Despite the reversal of America's fortune from the triumphalism of the Roaring Nineties to the gloom of the lost decade and the Great Depression, theoretical

conceptions of US capitalism have remained surprisingly unchanged. In fact, if the crisis questioned the sustainability of the US capitalist paradigm, it did not fundamentally challenge academic theorization of American political economy. This book departs from the American political economy literature to identify three common myths that have shaped our conceptualization of US capitalism: its reduction to a state-market dyad dis-embedded from societal factors; the illusion of a weak state and the synchronic conception of the US variety of capitalism. To remedy these pitfalls, the authors propose a civilizational approach to American political economy at the crossroads between cultural studies, history, sociology and political science. Drawing together contributions from a rich variety of fields (from geography to cultural studies, political science and sociology) this work sheds a new light on America's "cultural political economy" combining theoretical reflection with empirical data and offering innovative perspectives on the crisis and renewal of American capitalism.

Troubled Transit considers the situation of asylum seekers stuck in limbo in Indonesia from a number of perspectives. It presents not only the narratives of many transit migrants but also the perceptions of Indonesian authorities and of representatives of international and non-government organizations responsible for the care of transiting asylum seekers. Fascinated by the extraordinary and seemingly limitless resilience shown by asylum seekers during their often lengthy and dangerous journeys, the author highlights one particular fragment of their journeys — their time in Indonesia, which many expect to be the last stepping stone to a new life. While they long for their new life to unfold, most asylum seekers become embroiled in the complexities of living in transit. Indonesia, a vast archipelago of more than 17,000 islands, is more than a location where people spend time waiting; it is a nation state that interacts with transiting asylum seekers and formulates policies that have a profound impact on their experience in transit there. Troubled Transit tries to explain the complexities faced by the transiting migrants within the context of the Indonesian government and its political challenges, including its relationship with Australia. The Australia-centric view of recent asylum seeker issues has tended to ignore the larger socio-political context of the migratory routes and the perspectives of transit states towards asylum seekers stuck in transit. This book hopes to direct the Australia-centric gaze northwards to take Indonesian policies and policymaking into account, thereby giving Indonesia more relevance as a transit country and as an important partner in regional protection schemes and migration management. Even though some Indonesian policies and practices are less than favourable for asylum seekers, and

---

even reprehensible from a human rights perspective, more attention must be paid to ongoing developments that impact on transiting asylum seekers in Indonesia if any of the hardships they suffer there are to be alleviated.

**The Crisis and Renewal of U.S. Capitalism** Routledge

The success of counterterrorism finance strategies in reducing terrorist access to official currencies has raised concerns that terrorist organizations might increase their use of such digital cryptocurrencies as Bitcoin to support their activities. RAND researchers thus consider the needs of terrorist groups and the advantages and disadvantages of the cryptocurrency technologies available to them.
