IUCN's Protected Areas Management Categories, which classify protected areas according to their management objectives, are today accepted as the benchmark for defining,

recording, and classifying protected areas. They are recognized by international bodies such as the United Nations as well as many national governments. As a result, they are increasingly being incorporated into government legislation.

These guidelines provide as much clarity as possible regarding the meaning and application of the Categories. They describe the definition of the Categories and discuss application in particular biomes and management approaches.

The "Ultimate Kabuki Drop Resource" is a must-have for any theatre or stage practitioner looking to add a strong piece of stagecraft to their shows or performances. This book is the definitive reference on the Kabuki Drop. A Kabuki Drop is a stagecraft technique and a release system that drops an open suspended curtain to the floor for a dramatic reveal. Whether you are a director, producer, production manager, dancer, magician, musician, variety artiste, burlesque performer or any other theatrical stage practitioner, a Kabuki drop can be used to add a dramatic wow-moment to your show or act. This book is a comprehensive compilation resource that explores the history, techniques, components, workings and systems of Kabuki Drops. It includes original drawings, ideas and research. Contents include: History of Kabuki Theatre Kabuki Stagecraft & Curtain Drop Evolution of the Kabuki Drop Basic Components of the Kabuki Drop Manual Kabuki Drop Systems Electronic Kabuki Drop Systems: Linear Solenoid Kabuki Drops & Electromagnetic Lock Kabuki Drops Double Kabuki Drop System Build, Buy or Rent Kabuki Drops Glossary References Also detailed is a collection of six designs for simple manual curtain drop methods & designs that can be

adapted to any theatrical performance or special event. The systems explained include the "World's Easiest" Drop, "The Peel" Drop, "The Pull" Drop, "Pin & Loop" Drop, "Pull Back" Drop and "Roll & Drop" Drop. Each Kabuki Drop system includes measurements as well as detailed step-by-step instructions on what you need to get and how to put it together. Even if you do not have a production or technical background, you will be able to understand how to go about making each system through clear descriptions and drawings. All designs can be made easily without a professional workshop or machining although you will need to cut, drill, saw and sew items that are readily available at good hardware stores. The systems are perfect to install in small to medium theatres and options are also given on how to break them down for easy transport and touring shows. The handmade rug industry has gone through a revolution in the last twenty-five years, and no one is better placed to explain how and why than Fritz Langauer and Ernst Swietly, who have been buying, making, collecting and writing about rugs for over fifty years. Rugs are now being made in colours and designs unimagined just a few decades ago. This new book is the only title available that shows how carpet making has changed in all traditional rug making nations as well as demonstrating through images of rugs in interior settings how the style and use of rugs has changed. Carpets carry many unspoken narratives about peoples and places - this new book reveals some of these for the first time thanks to the first-hand experience of the authors in the souks and bazars of the Middle East. AUTHORS: Ernst Anton Swietly grew up in a family that had just one single carpet. It was rolled out only once a year, during the Christmas holidays, and on each 7 January, the carpet was rolled up and hidden

behind a box until next Christmas. Since then, for Ernst, carpets have been a symbol of peaceful, warm, cosy family get-togethers. Later on, Ernst A. Swietly - a journalist for fifty years - travelled the carpet-producing countries of the world discovering the secrets of handmade weaving and their design principles. This is how he met Fritz Langauer, and they realised it was time to write a book on the carpet world of the 21st century. Fritz Langauer is the son of the businessman Friedrich Langauer who, with his cousin, Adolf Böhm, founded Adil Besim OHG immediately after the Second World War. As one of the sons of the two founders, Fritz Langauer joined the company in 1957. With its five branches, a carpet laundry and repair workshop, it developed over the years to become one of the largest department stores in Europe.

SELLING POINTS: * For the first time, a lavishly illustrated book shows how traditional handmade rugs and carpets have become vehicles for contemporary trends and used in interior design and home decoration * The authors' work in journalism and rug production over the last fifty

Business Guide Volume 1 Strategic and Practical Information Random House (UK) Vehicle leasing is one of the most cost-effective ways of solving transportation needs in Canada. Still, it doesn't mean everybody does it right. It took more than 15 years to gather all the information provided in this book. It is a guide that will help anyone to confidently sign and satisfy his/her transportation needs with a lease contract. You will learn to easily understand the numbers. How to sign a contract that gives you peace of mind. How to transfer your lease without affecting your credit. You will learn the right way of leasing a car you can afford without hurting your finances. And many more other tips for your insurance, warranty, saving money and time. This book is divided into three main parts: Vehicle Leasing Basics, Lease Transfer & Takeover, and Car Leasing Statistics in Canada. If you are new to car leasing (or financing) or just want to get rid of all those doubts you may have regarding a vehicle purchase, Part One: Vehicle Leasing Basics, is a must-read. You will learn to understand all the way down from pricing, kilometers (km), term, agreement and all other factors that define a lease contract. You will come to understand these all in a way that won't

make getting your next car a big deal. Simply put, leasing a vehicle will seem like the regular transaction it was always supposed to be. Additionally, you will learn about the coverage products that come along with your car. Those designed to cover the “ unexpected ” and give you peace of mind. Scratches, dents, and damage will always happen because your vehicle (and others) are on the go. It was designed and expected to receive damage, wear, and depreciation. You just need to be prepared for it! Next, in Part Two: Lease Transfer & Takeover, you will learn the perks of one of the most important components of a lease contract: the opportunity to terminate your contract by giving it away to someone else. You will learn about the process, the benefits, and the costs of doing this. Although we can all estimate how long we might need a car, life will always throw surprises at us and our loved ones: a newborn, a new work vehicle, new routes to a new office, downsizing, or any other major life change. After operating the LeaseCosts™ Lease Takeover Marketplace for years, I ’ ve learned so many things that would love to share with you here, from both the buyer and the seller perspective. And Part Three: Car Leasing Statistics in Canada, will give you a lot of new insights on how we

Canadians consume our vehicles. You will also get a look into a deep 15-year study that involves over 23,000 vehicle leasing contracts cross-country that will help you understand things like: - How much Canadians pay per month on average on a car lease. - The average for each specific car make. - The most popular leasing terms by manufacturer. - The average down payment for Volkswagen, Audi, KIA, etc. and how many people make a down payment. - How many people actually take the Wear & Tear coverage [LA1] [JD2] and how it can impact on future unexpected events. - The kind of average payment you should expect for high-end vehicles compared to mass-market ones. - How much you should offer as an incentive if you need to transfer your lease. After finishing all three parts, you will walk away with a solid understanding of how car leasing works in Canada – and I guarantee that you will feel prepared and confident when considering and signing your new car lease. tradition of the campfire has faced that of the pyramid': settled peoples have contemplated nomads with a mixture of fascination and envy, of disdain and fear. English-speaking peoples seem to have had a particular obsession with certain nomadic peoples, stemming often from their own wanderlust and admiration for the unfettered life. John Ure looks at four regions that are rich in nomadic culture: the Arabian peninsula with its Bedouin; the Sahara with its Moors and Tuareg; the mountains of southern Iran with their migratory pastoral tribes; the steppes of Central Asia with their Mongol horsemen and Tartar descendants. He has travelled there with all these peoples and here observes their special characteristics and what he learnt about their past. But most appealing are his insights into the array of eccentric Britons and Americans who also chose to seek them out, sometimes even to travel with them. Many of them, as he discovered, were often odder than the exotic peoples they sought. Some, like Lady Hester Stanhope and the Hon. Jane Digby, were exiles from 19th-century high society; others were footloose

adventurers, like Richard Burton and T. E. Lawrence. There were distinguished literary figures like Vita Sackville-West, Freya Stark and Bruce Chatwin; notable scholars like Gertrude Bell and Owen Lattimore. And others, eternally original characters, about whom little is known: the tetchy Consul Abbot in Persia or the dedicated missionary ladies, Misses Cable and French, deep in the Gobi Desert. Whoever they are, John Ure has found them and brings them all to life here with great skill and humour.

Lex Fullarton takes a closer look at the three pillars of the sustainable development framework known as the Triple Bottom Line (TBL). The concept of the TBL is that for a project to be sustainable it must not simply be profitable in economic terms, but it must also benefit society and enhance the natural environment. In the 21st century, the greatest threat to Earth's natural environment and the population of the planet is the rise of greenhouse gas emissions caused from burning fossil fuel as an

energy source. The rise of GHG emissions has resulted in a rise in the ambient air temperature of the Earth's atmosphere and is resulting in a significant change in climatic conditions on Earth. Fullarton scrutinizes the problem of getting industry and governments to understand the significance of creating harmony within the TBL. One of the main problems is that partisan politics tends to fragment the factors of the TBL rather than bring them together. Fullarton takes a strong stand in suggesting that taxation systems, which have traditionally been viewed primarily as a means of raising government finance, can be effectively applied to influence industrial and consumer attitudes towards transiting away from polluting fossil-fuel energy sources towards non-polluting renewable energy use.

Mark Gasiorowski here examines the cliency relationship that existed between the United States and Iran during the reign of the late shah, Mohammad Reza Pahlavi, and assesses the effects of this relationship

on Iran's domestic politics.
Gasiorowski argues that by
bolstering the shah's
repressive regime in the
1950s and early 1960s, the
U.S.-Iran cliency relationship
indirectly helped bring about
the Iranian revolution.
