A chess grandmaster reveals the powerful teachings this ancient game offers for staying present, thriving in a complex world, and crafting a fulfilling life. Refined and perfected through 1,500 years of human history, chess has long been a touchstone for shrewd tacticians and master strategists. But the game is much more than just warfare in miniature. Chess is also an ever-shifting puzzle to be solved, a narrative to be written, and a task that demands players create their own motivation from moment to moment. In other words, as Grandmaster Jonathan Rowson argues in this kaleidoscopic and inspiring book, there are ways to see all of life reflected in those 64 black and white squares. Taking us inside the psychologically charged world of chess's global elite, Rowson mines the game for its insights into sustaining focus, quieting our inner saboteur, making tough decisions, overcoming failure, and more. He peels back the beguiling logic

of chess to reveal the timeless wisdom underneath.

This exhilarating tour ranges from learning how to love our mistakes to considering why people are like trees; from the mysteries of parenting to the beauty of technical details, to the endgame of death. Throughout, chess emerges as a powerful and accessible metaphor for the thrills and setbacks that fill our daily lives with meaning and beauty.

Growing up, she learned the proper way to eat a guava, the sound of tree frogs in the mango groves at night, the taste of the delectable sausage called morcilla, and the formula for ushering a dead baby's soul to heaven. As she enters school we see the clash, both hilarious and fierce, of Puerto Rican and Yankee culture. When her mother, Mami, a force of nature, takes off to New York with her seven, soon to be eleven children, Esmeralda, the oldest, must learn new rules, a new language, and eventually take on a new identity. In this first volume of her much-praised, bestselling trilogy, Santiago brilliantly recreates the idyllic landscape and tumultuous family life of her earliest years and her tremendous journey from the barrio to Brooklyn, from translating for her mother at the welfare office to high honors at Harvard. The three essays collected in this book offer a succinct introduction to Agamben's recent work through an investigation of Foucault's notion of the apparatus, a meditation on the intimate link of philosophy to friendship, and a reflection on contemporariness, or the singular relation one may have to one's own time. "Apparatus" (dispositif in French) is at once a most ubiquitous and nebulous concept in Foucault's later thought. In a text bearing the same name ("What is a dispositif?") Deleuze managed to contribute its mystification, but Agamben's leading essay illuminates the notion: "I will call an apparatus," he writes, "literally anything that has in some way the capacity to capture, orient, determine, intercept, model, control, or secure the gestures, behaviors, opinions, or discourses of living beings." Seen from this perspective, Agamben's work, like Foucault's, may be described as the identification and investigation of apparatuses, together with incessant

attempts to find new ways to dismantle them. Though philosophy contains the notion of philo, or friend, in its very name, philosophers tend to be very skeptical about friendship. In his second essay, Agamben tries to dispel this skepticism by showing that at the heart of friendship and philosophy, but also at the core of politics, lies the same experience: the shared sensation of being. Guided by the question, "What does it mean to be contemporary?" Agamben begins the third essay with a reading of Nietzsche's philosophy and Mandelstam's poetry, proceeding from these to an exploration of such diverse fields as fashion, neurophysiology, messianism and astrophysics.

On Television exposes the invisible mechanisms of manipulation and censorship that determine what appears on the small screen. Bourdieu shows how the ratings game has transformed journalism - and hence politics - and even such seemingly removed fields as law' science' art' and philosophy. Bourdieu had long been concerned with the role of television in cultural and political life when he bypassed the political and commercial control of the television networks and addressed his country's viewers from the television station of the College de France. On Television' which expands on that lecture' not only describes the limiting and distorting effect of television on journalism and the world of ideas' but offers the blueprint for a counterattack.
