARRIET BEECHER STOWE (1811-1896) was born in Connecticut, daughter of a Congregationalist minister and sister to abolitionist theologian Henry Ward Beecher. She wrote more than two dozen books, both fiction and nonfiction.

"This book offers practical guidance for understanding and implementing the American Psychological Association's Journal Article Reporting Standards for Quantitative Research (JARS-Quant) and Meta-Analysis Reporting Standards (MARS). These standards lay out the essential pieces information researchers need to report, including detailed accounts of the methods they followed, data results and analysis, interpretations of their findings, and implications for future research. The book reflects updates to the original JARS and the MARS that meet researchers' developing needs in the behavioral, social, educational, and

medical sciences. It analyzes examples from APA journals, offering readers easy-to-read advice for implementing these revised standards in their own writing while also conforming with the APA Style guidelines laid out in the sixth edition of the Publication Manual. New and expanded chapters offer more detailed guidelines for reporting statistical analyses and unique elements of different types of research, including replication studies, clinical trials, and observational studies. This book is essential reading for experienced and early career researchers alike, as well as undergraduate and graduate students in research methods classes. It presents what JARS recommends for information to include in all reports on new quantitative data collections, and addresses the material that appears first in a research manuscript. It also describes the Method section, presents the JARS standards for reporting basic research designs and covers the general reporting requirements for the statistical results of studies with multiple participants in each condition."--Preface. Flourishing in Emerging Adulthood highlights the third decade of life as a time in which individuals have diverse opportunities for positive development. There is mounting evidence that this time period, at least for a significant majority, is a unique developmental period in which positive development is fostered. Dr. Lene Arnett Jensen highlights the importance of this work in an engaging foreword, and chapters are written by leading scholars in diverse disciplines who address various aspects of flourishing. They discuss multiple aspects of positive development including how young people flourish in key areas of emerging adulthood (e.g., identity, love, work, worldviews), the various unique opportunities afforded to young people to flourish, how flourishing might look different around the world, and how flourishing can occur in the face of challenge. Most chapters are accompanied by first-person essays written by a range of emerging adults who exemplify the aspect of flourishing denoted in that chapter and make note of how choices and experiences have helped them transition to adulthood. Taken together, this innovative collection provides rich evidence and examples of how young people are flourishing as a group and as individuals in a variety of settings and circumstances. This unique resource will be useful to students, faculty, professionals, clinicians, and university personnel who work with young adults or who study development during emerging adulthood.

This book is an indispensable guide to how to write articles, choose journals, and deal with revisions or rejection. Each chapter is written by a highly experienced journal editor - people who have actually made decisions on manuscripts and publication, as well as being eminent in their respective scientific field and written many articles themselves. It showcases parts of articles, discusses journal submission, outlines the resubmission process, and highlights systemic issues. Clear instructions are given on writing an empirical article, literature reviews, titles and abstracts, introductions, theories, hypotheses, methods and data analysis. Each part of the process is laid out from presenting results, to mapping-out a discussion and writing for referees. The integral skills of revising papers and ensuring a high impact are taught in 'article writing 101'. Whilst less intuitive knowledge is provided concerning publishing strategies, references, online submission, review systems, open access and ethical considerations.
