From September 2011 to September 2012, Ambassador Nasser Abdulaziz Al-Nasser of Qatar presided over the 66th session of the “ world ’ s parliament ” – the United Nations General Assembly. It was a critical moment in international affairs as the UN responded to a range of global challenges, from the world financial crisis to the Arab Spring. In A Year at the Helm of the General Assembly, Al-Nasser presents a high-level look inside the organization, assessing its strengths and weaknesses, its successes and struggles. He recounts dramatic moments, such as replacing the Libyan delegation, and a tireless schedule of overseas travel, including joint visits with the Secretary-General to Libya and Somalia. His work takes him from major international summits such as the Conference on Sustainable Development in Rio de Janeiro, Brazil (Rio+20) to the European Parliament, which he was the first General Assembly President to address, to academic institutions from Oxford to Moscow to Morocco. Al-Nasser structures the book as he did his 66th session, around four main themes or “ pillars: ” mediation, UN reform, natural disaster prevention and response, and sustainable development. He offers a wide range of recommendations to intergovernmental institutions, to states, to the public sector, and to individuals. Al-Nasser was determined to leave behind a General Assembly that the people of the world could look up to and depend on. This volume is a testament to all that he accomplished in that regard, and a unique resource for those interested in knowing more about the world ’ s most representative body at a crucial moment in history.

Trade in goods and services has historically resisted territorial confinement, but trademark protection remains territorial, albeit within an increasingly important framework of multilateral treaties. Trademark law therefore demands that practitioners, policy-makers and academics understand principles of international and comparative law. This handbook assists in that endeavour, with chapters describing and critically analyzing international and regional frameworks, and providing comparative perspectives on the substantive issues in trademark law and related fields, such as geographic indications, advertising law, and domain names. Chapters contrast common law and civil law approaches while focusing on the US and EU trademark systems in light of the role these systems have played in the development of trademark laws. Additionally, this handbook covers other jurisdictions, both common law and civil law, on the Asia-Pacific, African, and South American continents. This work should be read by anyone seeking a better understanding of trademark law around the world.

Since 2012, ceasefires have been used in Syria to halt violence and facilitate peace agreements. However, in this book, Marika Sosnowski argues that a ceasefire is rarely ever just a 'cease fire'. Instead, she demonstrates that ceasefires are not only military tactics but are also tools of wartime order and statebuilding. Bringing together rare primary documents and first-hand interviews with over eighty Syrians and other experts, Sosnowski offers original insights into the most critical conflict of our time, the Syrian civil war. From rebel governance to citizen and property rights, humanitarian access to economic networks, ceasefires have a range of heretofore underexamined impacts. Using the most prominent ceasefires of the war as case studies, Sosnowski demonstrates the diverse consequences of ceasefires and provides a fuller, more nuanced portrait of their role in conflict resolution.

This book develops the idea that since decolonisation, regional patterns of security have become more prominent in international politics. The authors combine an operational theory of regional security with an empirical application across the whole of the international system. Individual chapters cover Africa, the Balkans, CIS Europe, East Asia, EU Europe, the Middle East, North America, South America, and South Asia. The main focus is on the post-Cold War period, but the history of each regional security complex is traced back to its beginnings. By relating the regional dynamics of security to current debates about the global power structure, the authors unfold a distinctive interpretation of post-Cold War international security, avoiding both the extreme oversimplifications of the unipolar view, and the extreme deterritorialisations of many globalist visions of a new world disorder. Their framework brings out the radical diversity of security dynamics in different parts of the world.
