Author Ned Mohan has been a leader in EES education and research for decades. His three-book series on Power Electronics focuses on three essential topics in the power sequence based on applications relevant to this age of sustainable energy such as wind turbines and hybrid electric vehicles. The three topics include power electronics, power systems and electric machines. Key

features in the first Edition build on Mohan's successful MNPERE texts; his systems approach which puts dry technical detail in the context of applications; and substantial pedagogical support including PPT's, video clips, animations, clicker questions and a lab manual. It follows a top-down systems-level approach to power electronics to highlight interrelationships between these sub-fields. It's intended to cover fundamental and practical design. This book also follows a building-block approach to power electronics that allows an in-depth discussion of several important topics that are usually left. Topics are carefully sequenced to maintain continuity and interest.

On Television exposes the invisible mechanisms of manipulation and censorship that determine what appears on the small screen. Bourdieu shows how the ratings game has transformed journalism - and hence politics - and even such seemingly removed fields as law' science' art' and philosophy. Bourdieu had long been concerned with the role of television in cultural and political life when he bypassed the political and commercial control of the television networks and addressed his country's viewers from the television station of the College de France. On Television' which expands on that lecture' not only describes the limiting and distorting effect of television on journalism and the world of ideas' but offers the blueprint for a counterattack.

It's more than a text. It's a program. Success in the language classroom requires so much more than just a text. In any language-learning setting, students require numerous and various opportunities to read, write, hear, and speak. Puntos de partida sets the standard for Spanish-language teaching. An innovative program that has been continuously refined for today's classroom, Puntos delivers proven pedagogy with clear and effective presentations, comprehensive teaching resources, and powerfully adaptive digital tools. Now in its anniversary Tenth Edition, Puntos builds on the holistic, five-skills

approach it pioneered. It's the Puntos you know. It's the Puntos of today. Puntos hallmark features include: Engaging and Immersive Digital Tools: Connect Spanish is the most powerful and flexible course management system available. Rooted in research on effective student learning practices, the platform integrates adaptive learning tools with dynamic, engaging language practice activities. McGraw-Hill's LearnSmart provides each student with a personalized and adaptive learning experience based on individual needs. Connect Spanish also provides the instructor with both the ability and flexibility to pull from the robust set of content available in the platform and craft a unique learning path based on the goals of the course. With Practice Spanish: Study Abroad, the market's first 3-D immersive language game designed exclusively by McGraw-Hill, Puntos brings the language to the students in a fun, engaging, and immersive gaming experience. Students "study abroad" virtually in Colombia where they will create their very own avatar, live with a host family, make new friends, and navigate a variety of real-world scenarios using their quickly developing Spanish language skills. The first and only analytics tool of its kind, Connect Insight is a series of visual data displays—each framed by an intuitive question—to provide instructors at-a-glance information regarding how your class is doing. Connect Insight provides analysis on five key insights, available at a moment's notice from your Connect course. A Comprehensive scope and sequence: The comprehensive scope and sequence allows instructors to choose what to cover throughout the course without having to supplement their own materials to fill gaps present in other texts. Carefully arranged organization: the overall organization carefully progresses from formulaic expressions to vocabulary and grammar relevant to daily life and personal interests (studies, family, home, leisure activities), then goes on to prepare students for survival situations (ordering a meal, traveling), and finally branches out to broader themes (current events, social and environment issues). This forward progress is reinforced by a cyclical structure where vocabulary, grammar, and language functions are continuously reviewed and recycled. Clear and effective vocabulary and grammar presentations: Puntos' approach to vocabulary and grammar focuses on the acquisition of vocabulary during the early stages of language learning and then at the start of each chapter throughout the text. Grammar is introduced in thorough explanations, with careful attention given to skills development rather than grammatical knowledge alone. These explanations are now even more accessible to students, featuring conversational language, increased clarity, additional examples, and organization of complex, dense explanations into manageable chunks of concise grammar summary. Integrated four-skills approach: Puntos carefully sequences activities, moving students from controlled to free-form tasks. In the tenth edition, this overall scaffolding is improved and introduced at the individual activity level. Starting with the very first activity fol

"Marvelous . . . [Vonnegut] wheels out all the complaints about America and makes them seem fresh, funny, outrageous, hateful and lovable."—The New York Times In *Breakfast of Champions*, one of Kurt Vonnegut's most beloved characters, the aging writer Kilgore Trout, finds to his horror that a Midwest car dealer is taking his fiction as truth. What follows is murderously funny satire, as Vonnegut looks at war, sex, racism, success, politics, and pollution in America and reminds us how to see the truth. Many of the classic questions of philosophy have been raised, illuminated, and addressed in celluloid. In this Third Edition of *Philosophy through Film*, Mary M. Litch teams up with a new co-author, Amy Karofsky, to show readers how to watch films with a sharp eye for their philosophical content. Together, the authors help students become familiar with key topics in all of the major areas in Western philosophy and master the techniques of philosophical argumentation. The perfect size and scope for a first course in philosophy, the book assumes

no prior knowledge of philosophy. It is an excellent teaching resource and learning tool, introducing students to key topics and figures in philosophy through thematic chapters, each of which is linked to one or more "focus films" that illustrate a philosophical problem or topic.

Revised and expanded, the Third Edition features: A completely revised chapter on "Relativism," now re-titled "Truth" with coverage of the correspondence theory, the pragmatist theory, and the coherence theory. The addition of four new focus films: Inception, Moon, Gone Baby Gone, God on Trial. Revisions to the General Introduction that include a discussion of critical reasoning. Revisions to the primary readings to better meet the needs of instructors and students, including the addition of three new primary readings: excerpts from Bertrand Russell's *The Problems of Philosophy*, from William James' *Pragmatism: A New Way for Some Old Ways of Thinking*, and from J. L. Mackie's "Evil and Omnipotence". Updates and expansion to the companion website, including a much expanded list of films relevant to the various subfields of philosophy. Films examined in depth include: Hilary and Jackie *The Matrix* *Inception* *Memento* *Moon* *I, Robot* *Minority Report* *Crimes and Misdemeanors* *Gone Baby Gone* *Antz* *Equilibrium* *The Seventh Seal* *God on Trial* *Leaving Las Vegas*

Can scholars generate knowledge and pedagogies that bolster local and global forms of resistance to U.S. imperialism, racial/gender oppression, and the economic violence of capitalist globalization? This book explores what happens when scholars create active engagements between the academy and communities of resistance. In so doing, it suggests a new direction for antiracist and feminist scholarship, rejecting models of academic radicalism that remain unaccountable to grassroots social movements. The authors explore the community and the academy as interlinked sites of struggle. This book provides models and the opportunity for critical reflection for students and faculty as they struggle to align their commitments to social justice with their roles in the academy. At the same time, they explore the tensions and challenges of engaging in such contested work.
