#### SOCIAL PROBLEMS AND DEVELOPMENT ISSUES OF YOUTH

Schaum's Outline Series

Islam has its typical social system and provides a code of

conduct, to be followed by all its adherents.

This conduct is termed as Social Behaviour.

Islam is not only a religion or faith. It's a way of life. Islam appeared on the horizon of the world, as a revolutionary force. It brought a new message for the whole human race. Islam has given the world a new and rich civilization.

Higher Education Through Open and Distance Learning Nirali Prakashan  
Published in association with the Commonwealth of Learning Open and distance learning has expanded dramatically in recent years across the world, across the spectrum of subject areas, and across educational levels. This book takes a detailed look at the state of the art of open and distance learning in higher

education, and presents a fascinating picture of a world and its educational culture in transition. This edited collection contains authoritative analyses of key issues together with current accounts of practice in each region of the world. It includes \*open and distance learning in relation to internationalisation, lifelong learning and flexible learning \*costs of distance education \*the impact of

This book assembles multi-  
disciplinary contributions to  
delve deeper into  
ReThinking Management.  
The first part provides  
some foundational  
considerations and  
inspirations. Further  
chapters offer more  
specific links to the arts  
and creativity sectors as  
well as empirical research  
and case reflections.  
ReThinking Management  
pursues the main idea that  
management theory is not  
merely a sub-discipline of  
economics, but rather a

cross-disciplinary and  
critical field of research and  
practice, with a decidedly  
cultural perspective. While  
questioning the status and  
practices of conventional  
management, the book  
opens up for new  
understandings, turns and  
perspectives.

Social scientists are divided  
into camps of support for  
particular research  
techniques. These disputes  
relate to the historical core  
of social theory (positivism  
and antipositivism;  
structure and agency).  
While very different in

many aspects, both qualitative and quantitative approaches involve a systematic interaction between theory and data. The choice of method often depends largely on what the researcher intends to investigate. For example, a researcher concerned with drawing a statistical generalization across an entire population may administer a survey questionnaire to a representative sample population. There are no laws in social science that parallel the laws in natural science. Law in social science is a universal

generalization about a class of facts. A fact is an observed phenomenon, and observation means it has been seen, heard or otherwise experienced by the researcher. A theory is a systematic explanation for the observations that relate to a particular aspect of social life. Concepts are the basic building blocks of theory and are abstract elements representing classes of phenomena. Axioms or postulates are basic assertions assumed to be true. Propositions are conclusions drawn about the relationships among concepts, based on analysis

of axioms. This book is designed for students at the beginning of their journey in social research. It aims to provide an accessible, practically oriented introduction to social research methods. The research methods included in this book are selected on the basis of their relevance to contemporary social research practice. Contents:

- Survey Methodology
- Multimethodology
- Observational Field Research
- Scientific Methods in Social Work Research
- Critical Action Research in Social Work

MANAGERIAL  
ECONOMICS -- II

When a man receives a promotion and a raise, he finds himself forced to face an uncomfortable situation that he has avoided all his life: visiting a bank and opening a bank account. " My Financial Career " is representative of author Stephen Leacock ' s writing style in which he pokes fun at social absurdities and irrational behaviour. This short story was adapted into a short animated film in

1962, directed by Gerald Potterton. The film won the award for Best Animated Short at the San Francisco International Film Festival that year and was nominated for Best Animated Short at the 36th Academy Awards in 1964.
