[Class 7 - Programming in QBASIC - Cyber Square](#)

A QBasic program consists of various elements. They are a character set, constants, variables, statements, operators and expressions. A QBasic statement is a command or set of instructions to perform a certain task. Certain statements used in QBasic- CLS, INPUT, PRINT, END and REM. QBasic editor is the window where QBasic programs are written ...

Sample Programs - QB64

Its output is executable QBasic code that you just paste in your program. For example, the spraypaint tool colors random pixels within some distance of the cursor; for every pixel it draws it writes a PSET statement to the output file.

QBASIC By Examples - Blogger

As the word indicates, a "command" instructs

the QBasic interpreter to perform some instructions. We also have a command to print on the output screen. Using PRINT command we can instruct the QBasic interpreter to print something to the screen. In this case, the interpreter printed "Hello World!" Example – PRINT 512 (or?512)

QBASIC stands for "Quick Beginners All-Purpose Symbolic Instruction Code". QBASIC was developed by Microsoft Corporation in the year 1991. It is considered to be one of the most easy-to-understand programming languages for beginners. It is suitable for both mathematical and business problem solving and it has been adopted by most of the microcomputers.
