Reviews of the first two editions:

"extraordinarily rich in ideas...an essential buy." - TES "an excellent, clearly written work which is full of practical advice, and presented in an easily readable manner. This book is a highly recommended read. Do buy it and see."
- Support for Learning "has proved especially influential at practitioner level ... never failing

to offer a balanced assessment." - British Journalchildren who, for whatever reason, are not of Special Education "I have a comprehensive library of books on special educational needs but I use this one more than any other because I find it readable, practical and accessible. It is a useful and informative book both to read cover to cover and to dip into. Although it is based on sound theoretical knowledge, it is clear that Jean Gross is writing from her own experience as a teacher and SEN practitioner."
- TES Recent legislation and cutbacks to central support services mean that the responsibility for meeting special educational needs is resting ever more squarely on the shoulders of ordinary classroom teachers. Yet few feel wholly confident in their ability to adapt work within the national curriculum to meet the whole range of needs, or coordinate successful individual education plans for learning as well as they might. This book will increase that confidence. Aimed at busy class teachers, special needs coordinators, heads and teachers in training, it shows how the teacher can build differentiation into planning lessons and schemes of work. It describes workable strategies for managing the most common behaviour difficulties and meeting special needs in language, literacy and mathematics. At a whole school level, it offers practical guidance on reviewing special needs policies, assessment, record keeping, and the management of roles and resources. The focus is on the way in which schools can do a good job in meeting special needs themselves, within the everyday constraints of time, money and energy, and in so doing provide genuinely inclusive opportunities for all children. This edition has

been comprehensively updated and rewritten to cover the revised SEN Code of Practice and related legislation, new directions in inclusion and all the major curriculum initiatives now in place in primary schools.

Still the biggest concern for many on initial teacher training courses is the acquisition of subject knowledge and the ability to translate that into effective teaching. This book addresses this - building on the core subject knowledge covered in the Achieving QTS series and relating it to classroom practice. It supports trainees in extending and deepening their knowledge of Maths and demonstrating how to apply it to planning and implementing lessons. Practical and up-to-date teaching examples are used to clearly contextualize subject knowledge. A clear focus on classroom practice helps trainees to build confidence and develop their own teaching strategies.

Performance Management Letts and Lonsdale

Issues in Science Teaching covers a wide range of important issues which will interest teachers at all phases in the education system. The issues discussed include: the nature and purposes of science education in a multicultural society, including the idea of science for all the role and purposes of investigational work in science education assessment, curriculum progression and pupil attitudes to their science experience supporting basic skills development in literacy, numeracy and ICT, through science teaching supporting cross-curricular work through science teaching taking account of individual differences including ability, special needs, learning style and the case for inclusion The articles are strongly based on current research and are intended to

stimulate and broaden debate among the readers. Written by practising science educators and teachers, this book offers new and interesting ways of developing science education at all levels.

Improving Pupil Motivation Together Routledge

"The case studies in this book show that learning mentors are indispensable to supporting school improvement. Thirty five studies of best practice illustrate the day to day experience of learning mentors and how they improve children's learning, participation, personal development and well-being. They are contextualised within theories of child development, learning and notions of educational equality and take account of school management and multi-agency working." "This is the first book on learning mentors to present case studies and offer such detailed guidance for good practice, and it will be indispensable in both primary and

secondary schools."--BOOK

Improving Pupils Motivation

Together provides a refreshing and much-needed focus on how motivation can be enhanced by teachers and teaching assistants working both individually and collaboratively. Written in an accessible and engaging manner, the book explores various theories of motivation from a range of perspectives, applying academic theory to real life classroom situations. Using a combination of case studies and empirical research, this book demonstrates how teachers and TAs can successfully enhance the

motivation of their students through collaborative practice. Improving Pupils Motivation Together starts by introducing theories of learning and motivation and goes on to offer insight in areas including:

Collaboration and ways to collaborate; Motivation and giftedness; Assessment for Learning; Learning goals and learning objectives; Common pupil responses; Research in Action.

Improving Pupils Motivation Together is an ideal resource for both teachers and teaching assistants working with pupils who are difficult to motivate and who find learning challenging. Further, this book will be highly useful for teachers managing their support staff, and for trainee teachers looking to develop their skills in motivating and engaging pupils.

Enhancing Personal, Social and Health Education offers an accessible and thought-provoking approach to developing effective practice in PSHE. The book uses case study examples to

offer insights and reflections that will support practitioners developing work in their own schools. The authors begin by examining the national PSHE framework and guidelines, outlining the essential ingredients of effective practice.

Subsequent chapters provide case study examples of PSHE practice in primary and secondary schools and broader whole school initiatives. The book offers many useful ideas for planning and teaching PSHE, but also raises fundamental questions about policy at national and local levels, and the extent to which current guidance is helpful and supportive. It will be essential reading for all teachers committed to nurturing the personal and social development of their students.

Assessment Routledge

Assessing the effects of New Labour's education policies on primary schools, this book discusses the impact of policies on primary school practices, as well as looking at the views and experiences of primary school teachers and pupils.

The Whisperers and the Maths Fairy Heinemann

This book provides an introduction to what it means to be numerate, and how numeracy can best be developed and

nurtured in children and in adults. It also presents a cohesive coverage of numeracy development from early childhood to adulthood. This book draws on international research and practice to provide a comprehensive overview on the topic. It depicts and draws connections with the National Curriculum in the United Kingdom, the Australian Curriculum, and the Common Core State Standards in the United States. This book identifies skills and concepts involved in achieving functional numeracy, and provides practical advice on effective teaching, learning and assessment. It serves as a valuable guide to educators who teach mathematics in primary and secondary schools, but who are not specifically trained in the subject.

A Practical Guide Multilingual Matters

The activities in this book are designed both to help children to learn and to understand math concepts, and also to prepare them for taking SATS papers at KS2.

There is plenty of research evidence to suggest that children are helped in their understanding of math problems if teachers focus on common misconceptions, and if children are given opportunities for discussion and explanation of their own understanding. Children can also feel stigmatized by being made to focus on their own errors. Mike Spooner has developed activities that present already completed

work which children then assess, correct and discuss - in this way they can analyze mistakes without damage to their own self-esteem. The activities are presented in the same format as the SATS papers, to give children practice in coping with that format. The book also contains writing frames that children can use to structure their discussions of math problems.

Educational Assessment, Evaluation and Research Letts and Lonsdale

The world of teacher research is rapidly changing following the introduction of Best Practice Research Scholarships. This was announced by the DfEE as part of a new Professional Development Plan in which teachers are to be allocated up to £3000 to do their own research (non-award bearing) with the support of an HE mentor. The TTA also believes that teachers should play a more active role in conceiving, implementing, evaluating and disseminating research. This book is for teachers who are looking, or being

encouraged, to undertake research in their schools. Written by teachers and their HE research mentors, the book provides case studies which show teachers how to 'do' and 'use' research and how to 'do' effective pedagogy. Olwen MacNamara shows how a group of teachers set out to observe, describe, analyse and intervene in areas of primary education. The book can be raided for insights into research methods as well detailing professional issues about teaching and learning, and will be essential reading for teachers undertaking Best Practice Research Scholarships.

Modern Educational Myths SAGE

Providing practical guidance on enhancing learning through ICT in science, this book is made up of a series of projects that supplement, augment and extend the QCA ICT scheme and provide much-needed links with Units in other subjects ' schemes of work. If you thought reading Gervaise Phinn was like drinking a warm cup of tea this book will knock you over with the force of a vodka slammer. Mr Read survives the nightmare of planning, Ofsted and an incompetent head ... He also takes the class to Ireland, the House of Commons and wins a film award. We guarantee Christmas Lights, The School Trip and Stressbusters will make you laugh out loud. A searing indictment of our joyless, exam ridden primary curriculum... 'it will take a bareknuckle fight to save its soul.' Down-to-earth and outrageously funny, this guide will prove essential reading for all teachers everywhere.
