### *TYPE-CERTIFICATE DATA SHEET*

The Pratt & Whitney Canada PW100 aircraft engine family is a series of 1,800 to 5,000 shaft horsepower (1,300 to 3,700 kW) turboprops manufactured by Pratt & Whitney Canada. The engine first entered service in 1984. It dominates its market with 89% of the turboprop regional airliner installed base in 2016, leading GE Aviation and Allison Engine Company. *Pratt & Whitney Canada PW127M Engine Certified to Power ...*

The PW100/PW150 engine family is the benchmark for low fuel consumption on routes of 350 miles or less. That means they consume 25% to 40% less fuel and produce up to 50% fewer CO2 emissions than similar-sized regional jets. Our engines are also biofuel compatible.

**Pratt & Whitney Canada PW100 - Wikipedia**

The PW127H turboprop engine has two centrifugal impellers driven by independent axial turbines, a reverse flow annular combustor and a two-stage power turbine which provides the drive for the reduction gearbox. The engine has two modules: a reduction gearbox module and a turbomachinery module. The modules are joined to form a rigid unit.
