From time immemorial 'the tradition of the campfire has faced that of the pyramid': settled peoples have contemplated nomads with a mixture of fascination and envy, of disdain and fear. English-speaking peoples seem to have had a particular obsession with certain nomadic peoples, stemming often from their own wanderlust and admiration for the unfettered life. John Ure looks at four regions that are rich in nomadic culture: the Arabian peninsula with its Bedouin; the Sahara with its Moors and Tuareg; the mountains of southern Iran with their migratory pastoral tribes; the steppes of Central Asia with their Mongol horsemen and Tartar descendants. He has travelled there with all these peoples and here observes their special characteristics and what he learnt about their

past. But most appealing are his insights into the array of eccentric Britons and Americans who also chose to seek them out, sometimes even to travel with them. Many of them, as he discovered, were often odder than the exotic peoples they sought. Some, like Lady Hester Stanhope and the Hon. Jane Digby, were exiles from 19th-century high society; others were footloose adventurers, like Richard Burton and T. E. Lawrence. There were distinguished literary figures like Vita Sackville-West, Freya Stark and Bruce Chatwin; notable scholars like Gertrude Bell and Owen Lattimore. And others, eternally original characters, about whom little is known: the tetchy Consul Abbot in Persia or the dedicated missionary ladies, Misses Cable and French, deep in the Gobi Desert. Whoever they are, John Ure has found them and brings them all to life here with great skill and humour.

In North Carolina, a home invasion goes horribly wrong, and triggers a series of disastrous knock-on events, beginning with the abduction of a five-year-old girl. Six years later, one of the kidnappers is identified on a routine facial recognition scan at Glasgow Central train station. Relevant authorities are notified, and they race to be the first to capture the fugitive. Zoe Tamsin 's Lambeth Group prepare to make an arrest. Unaware of ruthless forces competing to prevent exposure of a criminal cold case capable of destroying the alliance between Europe and the USA. The stakes are high. The consequences are unthinkable. The options are vanishing.

The Handbook provides a comprehensive statement and reference point for hazard and disaster research, policy making, and practice in an international and multi-disciplinary context. It offers critical reviews and appraisals of current state of the art and future development of conceptual, theoretical and practical approaches as well as empirical knowledge and available tools. Organized into five inter-related sections, this Handbook

contains sixty-five contributions from leading scholars. Section one situates hazards and disasters in their broad political, cultural, economic, and environmental context. Section two contains treatments of potentially damaging natural events/phenomena organized by major earth system. Section three critically reviews progress in responding to disasters including warning, relief and recovery. Section four addresses mitigation of potential loss and prevention of disasters under two sub-headings: governance, advocacy and self-help, and communication and participation. Section five ends with a concluding chapter by the editors. The engaging international contributions reflect upon the politics and policy of how we think about and practice applied hazard research and disaster risk reduction. This Handbook provides a wealth of interdisciplinary information and will appeal to students and practitioners interested in Geography, Environment Studies and Development Studies. Lex Fullarton takes a closer look at the three pillars of the sustainable development framework known as the Triple Bottom Line (TBL). The concept of the TBL is that for a project to be sustainable it must not simply be profitable in economic terms, but it must also benefit society and enhance the natural environment. In the 21st century, the greatest threat to Earth ' s natural environment and the population of the planet is the rise of greenhouse gas emissions caused from burning fossil fuel as an energy source. The rise of GHG emissions has resulted in a rise in the ambient air temperature of the Earth ' s

atmosphere and is resulting in a significant change in climatic conditions on Earth. Fullarton scrutinizes the problem of getting industry and governments to understand the significance of creating harmony within the TBL. One of the main problems is that partisan politics tends to fragment the factors of the TBL rather than bring them together. Fullarton takes a strong stand in suggesting that taxation systems, which have traditionally been viewed primarily as a means of raising government finance, can be effectively applied to influence industrial and consumer attitudes towards transiting away from polluting fossil-fuel energy sources towards non-polluting renewable energy use.
