Are the nation's ports adequate for our present and future needs? This volume points out that no significant new deep-water construction has occurred for a decade, and provides the information and analysis needed to goad the ports and the federal government into action. The book asks three questions: Is additional port construction and maintenance dredging needed now or over the next 20 years? What would prevent dredging if it is needed? What alternatives could make additional dredging possible? The book identifies several problems in dredging ports, including the long interval between a decision to deepen a port and the time the alterations are complete. The United States needs to speed port construction to meet changing needs, and the committee recommends that we prepare for future needs by dredging now.

The Vikings called North America "Vinland," the land of wine. Giovanni de Verrazzano, the Italian explorer who first described the grapes of the New World, was sure that "they would yield excellent wines." And when the English settlers found grapes growing so thickly that they covered the ground down to the very seashore, they concluded that "in all the world the like abundance is not to be found." Thus, from the very beginning the promise of America was, in part, the alluring promise of wine. How that promise was repeatedly baffled, how its realization was gradually begun, and how at last it has been triumphantly fulfilled is the story told in this book. It is a story that touches on nearly every section of the United States and includes the whole range of American society from the founders to the latest immigrants. Germans in Pennsylvania, Swiss in Georgia, Minorcans in Florida, Italians in Arkansas, French in Kansas, Chinese in California—all contributed to the domestication of Bacchus in the New World. So too did innumerable individuals, institutions, and organizations. Prominent politicians, obscure farmers, eager amateurs, sober scientists: these and all the other kinds and conditions of American men and women figure in the story. The history of wine in America is, in many ways, the history of American origins and of American enterprise in microcosm. While much of that history has been lost to sight, especially after Prohibition, the recovery of the record has been the goal of many

investigators over the years, and the results are here brought together for the first time. In print in its entirety for the first time, *A History of Wine in America* is the most comprehensive account of winemaking in the United States, from the Norse discovery of native grapes in 1001 A.D., through Prohibition, and up to the present expansion of winemaking in every state. *A Standard History of Ross County, Ohio* Simon and Schuster

Read about: Pioneers who overcame racial barriers, such as Oscar De Priest of Illinois, the first African American elected to Congress in the 20th century, and Shirley Chisholm of New York, the first black Congresswoman. If You're in a Dogfight, Become a Cat! Government Printing Office

Scholar Jeffrey J. Kripal explores the life and teachings of Ramakrishna Paramahansa, a 19th-century Bengali saint who played a major role in the creation of modern Hinduism. The work is now marked by both critical acclaim and cross-cultural controversy. In a substantial new Preface to this second edition, Kripal answers his critics and addresses the controversy.

**The Content Trap** University of Chicago Press  
Businesses often find themselves trapped in a competitive dogfight, scratching and clawing for market share with products consumers view as largely undifferentiated. Conventional wisdom suggests that dogfights are to be expected as marketplaces mature, giving rise to the notion that there are "bad" industries where it is unlikely that any company can succeed. But there are notable exceptions in which enlightened executives have changed the rules to grasp the holy grail of business: long-term profitable growth. Rather than joining the dogfights raging within their industry, companies such as Apple, FedEx, and Starbucks have chosen to become metaphorical cats, continuously renewing their distinctive strategies to compete on their own terms. In *If You're in a Dogfight, Become a Cat*, Leonard Sherman draws on four decades of experience in management consulting, venture capital, and teaching business strategy at Columbia Business School to share practical advice on two of the most vexing issues facing business executives: why is it so hard to achieve long-term profitable growth, and what can companies do to break away from the pack? Sherman takes the reader on a provocative journey through the building blocks of business strategy by challenging conventional wisdom on a number of questions that will redefine management

best practices: What should be the overarching purpose of your business? Do you really know what your strategy is? Is there such a thing as a bad industry? Where do great ideas come from and how do I find them? What makes products meaningfully different? What makes and breaks great brands? How and when should I disrupt my own company? What are the imperatives to achieving long-term profitable growth? Filled with dozens of illustrative examples of inspiring successes and dispiriting falls from grace, this book provides deep insights on how to become the cat in a dogfight, whether you are a CEO, mid-level manager, aspiring business school student, or curious observer interested in achieving sustained profitable growth.

Considered a wonder of the ancient world, the Newark Earthworks—the gigantic geometrical mounds of earth built nearly two thousand years ago in the Ohio valley--have been a focal point for archaeologists and surveyors, researchers and scholars for almost two centuries. In their prime one of the premier pilgrimage destinations in North America, these monuments are believed to have been ceremonial centers used by ancestors of Native Americans, called the "Hopewell culture," as social gathering places, religious shrines, pilgrimage sites, and astronomical observatories. Yet much of this territory has been destroyed by the city of Newark, and the site currently "hosts" a private golf course, making it largely inaccessible to the public. The first book-length volume devoted to the site, *The Newark Earthworks* reveals the magnitude and the geometric precision of what remains of the earthworks and the site's undeniable importance to our history. Including contributions from archaeologists, historians, cultural geographers, and cartographers, as well as scholars in religious studies, legal studies, indigenous studies, and preservation studies, the book follows an interdisciplinary approach to shine light on the Newark Earthworks and argues compellingly for its designation as a World Heritage Site.

Water has had an immeasurable impact on the history and growth of the United States. As an essential element of life water has been and remains a constant source of conflict and controversy as different constituencies fight for limited resources. The *Encyclopedia of Water Politics and Policy* in the United States is the most comprehensive reference source available that analyzes water-related issues in America. A diverse group of over 100 scholars have provided their research and analysis of why water is so significant by tracing its impact on issues like national and state boundaries, western migration, urbanization, and the economy. This volume chronicles the origins of present-day water problems, political conflicts, the impact of legislation and court decisions on the use of water resources, the major projects undertaken across the country, and what experts are proposing be done to preserve this basic component of the environment. Going back some 150 years, the *Encyclopedia* provides an overview of approximately 280 pieces of water-related legislation, legal cases, people, projects, and organizations that have shaped the history of the United States. In addition to historical coverage, the volume also addresses many current environmental issues including acid rain, agriculture, climate change, mining, erosion, levees and dams, pollution, urbanization, and wastewater treatment. The volume's A to Z entries are divided into four sections: Regional Water Politics and Policy: Essays providing a narrative background and overview Major Issues in Water Politics and Policy: A comprehensive list of issues from colonial times to the present Law and Government: The people and legislation that have shaped water policy in the United States Places and Projects: Extensive coverage of the projects (including dams and aqueducts) the government has undertaken to develop the nation's waterways Throughout the volume, concise text features highlight important events, advocacy groups, people, books, and sites important to water politics and policy. A thematic table of contents allows users to easily locate reclamation projects geographically, biographies of important figures, current issues by subject area, government agencies,

Jamboree! To many country music fans the word conjures up memories of Saturday nights around the family radio listening to live broadcasts from that haven of hillbilly music, West Virginia. From 1926 through the 1950s, as Ivan Tribe shows in his lively history, country music radio programming made the Mountain State a mecca for country singers and instrumentalists from all over America. Wilma Lee and Stoney Cooper, Little Jimmy Dickens, Hawkshaw Hawkins, Red Sovine, Blaine Smith, Curly Ray Cline, Grandpa Jones, Cowboy Loyce, Rex and Eleanor Parker, Lee Moore, Buddy Starcher, Doc and Chickie Williams, and Molly O'Day were among the many who came to prominence via West Virginia radio. Wheeling's "WWVA jamboree," first broadcast in 1933, attracted a wide audience, especially after 1942, when the station increased its power. The show's success spawned numerous competitors, as new stations all over West Virginia followed WWVA's lead in headlining country music. The state also played an important role in the early recording industry. The Tweedy Brothers, Frank Hutchison, Roy Harvey, Blind Alfred Reed, Frank Welling and John McGhee, Cap and Andy, and the Kessinger Brothers were among West Virginians whose waxings contributed to the state's reputation for fine native musicianship. So too did those who sought out and recorded the Mountaineer folksong heritage. As Nashville's dominance has grown since the 1960s, West Virginia's leadership in country music has lessened. Young performers must now seek fame outside their native state. But, as Ivan Tribe demonstrates, the state's numerous outdoor festivals continue to keep alive the heritage of country music's "mountain mama."

Libraries today are more important than ever. More than just book repositories, libraries can become bulwarks against some of the most crucial challenges of our age: unequal access to education, jobs, and information. In BiblioTech, educator and technology expert John Palfrey argues that anyone seeking to participate in the 21st century needs to understand how to find and use the vast stores of information available online. And libraries, which play a crucial role in making these skills and information available, are at risk. In order to survive our rapidly modernizing world and dwindling government funding, libraries must make the transition to a digital future as soon as possible -- by digitizing print material and ensuring that born-digital material is publicly available online. Not all of these changes will be easy for libraries to implement. But as Palfrey boldly argues, these modifications are vital if we hope to save libraries and, through them, the American democratic ideal.

Mart Stores Harvard Business School Professor of Strategy Bharat Anand presents an incisive new approach to digital transformation that favors fostering connectivity over focusing exclusively on content. NAMED ONE OF THE BEST BOOKS OF THE YEAR BY BLOOMBERG Companies everywhere face two major challenges today: getting noticed and getting paid. To confront these obstacles, Bharat Anand examines a range of businesses around the world, from The New York Times to The Economist, from Chinese Internet giant Tencent to Scandinavian digital trailblazer Schibsted, and from talent management to the future of education. Drawing on these stories and on the latest research in economics, strategy, and marketing, this refreshingly engaging book reveals important lessons, smashes celebrated myths, and reorients strategy. Success for flourishing companies comes not from making the best content but from recognizing how content enables customers' connectivity; it comes not from protecting the value of content at all costs but from unearthing related opportunities close by; and it comes not from mimicking competitors' best practices but from seeing choices as part of a connected whole. Digital change means that everyone today can reach and interact with others directly: We are all in the content business. But that comes with risks that Bharat Anand teaches us how to recognize and navigate. Filled with conversations with key players and in-depth dispatches from the front lines of digital change, The Content Trap is an essential new playbook for navigating the turbulent waters in which we find ourselves. Praise for The Content Trap "A masterful and thought-provoking book that has reshaped my understanding of content in the digital landscape." —Ariel Emanuel, co-CEO, WME | IMG "The Content Trap is a book filled with stories of businesses, from music companies to magazine publishers, that missed connections and could never escape the narrow views that had brought them past success. But it is also filled with stories of those who made strategic choices to strengthen the links between content and returns in their new master plans. . . . The book is a call to clear thinking and reassessing why things are the way they are." —The Wall Street Journal
