This open access book provides original, up-to-date case studies of "ethics dumping" that were largely facilitated by loopholes in the ethics governance of low and middle-income countries. It is instructive even to experienced researchers since it provides a voice to vulnerable populations from the fore mentioned countries. Ensuring the ethical conduct of North-South collaborations in research is a process fraught with difficulties. The background conditions under which such collaborations take place include extreme differentials in available income and power, as well as a past history of colonialism, while differences in culture can add a new layer of complications. In this context, up-to-date case studies of unethical conduct are essential for research ethics training.

An entirely new interpretation of modern American portraiture based on the history of sexual difference. *Hide/Seek: Difference and Desire in American Portraiture*, companion volume to an exhibition of the same name at the National Portrait Gallery, Smithsonian Institution, traces the defining presence of same-sex desire in American portraiture through a seductive selection of more than 140 full-color illustrations, drawings, and portraits from leading American artists. Arcing from the turn of the twentieth century, through the emergence of the modern gay liberation movement in 1969, the tragedies of the AIDS epidemic, and to the present, *Hide/Seek* openly considers what has long been suppressed or tacitly ignored, even by the most progressive sectors of our society: the influence of gay and lesbian artists in creating American modernism. *Hide/Seek* shows how questions of gender and sexual identity dramatically shaped the artistic practices of influential American artists such as Thomas Eakins, Romaine Brooks, Marsden Hartley, Georgia O'Keeffe, Charles Demuth, Jasper Johns, Robert Rauschenberg,

Andrew Wyeth, Andy Warhol, Robert Mapplethorpe, and many more—in addition to artists of more recent works such as Felix Gonzalez-Torres, Glenn Ligon, Catherine Opie, and Cass Bird. The authors argue that despite the late-nineteenth-century definition and legal codification of the "homosexual," in reality, questions of sexuality always remained fluid and continually redefined by artists concerned with the act of portrayal. In particular, gay and lesbian artists—of but not fully in the society they portrayed—occupied a position of influential marginality, from which vantage point they crafted innovative and revolutionary ways of painting portraits. Their resistance to society's attempt to proscribe them forced them to develop new visual vocabularies by which to code, disguise, and thereby express their subjects' identities—and also their own. Bringing together for the first time new scholarship in the history of American sexuality and new research in American portraiture, *Hide/Seek* charts the heretofore hidden impact of gay and lesbian artists on American art and portraiture and creates the basis for the necessary reassessment of the careers of major American artists—both gay and straight—as well as of portraiture itself.

A Publishers Weekly Best Book of the Year for Nonfiction "...an essential and engaging look at recent disability history."—Buzzfeed One of the most influential disability rights activists in US history tells her personal story of fighting for the right to receive an education, have a job,

and just be human. A story of fighting to belong in a world that wasn't built for all of us and of one woman's activism—from the streets of Brooklyn and San Francisco to inside the halls of Washington—Being Heumann recounts Judy Heumann's lifelong battle to achieve respect, acceptance, and inclusion in society. Paralyzed from polio at eighteen months, Judy's struggle for equality began early in life. From fighting to attend grade school after being described as a "fire hazard" to later winning a lawsuit against the New York City school system for denying her a teacher's license because of her paralysis, Judy's actions set a precedent that fundamentally improved rights for disabled people. As a young woman, Judy rolled her wheelchair through the doors of the US Department of Health, Education, and Welfare in San Francisco as a leader of the Section 504 Sit-In, the longest takeover of a governmental building in US history. Working with a community of over 150 disabled activists and allies, Judy successfully pressured the Carter administration to implement protections for disabled peoples' rights, sparking a national movement and leading to the creation of the Americans with Disabilities Act. Candid, intimate, and irreverent, Judy Heumann's memoir about resistance to exclusion invites readers to imagine and make real a world in which we all belong.

State and tribal governments have common purposes: to use public resources effectively and efficiently, to provide comprehensive services to their respective citizens, and to protect the natural environment, all while sustaining healthy economies. Neighboring governments, as a practical matter, share many aspects of their respective economic and social

systems, and are connected through political and legal relationships. Although these mutual interests have created jurisdictional disputes that historically have been solved through litigation, there is an increasing need for cooperation. Public resources are an issue for all governments, and state and tribes can benefit by collaborating and pooling resources to the fullest extent possible.

Amid a flurry of national standards and high-stakes assessments, it's easy to overlook the curiosity and invention that is inherent to science and that should be central to any science lesson plan. Similarly, the connections between what students learn in the classroom and the issues facing our society are often lost in the race to cover the content. This title focuses on how to successfully draw on these problems to illustrate the use and understanding of science for all learners.

Around 1840, the British Hudson Bay Company set up a cattle ranch on the shore of a haunted lake that local tribes called Spa'nu-we. A hunting trail through the Cascade Mountains crossed at Spa'nu-we with another pathway running to Puget Sound from the sleeping volcano Tu'qobu (Tacoma). Both trails became roads and railways that drew settlers to Spa'nu-we's rich prairie and abundant water. Thus began decades of conflict—often armed—with the evolving town of Spanaway caught in regional and national turmoil. Because of its strategic location, Spanaway homesteads were used as temporary military outposts during two wars. Hundreds of family farms were lost forever when they were condemned to form Camp Lewis. Spanaway's resort "on the most beautiful lake in a land of lakes" has drawn controversial rallies, lawsuits, and political battles. Spanaway, still buffeted by political winds, continues today as a regional playground and transportation hub.
