In the context of the world's pressing sustainability challenges this new Report to the Club of Rome presents a novel approach to navigating collaborative change in partnerships between governments, research institutions, corporations and civil society activists. With reference to the 17 Sustainable Development Goals and the Planetary Boundaries it introduces the theory and practice of Collective Stewardship as a management tool that respects the integrity of human and natural systems. Drawing on the work of transdisciplinary scientific scholars and seasoned sustainability practitioners, it shows how transformative change can be built on life's inherent tendency to generate patterns of vitality and resilience. This ground-breaking monograph shows workable pathways to stewarding patterns of aliveness in social and ecological systems at all levels of the global society. As a highly regarded author and expert in collective leadership, Petra Kuenkel inspires academics and practitioners alike to explore new routes towards co-creating responsible futures in the era of the Anthropocene, where the human footprint has begun to change the course of planetary evolution. She invites decision-makers, researchers, planners and social activists to become stewards of systems patterns, enhance their collaborative competencies and guide life-enhancing socio-ecological interaction at scale. The conceptual architecture the author elaborates builds transformation literacy and boils down to a practical guidance for planning and implementing interventions across all sectors of society. It helps bring about change through a deliberate combination of enlivening narratives, empowering metrics, enabling processes, multi-level governance, guiding regulations, and life-supporting innovation. This comprehensive book sets a new direction in the field of sustainability transformations and will become a foundation for planning collective action and achieving impact at scale.

Whether the goal is building a local park or developing disaster response models, collaborative governance is changing the way public agencies at the local, regional, and national levels are working with each other and with key partners in the nonprofit and private sectors. While the academic literature has spawned numerous case studies and context- or policy-specific models for collaboration, the growth of these innovative collaborative governance systems has outpaced the scholarship needed to define it. Collaborative Governance Regimes breaks new conceptual and practical ground by presenting an integrative framework for working across boundaries to solve shared problems, a typology for understanding variations among collaborative governance regimes, and an approach for assessing both process and productivity performance. This book draws on diverse literatures and uses rich case illustrations to inform scholars and practitioners about collaborative governance regimes and to provide guidance for designing, managing, and studying such endeavors in the future. Collaborative Governance Regimes will be of special interest to scholars and researchers in public administration, public policy, and political science who want a framework for theory building, yet the book is also accessible enough for students and practitioners.

How government can forge dynamic public-private partnerships All too often government lacks the skill, the will, and the wallet to meet its missions. Schools fall short of the mark while roads and bridges fall into disrepair. Health care costs too much and delivers too little. Budgets bleed red ink as the cost of services citizens want outstrips the taxes they are willing to pay. Collaborative Governance is the first book to offer solutions by demonstrating how government at every level can engage the private sector to overcome seemingly insurmountable problems and achieve public goals more effectively. John Donahue and Richard Zeckhauser show how the public sector can harness private expertise to bolster productivity, capture information, and augment resources. The authors explain how private engagement in public missions—rightly structured and skillfully managed—is not so much an alternative to government as the way smart government ought to operate. The key is to carefully and strategically grant discretion to private entities, whether for-profit or nonprofit, in ways that simultaneously motivate and empower them to create public value. Drawing on a host of real-world examples—including charter schools, job training, and the resurrection of New York's Central Park—they show how, when, and why collaboration works, and also under what circumstances it doesn't. Collaborative Governance reveals how the collaborative approach can be used to tap the resourcefulness and entrepreneurship of the private sector, and improvise fresh, flexible solutions to today's most pressing public challenges.
