 A teacher is a person who not only teaches but also guides his/her student in building a successful career. The future of a nation lies upon the level of knowledge the people in the country are having. Thus, the responsibility of a teacher goes far beyond what we

think of it at an individual level. We have seen people are interested in making their career in many other professions but teaching as a profession is not the first choice in most cases. Nevertheless, teaching is one of the most interesting professions as it involves a continuous learning exercise and at the same time making others learned by delivering the knowledge one is having. The teachers assess their students but at first, they also get assessed under UGC NET conducted by the National Testing Agency. The National Eligibility Test (NET), also known as UGC NET or NTA-UGC-NET, is the test for determining the eligibility for the post of Assistant Professor and/or Junior Research Fellowship (JRF) award in Indian universities and colleges. UGC NET is considered as one of the toughest exams in India, with success ratio of merely 6%. Previously, the passing ratio was around 3% - 4%. Assistant Professors in private colleges may or may not be NET qualified but NET qualification is mandatory for universities & government colleges.

This book gathers the Proceedings of the 20th International Conference on Interactive Collaborative Learning (ICL2017), held in Budapest, Hungary on 27 – 29 September 2017. The authors are currently witnessing a significant transformation in the development of education. The impact of globalisation on all areas of human life, the exponential acceleration of technological developments and global markets, and the need for flexibility and agility are essential and challenging elements of this process that have to be tackled in general, but especially in engineering education. To face these current real-world challenges, higher education has to find innovative ways to quickly respond to them. Since its inception in 1998, this conference has been devoted to new approaches in learning with a focus on collaborative learning. Today the ICL conferences offer a forum for exchange concerning relevant trends and research results, and for sharing practical experience gained while developing and testing elements of new

technologies and pedagogies in the learning context.

The neurocognitive mechanisms and the cognitive processes underlying acquisition of arithmetic abilities and their significance for education have been the subject of intense research in the last few decades, but the most part of this research has been conducted in non-applied settings and there ' s still a deep discrepancy between the level of scientific knowledge and its implementation into</p>	<p>actual educational settings. Now it ' s time to bring the results from the laboratory to the classroom. Apart from bringing the theoretical discussions to educational settings, the volume presents a wide range of methods for early detection of children with risks in mathematics learning and strategies to develop effective interventions based on innovative cognitive test instruments. It also provides insights to translate research knowledge into public policies in order to address socioeconomic issues. And it does so from an international perspective, dedicating a whole section to the cultural diversity of mathematics learning difficulties in different parts of the world. All of this makes the International Handbook of Mathematical Learning Difficulties an essential tool for those involved in the daily struggle to prepare the future generations to succeed in the global knowledge society. Issues, such as education, health, power, transport, stray animals, tourism, water, greenery, pollution, waste and sanitation management, disaster management, adulteration, crimes, social life, civic infrastructure, encroachment,	unauthorized construction and illegal colonies, which the people in Delhi have been confronting for long, have been covered under the book. As Delhi is the national capital and the mirror of the country, the author has attempted to focus on the development of it as a role model of the urban India, to be replicated by others in respect of issues that affect the day-to-day life of a common man, people of all age groups, sex, religion, region, poor and rich, students, public and private sectors, bureaucrats, businessmen, industrialists and politicians. The book will be of immense value to policymakers, programme planners, public and private sectors, NGOs, social workers, environmental workers, educationists, developmental practitioners and the Delhiites who dream to see Delhi as "a world-class city". <u>Target New Pattern SBI Clerk Junior Associate Preliminary & Main Exam</u>
