"Reporting standards are guidelines that describe how to communicate findings clearly in journal articles so that readers can access and understand the story of the research endeavor. Recognizing that reporting standards can aid authors in the process of writing and evaluating manuscripts and editors and reviewers in the process of evaluating those manuscripts, the Publications and Communications (P&C) Board of the American Psychological Association (APA) invited two task forces of researchers to develop standards for reporting quantitative and qualitative research in journal articles. The Quantitative Journal Article Reporting Standards Working Group developed standards for quantitative research, and a separate book details those standards. This book

discusses the reporting standards. It permits the space to expand on the ideas in those standards and to articulate the rationale behind each. It articulates decisions one may need to make as an author as one decides how to present their work. It also provides examples to illustrate a strong presentation style, and these can serve as helpful models. It provides the conceptual undergirding for the reporting decisions that authors make during the writing process. The book considers the typical sections of a qualitative research paper—the introductory sections, Method, Results, and Discussion. Guidance is provided for how to best present qualitative research, with rationales and illustrations. The book presents reporting standards for qualitative meta-analyses, which are integrative analyses of findings from across primary qualitative research. The book includes a discussion of objectivist and constructivist rhetorical styles in research reporting."—Preface. (PsycINFO Database Record (c) 2020 APA, all rights reserved).

Create personal best performance at will—and revel in the achievement! If you have ever watched athletes performing at their best, you have witnessed the power of "the Zone"—that state where everything clicks and personal and team bests are the norm. In *The Winner's Way*, Dr. Pam Brill tells readers how they, too, can achieve the Zone of top performance, turning goals—whether in the wide world of sports, work or daily life—into positive, results-driving action. With her 3 A's—activation, attention and attitude—Dr. Brill supercedes previous wisdom by systematically bringing together these three crucial elements to hurdle personal obstacles and finish—again and again—always the winner. Out of her years of research on peak performance in sport and work, coaching to elite athletes and top corporations, and teaching at Dartmouth Medical School, Brill, a psychologist, has put together, and field tested, her unique Winner's Way™ system. The Winner's Way offers readers a proven, user-friendly method to identify, engage, and drive strategic change for continual achievement in the face of never-ending challenge. That racing heart and those white knuckles? They're the result of the chemical deluge that ramps activation to high speed—but without proper 3A alignment, this power within can derail attention and attitude. Tunnel vision is no accident. Negative beliefs about self and potential will always get in the way. Plagued instead by listlessness, wandering attention, an apathetic attitude? These are all due to another chemical reaction—with symptoms readers learn to identify and then re-ramp to their best strengths. Throughout *The Winner's Way*, Dr. Brill provides example after example so readers can adapt, according to their personal make-up, the steps to winning achievement that become second nature. On command, our readers will learn to: Change a poor attitude Pull out of a downspin Use language as an arsenal, fortress, and medic "Debrief" from experiences by identifying what was done well—and what should be done differently next time Examine and challenge habitual assumptions . . . plus deploy strategies for dealing with performance anxiety, fear of rejection, technology overload, and more to help recapture their love for the game of life. *The Winner's Way* is straight forward, makes sense—and it works! Let the game of life begin! On your marks, get set, go!

Most students struggle with learning how to find references, use them effectively, and cite them appropriately in a required format. One of the most common formats is that of APA. The authors all have vast experience teaching writing courses to various levels of students from undergraduates to graduates in other countries. However, there was lacking a book that could explain the basics of APA in simple, easy-to-understand language for non-native speakers of English, who are often unfamiliar with using references and formatting an essay in a particular method. In order to offer English Learner student writers a source of information that is appropriate for their level, and is cost-effective, this updated APA 7th edition guidebook provides students with important information in clear, concise, user-friendly language, as well as to offer practical examples that will help them grasp the concept of secondary research writing. Much of the published materials on the market targets native speakers of English. The problem with this is that they present the nitpicky details of APA in ways that do not make sense to native speakers of English, let alone to those for whom English is not their first language, because the information is presented in very technical terms that are not easy to understand. This handbook presents the same information in simplified terms with images and step-by-step instructions in ways that make sense to both native and non-native English speaking student writers. Additionally, student writers often struggle with understanding the concept of plagiarism, as well as how to find sources, evaluate the appropriateness of sources, and use sources in effective ways (e.g., how to integrate quotes, when to paraphrase, among others). This book provides this important information that is concise and easy to understand. NOTE: This is a REVISED edition of our original *The Concise APA Handbook*, which has been updated for APA 7th edition, which was issued in the fall, 2019.

"This book offers practical guidance for understanding and implementing the American Psychological Association's Journal Article Reporting Standards for Quantitative Research (JARS-Quant) and Meta-Analysis Reporting Standards (MARS). These standards lay out the essential pieces information researchers need to report, including detailed accounts of the methods they followed, data results and analysis, interpretations of their findings, and implications for future research. The book reflects updates to the original JARS and the MARS that meet researchers'

developing needs in the behavioral, social, educational, and medical sciences. It analyzes examples from APA journals, offering readers easy-to-read advice for implementing these revised standards in their own writing while also conforming with the APA Style guidelines laid out in the sixth edition of the Publication Manual. New and expanded chapters offer more detailed guidelines for reporting statistical analyses and unique elements of different types of research, including replication studies, clinical trials, and observational studies. This book is essential reading for experienced and early career researchers alike, as well as undergraduate and graduate students in research methods classes. It presents what JARS recommends for information to include in all reports on new quantitative data collections, and addresses the material that appears first in a research manuscript. It also describes the Method section, presents the JARS standards for reporting basic research designs and covers the general reporting requirements for the statistical results of studies with multiple participants in each condition."--Preface.
