Quantitative chemical ...

Qualitative chemical analysis, branch of chemistry that deals with the identification of elements or grouping of elements present in a sample. The techniques employed in qualitative analysis vary in complexity, depending on the nature of the

sample. In some cases it is necessary only to verify the presence of certain elements or groups for which specific tests applicable directly to the sample ...

The bubbling was due to the production of CO₂. The test of vinegar with potassium carbonate is one type of quantitative analysis —the determination of the amount or concentration of a

substance in a sample. In the analysis of vinegar, the concentration of the solute (acetic acid) was determined from the amount of reactant that combined with the solute present in a known volume of the solution.
