This report from the Select Committee on Modernisation of the House of Commons (HCP 282, session 2007-08, ISBN 9780215521675), focuses on regional accountability. The Governance of Britain Green Paper (Cm. 7170, ISBN 9780101717021) put forward proposals for improved democratic accountability and scrutiny of the delivery of public services in the English regions. The Committee, in this report, has concluded that there is clear evidence of an accountability gap at regional level. Regional Development Agencies (RDAs), although accountable to ministers, still conduct many activities that are not subject to a regular, robust scrutiny, and the Committee believes more should be done to monitor the delivery of services. With this in mind, the Committee recommends the establishment of a system of regional select committees, with one select committee for each of the administrative regions in England, with the exception of London. Further, the Committee recommends that up to two regional grand committee meetings should take place in each session for each of the 8 regions. To avoid an adverse impact on House Members' other commitments,

membership of regional committees should consist of 10 Members in total. This report therefore sets out a desirability of establishing new structures within the House of Commons to improve regional accountability and Parliamentary scrutiny.

condition that is becoming one of the country's fastest growing diseases. More than thirty-five million Americans currently suffer from Hashimoto's—an autoimmune disease that affects the thyroid gland and causes the body to attack its own cells. To alleviate the symptoms of this debilitating condition—including chronic cough, acid reflux, IBS, allergies, chronic pain, hair loss, brain fog, and forgetfulness—patients are often prescribed synthetic hormones that have numerous life-altering side effects. But there is a better way. Diagnosed with Hashimoto's at twenty-seven, pharmacist Dr. Izabella Wentz knows first-hand the effects of the disease, as well as the value—and limitations—of medication. The key to improved health, she argues, involves lifestyle interventions. In Hashimoto's Protocol, she outlines a proven treatment that has helped thousands heal and many others feel better—in as fast as ninety days. Drawing on her own personal experience as well as her work consulting with thousands of patients, Hashimoto's Protocol offers a practical pathway for healing and reversing the autoimmune damage at the root of the disease. The first step is a quick-

start two-week detox that includes foods to eat and inflammatory foods to avoid, advice on supplements to support the liver, and an adrenal recovery plan. Next, readers create a personalized plan with foods, supplements, and other lifestyle interventions tailored to their body's own unique Hashimoto's triggers, which they can identify using self-tests included in the book. Hashimoto's Protocol also features original recipes. Grounded in the latest science, Hashimoto's Protocol is the first book to offer a proven protocol by an acknowledged expert in the field to treat this condition and help sufferers reclaim their lives.
