This comprehensive text and reference book addresses the questions and problems of cultural resources archaeology for undergraduate and graduate students and practicing archaeologists. Neumann, Sanford, and Neumann use their decades of field experience to discuss in great detail the complex processes involved in conducting a cultural resources management (CRM) project. Dealing with everything from law to logistics, archival research to artifact analysis, project proposals to report production, they provide an invaluable sourcebook for archaeologists who do contract archaeology. After introducing the legal and ethical aspects of CRM and stakeholder engagement, the authors describe the processes of designing a proposal and contracting for work, doing background research, conducting assessment, testing, mitigation work (Phase I, II, and III), laboratory analysis, and preparing reports for project sponsors. The volume's emphasis on practical problems, use of extensive examples, and detailed advice on a host of subjects make it an ideal manual for archaeologists and field schools. This revised and expanded third edition of *Practicing Archaeology: A Manual for Cultural Resources Archaeology* updates Federal and state contracting protocols and covers preparing safety plans for occupational hazards, organization of an archaeology laboratory, use of electronic technology and digital media, advice on field and personnel management, and how to make a living doing cultural resources archaeology.

Lex Fullarton takes a closer look at the three pillars of the sustainable development framework known as the Triple Bottom Line (TBL). The concept of the TBL is that for a project to be sustainable it must not simply be profitable in economic terms, but it must also benefit society and enhance the natural environment. In the 21st century, the greatest threat to Earth's natural environment and the population of the planet is the rise of greenhouse gas emissions caused from burning fossil fuel as an energy source. The rise of GHG emissions has resulted in a rise in the ambient air temperature of the Earth's atmosphere and is resulting in a significant change in climatic conditions on Earth. Fullarton scrutinizes the problem of getting industry and governments to understand the significance of creating harmony within the TBL. One of the main problems is that partisan politics tends to fragment the factors of the TBL rather than bring them together. Fullarton takes a strong stand in suggesting that taxation systems, which have traditionally been viewed primarily as a means of raising government finance, can be effectively

applied to influence industrial and consumer attitudes towards transiting away from polluting fossil-fuel energy sources towards non-polluting renewable energy use.

The classic images of Iranian nomads in circulation today and in years past suggest that Western awareness of nomadism is a phenomenon of considerable antiquity. Though nomadism has certainly been a key feature of Iranian history, it has not been in the way most modern archaeologists have envisaged it. Nomadism in Iran recasts our understanding of this "timeless" tradition. Far from constituting a natural adaptation on the Iranian Plateau, nomadism is a comparatively late introduction, which can only be understood within the context of certain political circumstances. Since the early Holocene, most, if not all, agricultural communities in Iran had kept herds of sheep and goat, but the communities themselves were sedentary: only a few of their members were required to move with the herds seasonally. Though the arrival of Iranian speaking groups, attested in written sources beginning in the time of Herodotus, began to change the demography of the plateau, it wasn't until later in the eleventh century that an influx of Turkic speaking Oghuz nomadic groups—"true" nomads of the steppe—began the modification of the demography of the Iranian Plateau that accelerated with the Mongol conquest. The massive, unprecedented violence of this invasion effected the widespread distribution of largely Turkic-speaking nomadic groups across Iran. Thus, what has been interpreted in the past as an enduring pattern of nomadic land use is, by archaeological standards, very recent. Iran's demographic profile since the eleventh century AD, and more particularly in the nineteenth and twentieth century, has been used by some scholars as a proxy for ancient social organization. Nomadism in Iran argues that this modernist perspective distorts the historical reality of the land. Assembling a wealth of material in several languages and disciplines, Nomadism in Iran will be invaluable to archaeologists, anthropologists, and historians of the Middle East and Central Asia.

A Mission for Development tells the remarkable story of faculty from three Utah universities who lived and worked in Iran as part of the Point Four Program. Using the experience of these advisors, the book reexamines the rise and fall of the US-Iranian alliance and explores the roles that American universities played in international development during the Cold War. The Point Four Program sponsored American technical assistance for developing countries during the 1950s—an American Cold War strategy to cultivate friendly governments and economic development in countries purportedly susceptible to Communist influence. Between 1951 and 1964, advisors from Brigham Young University sought to modernize Iranian public education, experts from Utah State University worked to improve agricultural production, and doctors and nurses from the University of Utah helped with the Iranian government's rural health initiatives. In A Mission for Development, author Richard Garlitz offers a critical and clear-eyed assessment of the challenges the Utahns faced and the contributions they made to Iranian development. The book also reexamines the Iranian political crisis of the early 1950s and the overthrow of Prime Minister Mohammad Mossadegh through the eyes of the Utah advisors. A Mission for Development provides rare insight into the university role in international development and will be of interest to historians and policy makers.
