Busilmin. If you can imagine the end of the world, Busilmin is it. Busilmin brings the definition of isolated to life. It is this isolation, this remoteness, that defines existence in the depths of the rainforest. Death is life. Life is death. Survival is the bridge. It is into the heart of this seclusion that Mission Aviation Fellowship chooses to fly; into depths of this need that we conveyed our very young family. Out of this beautiful land that we departed with our much older family, and a lifetime of near-unbelievable memories. This is not about planes. The aircraft are only the scenery for the tale. These are the stories of our years in Papua New Guinea. All families have stories. The backdrop for our narrative is the end of the world, and that brings a unique flavour to these accounts. The Sibilanga pig. The bullet at Aiyura. Crocodiles. Rainbows. Strange food. Places with stranger names. All with one thing in common: unpredictable, unforeseen, unanticipated, unexpected.

The New York Times bestselling author teaches practical strategies for maximizing your chances—no matter how unlikely the crisis. This fast-paced yet level-headed survival guide from the author of *Prepare for Anything* breaks down the odds of facing dozens of scary situations, from the fairly likely (like getting lost in the woods) to the unlikely but terrifying (being hit by an asteroid, attacked by zombies, or other sci-fi-worthy scenarios). It then provides concrete strategies for improving your odds of survival. Each danger is rated with handy graphics that give an-at-a-glance idea of how likely it is to happen, how much you should worry about it, and how possible it is to survive if it happens to you. In the pages that follow, survival expert Tim MacWelch gives step-by-step instructions, tutorials, and hints to help you beat the odds and live to tell the tale.

Alonso Abugattas is more than a fanatical hunter, fisherman, shooter, and mountain climber. The author also possesses a deep, compulsive, and infectious love of the natural world. His writing evokes the pleasures of hunting, fishing, and shooting, as well as the perils of mountain climbing in the Andes during the 1960s. The stories in his book range from vivid eyewitness narratives that involve adventure, travel, personal struggle, and disregard for safety, to Peruvian history, customs, and geography, as well as discussions on ancient Inca civilization. The book is a mesmerizing blend of mountaineering adventure and high-altitude archeological exploration that describes active volcanoes, grave robbers, and Inca mummies. The book recounts the recovery of a mystery woman, presumed dead since 1945, whose body remained undisturbed near the summit of the Misti volcano

until the author, with a team of civilians and Peruvian police, discovered her remains in 1965. It was a stunning recovery that made local and national headlines, but it was just the beginning of this intriguing find that for more than fifty years has continued to haunt the author. His vivid eyewitness accounts include a harrowing encounter of an avalanche on Ampato mountain, snow blindness on Coropuna mountain, eruption of the Ubinas Volcano, and his experience with an inexplicable phenomenon in Mauca Arequipa. In this firsthand account, the author chronicles his excitement, obsession, anxiety, and exhilaration as he prepares for and participates in world-class shooting tournaments in Europe and South America. A riveting account documents all the famous high achievers in the shooting world that he was lucky to meet during his quest to find hunting, fishing, and shooting heaven.

The inclination towards two wheelers is not newer to the world. From the very beginning, two wheelers are recognized as a mark of

triumph, independence and joy. These are considered fast, safe and easy mode of transportation with worthy fuel economy. With the arrival of automation and electronics in two wheelers, the study gained more momentum, which led Two and Three Wheeler Technology to emerge as a new discipline of automobile engineering. The book explains traditional and modern technologies in an easy to understand manner. Various technologies have been explicated with appropriate 2D and 3D diagrams to support learning. Text comprises the state-of-the-art developments in the field of two wheelers. Detailed explanation on the actual assemblies helps the students to cognize the technology systematically. Although the emphasis has been given to the two wheeler technology, considering the requirement of various syllabi, the last chapter is solely dedicated to three wheeler technology. Chapter-end review questions help students in preparing them for examination by self-assessment method. Primarily designed for the undergraduate and diploma students of automobile engineering, the lucid and simple presentation of the book makes it useful for the commoner, who has keen interest in this area. It is a useful guide for a vehicle owner for understanding mechanism and parts, which may help him in maintaining his vehicle at best efficiency.
