South Africa's Changing Face of Power Routledge

This book focuses on the two

intra-regional initiatives created for the development and integration of energy markets: the Energy Community and MedReg. The Energy Community and MedReg, apart from their common strategic role in providing a much-needed stable regulatory environment for energy markets in their respective reference countries, represent examples of a diverse development of regional energy initiatives. The former is initiated by external factors and is an example of a top-down approach, whereas the latter is a voluntary bottom-up initiative of the countries involved. The way the institutional framework is built is not without consequences on the functioning and organization of the two regional

---

initiatives. The book assesses these different approaches and their consequences in the framework of the development of the Energy Community and MedReg, with particular reference to their impact on regional integration, energy policy and institutional change. The analysis is enriched with several case studies on the role of independent regulatory agencies, the promotion of renewable energy sources, infrastructure and interconnection development across the Mediterranean basin and the implications of exporting the EU institutional

model. This book is aimed at policy makers, institutions, energy companies and academics to provide a better understanding of the economic and institutional eco-system that characterize the Mediterranean area. **Global and Asian Perspectives on International Migration Springer Nature** UPSC is considered to be the most prestigious and toughest examination in the country. CONTINENTAL  
DEVELOPMENT PLAN

Routledge

As economic crises, growing inequality and climate change prompt a global debate on the

---

meaning and trajectory of development, increasing attention is focusing on 'social and solidarity economy' as a distinctive approach to sustainable and rights-based development. While we are beginning to understand what social and solidarity economy is, what it promises and how it differs from 'business as usual', we know far less about whether it can really move beyond its fringe status in many countries and regions. Under what conditions can social and solidarity economy scale up and scale out - that is, expand in terms of the growth of social and solidarity economy organizations and enterprises, or spread horizontally within given territories? Bringing together leading

researchers, blending theoretical and empirical analysis, and drawing on experiences and case studies from multiple countries and regions, this volume addresses these questions. In so doing, it aims to inform a broad constituency of development actors, including scholars, practitioners, activists and policy makers.

outs and could hinder bank resolution in future financial crises. In this book, Johan A. Lybeck uses case studies from Europe and the United States to examine and grade a number of bank resolutions in the last financial crisis and establish which were successful, which failed, and why. Using in-depth analysis of recent legislation, he explains how a bank resolution can be successful, and emphasizes the need for taxpayer-funded bail-outs to create a viable banking system that will promote economic

This book is the first comprehensive assessment of the state of low-carbon investments in Asia, analyzing the rationales, mandates and public – private financing activities. Based on the experiences of several regional initiatives wherein public financing is catalyzing private investments in low-carbon infrastructure, this book proposes a framework that can be used as a tool to identify factors that influence private investment decisions and policy instruments that can scale up the private capital. Placing the Asian economies onto a low-carbon development pathway requires an

unprecedented shift in investments. This book addresses this situation by asking questions such as: • What is the central role of private finance in achieving the Paris Agreement targets? • What key policy levers and risk mitigation can governments use in an effort to unlock the potentials of private capital? • How can regionally coordinated actions hold significant promise for scaling up private investments?

international economics. Salvatore presents concepts that are essential for understanding, evaluating, and suggesting solutions to the important international economic problems and issues facing the United States and the rest of the world today and that they are likely to face in the coming years. Neither overly complex nor too simplistic, International Economics helps readers see the immediate relevance of the material and contains an unparalleled number of real-world applications and

examples. Them and Us JTS Institute Pvt Ltd What do we really know about immigration? Immigration is one of the most controversial issues these days. Keeping them out. Taking back control. Building that wall. Whether the debate centres on economics or identity, it is often framed as ‘ Them ’ (bad immigrants) against ‘ Us ’ (good locals). But immigrants aren ’ t a burden or a threat — and if we make the right choices we all can thrive together.

Drawing on first-hand reporting, compelling stories and the latest research and evidence from around the world, Philippe Legrain explains how immigration benefits us all in many ways. Immigrants start new businesses, bring different skills and help spark valuable new ideas. They help save lives — including Boris Johnson ’ s. As key workers, they keep coronavirus-stricken societies going, while young newcomers care — and help pay — for our ageing population. For sure, learning

---

to live together can be tough. The book also addresses tricky issues such as ‘ illegal ’ immigration, what immigration entails for national identity, what newcomers need to do to fit in, and how societies ought to adapt. And it suggests new ideas for how to persuade moderate sceptics about the merits of immigration. If patriotism means wanting the best for your country, we should be welcoming immigrants with open arms. It is time to close the gap between myth and reality —

and, in the process, close the gap between ‘ Them ’ and ‘ Us ’ .

Development Challenges, South-South Solutions: August 2013 Issue Zed Books Ltd.

In recent years, Africa has undergone the longest period of sustained economic growth in the continent ’ s history, drawing the attention of the international media and academics alike. This book analyses the Africa Rising narrative from multidisciplinary perspectives, offering a critical assessment of the explanations given for the poor economic growth and development

performance in Africa prior to the millennium and the dramatic shift towards the new Africa. Bringing in perspectives from African intellectuals and scholars, many of whom have previously been overlooked in this debate, the book examines the construction of Africa ’ s economic growth and development portraits over the years. It looks at two institutions that play a vital role in African development, providing a detailed explanation of how the World Bank and the IMF have interpreted and dealt with the African challenges and experiences. The insightful

---

analysis reveals that if Africa is rising, only 20-30 per cent of Africans are aboard the rising ship, and the main challenge facing the continent today is to bring on board the majority of Africans who have been excluded from growth. This book makes the complex, and sometimes confusing debates on Africa ' s economic growth experience more accessible to a wide range of readers interested in the Africa story. It is essential reading for students and researchers in African Studies, and will be of great interest to scholars in Development Studies, Political Economy, and

Development Economics. Challenges to European Welfare Systems CRC Press  
The European Neighbourhood Policy (ENP) has evolved into one of the European Union's major foreign policy instruments and received considerable attention. However, other EU neighbourhood policies, and their relevance for the ENP, also require examination. The Arab uprisings, civil wars in Libya and Syria, the continuing Israeli-Palestinian conflict, the crisis in Ukraine and Russia's annexation of the Crimean peninsula have all brought the

institutional design and tools of the ENP into question and a comparative perspective is crucial to understand EU neighbourhood policies in a wider sense. This timely book puts the ENP into context by exploring the major challenges and key lessons of the EU's other policy frameworks with neighbouring countries. Mapping the EU's bi-lateral and multilateral neighbourhood relations in comparison to the ENP and investigating the major challenges faced, it provides a comprehensive, up-to-date view of the EU's relations with its neighbours. Focusing on current

---

affairs and future challenges, the comparison with the ENP and the lessons to be drawn, generate novel insights into the EU's closest external relations. This book will be of key interest to students and scholars studying European Politics, policies and comparative politics.

Challenges and Opportunities for Sustainable Development Taylor & Francis

China's future will be determined by how its leaders manage its myriad interconnected challenges. In Fateful Decisions, leading experts from a wide range of disciplines eschew broad predictions of success or

---

failure in favor of close analyses into relief the crises facing of today's most critical demographic, economic, social, political, and foreign policy challenges. They expertly outline the options and opportunity costs entailed, providing a cutting-edge analytic framework for understanding the decisions that will determine China's trajectory. Xi Jinping has articulated ambitious goals, such as the Belt and Road Initiative and massive urbanization projects, but few priorities or policies to achieve them. These goals have thrown

China as the economy slows and the population ages while the demand for and costs of education, healthcare, elder care, and other social benefits are increasing. Global ambitions and a more assertive military also compete for funding and policy priority. These challenges are compounded by the size of China's population, outdated institutions, and the reluctance of powerful elites to make reforms that might threaten their positions, prerogatives, and Communist Party

legitimacy. In this volume, individual chapters provide in-depth analyses of key policies relating to these challenges. Contributors illuminate what is at stake, possible choices, and subsequent outcomes. This volume equips readers with everything they need to understand these complex developments in context. International Economics, 12th Edition Simon and Schuster The consequences of the global economic crisis which started in the United States in 2007-08 are still being felt in most of the advanced economies, and the

---

mainstream tools of recovery are not having the required results. It seems that many of the after-effects of the crisis, including the instability of the financial markets, increasing public debts and limited economic growth, require new solutions from both economic policy and theory. Lower aggregate demand during the crisis increased the pressure on firms to be more competitive and at the same time, the crisis in the banking system has had a negative impact on the willingness of financial institutions to give credit to companies for investment. Therefore, the key issue for current economic policy is to find a balance between the stabilisation of public finance and maintaining the momentum of long-term growth. This book offers an evolutionary-developmental analysis, combining elements of neo-Schumpeterian economics, institutional economics and post-Keynesian economics, to show that selection processes within an economy, and the institutional rules shaping those processes, are substantially more important than usually recognised by evolutionary economic theory. Two major challenges for economic theory and policy, in particular, have emerged during the crisis. The first is the rise of unemployment coupled with growing public deficits. The second is the financial instability which threatens the permanence of economic development. This book examines the performance of the advanced economies since the crisis and explores why some of them have been more successful in tackling these challenges than others. It is argued that the reasons for the varied performances of these economies lie in the economic policies which were introduced before and in the aftermath of the crisis and the differences in

---

the regulation of their labour markets. This volume will be of interest to students and academics in the areas of macroeconomics, public economics and public management.

The New Economy of the Product Life Cycle Routledge

This book presents the theory and practice of product lifecycle management, chiefly focusing on modern approaches suitable for digitalized enterprises. In addition to describing adaptive methods for advanced product creation using big data analytics, it presents economic and mathematical models for managing product lifecycles based on the application

of recent methods (e.g. digital design and automated intelligent systems) to control pre-production and production processes. Given its scope, the book appeals to researchers, economic analysts and entrepreneurs alike.
