School Leadership - International Perspectives W. W. Norton & Company

For many children much of the time their experience in classrooms can be rather dull, and yet the world the school is supposed to initiate children into is full of wonder. This book offers a rich understanding of the nature and roles of wonder in general and provides multiple suggestions for to how to revive wonder in adults (teachers and curriculum makers) and how to keep it alive in children. Its aim is to show that adequate education needs to take seriously the task of evoking wonder about the content of the curriculum and to show how this can routinely be done in everyday classrooms. The authors do not wax flowery; they present strong arguments based on either research or precisely described experience, and demonstrate how this argument can be seen to work itself out in daily practice. The emphasis is not on ways of evoking wonder that might require virtuoso teaching, but rather on how wonder can be evoked about the everyday features of the math or science or social studies curriculum in regular classrooms.

Tap Into Greatness Oxford University Press

At some point, every single one of us has reached a point of frustration. A situation where we knew that we were having impact that was far less than what we were capable of. Large organizations are filled with smart people who have great ideas. Unfortunately, most of these people find themselves stymied in their ability to bring people to their full potential and ideas to fruition It doesn't have to be that way. In Tap Into Greatness, noted performance coach and educator Sarah Singer-Nourie reveals the key truths of having outsized impact, influence and power. It turns out that most of us aren't leading. We're simply managing. We're getting things done, but we're not inspiring others to

excel beyond what's expected. Great leaders know better. They know leadership isn't magic. It's not just something you're born with. Leadership is learnable. In this engaging and hands-on book, Singer-Nourie provides tools that have been developed over the last twenty years in her work with leaders and teams in corporate America, Silicon Valley startups, schools and non-profit organizations. The methodology is based on how people actually learn, rather than how most of us were taught in school. It leverages the insights of human motivation and the latest research in neuroscience to give leaders a roadmap for having impact. Readers who put the tools of Tap Into Greatness into practice have immediate and often surprising results. They find themselves able to influence colleagues who were previously unmoved. They're able to inspire teammates to go above and beyond the call of duty. And they create teams that make better decisions even when the leader isn't in the room.

Catholic Higher Education critiques the secularization thesis, explores the role of bishops, theologians, dissent, the *sensus fidelium*, the role of women and freedom of conscience, the relationship between theology and religious studies, hiring practices and curricular designs. Using the image of the "open circle," Heft advances a vision of the catholic university that is neither a "closed circle" of only Catholics nor a "market place of ideas with no distinctive mission." His "open circle" is one that fosters the Catholic intellectual tradition by including scholars of many religions, rooting Catholic social thought in Catholic doctrine, defending academic freedom and the mandatum.
