We appreciate your support of the preservation process, and thank you for being an important part of keeping this knowledge alive and relevant.

Edwards's 600 Examination Questions and Answers Butterworth-Heinemann

Excerpt from Brown's Elementary Questions and Answers for Marine Engineers HE Publishers and Author have pleasure in bringing before marine engineers this up-to-date work dealing with the Elementary Questions and their Answers as required by the Board of Trade. They do this in the hope that its features of novelty may serve to render candidates for examination more certain of success in this section of their work, and special attention is drawn to the additional or alternative questions written by the Author in an endeavour to show how the older setting may be presented in new form, that in many cases calls for no further explanation or answering, and he has thought such changing would prove acceptable in view of the Regulation coming into force in January, 1917, which states candidates may receive questions of a similar nature to those embodied in the original It is not intended that these alternative questions be looked upon as ones that will certainly be given, but are only to show what can be done in the process of turning about. Other valuable features of this work are the number of plates of various engine parts, etc., drawn without a confusion of fine details in order to leave the fundamental principles clear, also an extensive alphabetical index, contents, etc., which it is hoped will prove of use to those studying from this book. The Author has refrained from giving elaborate notes upon all the various questions, as his experience has shown that readers prefer to see exactly what shape and approximate size their answer to an individual question should take, and he trusts those using this work will profit by its being written in a manner closely following that so successfully adopted in his Academy. The Author and Publishers acknowledge with grateful thanks the loan of blocks, etc., from the following firms, and without which much valuable information could not have been given - Messrs Weirs, of Cathcart, Glasgow; Parsons Motor Company, Southampton; Brazil, Straker 81 Cc., Bristol; Holmes Cc., Newcastle-on-Tyne; Hall Cc., Dartford, Kent; Beldam Packing Rubber Company, London. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at www.forgottenbooks.com This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works.

Brown's elementary questions and answers for marine engineers Nabu Press

This book provides the information on boilers and the associated equipment, as used at sea, required by marine engineers taking the Steam Paper, Class Two, for the Department of Transport's Certificate of Competency for Marine Engineer Officers. Much of the information is given in the form of comprehensive answers to typical examination questions, with supporting diagrams that help the reader to understand and remember important machinery details. In this new edition the book has been updated throughout with new material on welded boilers, various types of water tube boiler, rotary air heater, water level alarm, consolidated type safety valve, hydraulic testing and various aspects of survey, maintenance and operational problems.

Verbal Questions and Answers for Marine Engineers Forgotten Books

"This workbook is intended to supplement the text Modern Marine Weather with practice questions and convenient resources."--title page verso.

Cornell Red Book of Marine Engineering Lubrecht & Cramer Limited

Excerpt from Roper's Questions and Answers for Stationary and Marine Engineers and Electricians: With a Chapter on What to Do in Case of Accidents Of course, it would be impossible in a book of this kind to cover all of the questions that might confront an applicant on examination, and the authors have confined themselves to the more important subjects and selected such questions as in their judgment would on the one hand give a fair test of the knowledge of the applicant and, on the other, a well prepared engineer should be capable of answering. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at www.forgottenbooks.com This book is a reproduction of an

important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy.
