And when will they lie, cheat and be selfish? Based on 15 years of research, To Be Honest explains how four factors (Clear Identity, Accountability, Governance and Cross-Functional Relationships) affect honesty, justice and purpose within a company. When these factors are absent or ineffective, the organizational conditions compel employees to choose dishonesty and self-interest. But when done well, the organization is 16 times more likely to have people tell the truth, behave fairly and serve a greater good. To Be Honest shares the stories of leaders who have acted with purpose, honesty and justice even when it was difficult to do so. In-depth interviews with CEOs and senior executives from

exemplar companies such as Patagonia, Cabot Creamery, Microsoft and others reveal what it takes to build purpose-driven companies of honesty and justice. Interviews with thought leaders like Jonathan Haidt, Amy Edmondson, Dan Ariely and James Detert offer rich insights on how leaders can become more honest and purposeful. You'll learn how Hubert Joly took Best Buy from a company on the brink of bankruptcy to one that is profitable, thriving and purposeful. A collection of feminist essays steeped in "Solnit's unapologetically observant and truth-speaking voice on toxic, violent masculinity" (The Los Angeles Review). In a timely and incisive follow-up to her national bestseller Men Explain Things to Me, Rebecca Solnit offers sharp commentary on women who refuse to be silenced, misogynistic violence, the fragile masculinity of the literary canon, the gender binary, the recent history of rape jokes, and much more. In characteristic style, "Solnit draw[s] anecdotes of female indignity or male aggression from history, social media, literature, popular culture, and the news . . . The main essay in the book is about the various ways that women are silenced, and Solnit focuses upon the power of storytelling—the way that who gets to speak, and about what, shapes how a society understands itself and what it expects from its members. The Mother of All Questions poses the thesis that telling women's stories to the world will change the way that the world treats women, and it sets out to tell as many of those stories as possible" (The New Yorker). "There's a new feminist revolution—open to people of all genders—brewing right now and Rebecca Solnit is one of its most powerful, not to mention beguiling, voices." —Barbara Ehrenreich, New York Times—bestselling author of Natural Causes "Short, incisive essays that pack a powerful punch." —Publishers Weekly "A keen and timely commentary on gender and feminism. Solnit's voice is calm, clear, and unapologetic; each essay balances a warm wit with confident, thoughtful analysis, resulting in a collection that is as enjoyable and accessible as it is incisive." —Booklist

Rising to Power is a time tested, wisdom-packed guide for executives desiring to be exceptional leaders as they navigate their ascent to the highest levels of their organization. Nearly two-thirds of all leaders entering executive roles lack sufficient understanding of what is required and are unprepared for what they will face, which explains why 50 percent of them fail within the first eighteen months. For decades we have known that failure rates among transitioning executives are too high, causing exorbitant costs, damaged organizations, and stalled careers. Still, little has changed in the way organizations prepare leaders to assume executive positions. Three-fourths of new executives say their organization did not adequately prepare them for the executive office. It doesn't have to be this way. If you are an executive—or you're aspiring to be one—and considering how you will navigate the ascent in your organization, Rising to Power will serve you like no other resource can. Odds are high you have watched a promising executive fail on their way up. Like many, you scratched your head, wondering, "Why didn't they see that coming?" Now you're hoping not to be the next one that falls. Rising to Power will guide you on a predictable journey of ascent, through the transitional moments and issues most common in executive failure. It will bolster your confidence, open your eyes, deepen your insight, and if you let it, reveal your own proclivities for failure that you may not even recognize. Based on a ten-year longitudinal study, Rising to Power offers a profoundly new way of looking at an executive's rise in an organization, and offers an approach to significantly increase your odds of success.

Oxford Studies in Agency and Responsibility is a series of volumes presenting outstanding new work on a set of connected themes, investigating such questions as: - What does it mean to be an agent? - What is the nature of moral responsibility? Of criminal responsibility? What is the relation between moral and criminal responsibility (if any)? - What is the relation between responsibility and the metaphysical issues of determinism and free will? - What do various psychological disorders tell us about agency and responsibility? - How do moral agents develop? How does this developmental story bear on questions about the nature of moral judgment and responsibility? - What do the results from neuroscience imply (if anything) for our questions about agency and responsibility? OSAR thus straddles the areas of moral philosophy and philosophy of action, but also draws from a diverse range of cross-disciplinary sources, including moral psychology, psychology proper (including experimental and developmental), philosophy of psychology, philosophy of law, legal theory, metaphysics, neuroscience, neuroethics, political philosophy, and more. It is unified by its focus on who we are as

deliberators and (inter)actors, embodied practical agents negotiating (sometimes unsuccessfully) a world of moral and legal norms.

Buzzfeed Best YA Book of 2017 An ode to Put the Damn Guns Down, this is New York Times bestselling author

Jason Reynolds ’ s electrifying novel that takes place in sixty potent seconds—the time it takes a kid to decide

whether or not he ’ s going to murder the guy who killed his brother. A cannon. A strap. A piece. A biscuit. A

burner. A heater. A chopper. A gat. A hammer A tool for RULE Or, you can call it a gun. That ’ s what fifteen-year-

old Will has shoved in the back waistband of his jeans. See, his brother Shawn was just murdered. And Will knows

the rules. No crying. No snitching. Revenge. That ’ s where Will ’ s now heading, with that gun shoved in the back

waistband of his jeans, the gun that was his brother ’ s gun. He gets on the elevator, seventh floor, stoked. He

knows who he ’ s after. Or does he? As the elevator stops on the sixth floor, on comes Buck. Buck, Will finds out, is

who gave Shawn the gun before Will took the gun. Buck tells Will to check that the gun is even loaded. And that ’ s

when Will sees that one bullet is missing. And the only one who could have fired Shawn ’ s gun was Shawn. Huh.

Will didn ’ t know that Shawn had ever actually USED his gun. Bigger huh. BUCK IS DEAD. But Buck ’ s in the

elevator? Just as Will ’ s trying to think this through, the door to the next floor opens. A teenage girl gets on, waves

away the smoke from Dead Buck ’ s cigarette. Will doesn ’ t know her, but she knew him. Knew. When they were

eight. And stray bullets had cut through the playground, and Will had tried to cover her, but she was hit anyway,

and so what she wants to know, on that fifth floor elevator stop, is, what if Will, Will with the gun shoved in the

back waistband of his jeans, MISSES. And so it goes, the whole long way down, as the elevator stops on each floor,

and at each stop someone connected to his brother gets on to give Will a piece to a bigger story than the one he

thinks he knows. A story that might never know an END...if Will gets off that elevator. Told in short, fierce

staccato narrative verse, Long Way Down is a fast and furious, dazzlingly brilliant look at teenage gun violence, as

could only be told by Jason Reynolds.

Where were Venetian blinds invented? What color is the black box on a commercial airplane? Where did India ink

originate? Most of us know more than we think we know. We also think we know more than we actually do-

because some of what we think we know simply "ain't so." We all harbor misconceptions that are accepted not only

because they are popular but also because they make sense. It makes sense to believe, for example, that German

chocolate originated in Germany rather than the truth: that German chocolate is so named because it was created by Sam German. It seems logical to believe that Mercury is the hottest planet because of its proximity to the sun, or that buttermilk contains butter, that Danish pastry is from Denmark, and that the boat race America's Cup was named after the United States of America. In Sorry, Wrong Answer, Rod Evans takes readers on a tour of misleading trivia, debunking commonly held assumptions and sharing surprising "right" answers. \*Answers: Japan; Orange; China

What are "essential questions," and how do they differ from other kinds of questions? What's so great about them? Why should you design and use essential questions in your classroom? Essential questions (EQs) help target standards as you organize curriculum content into coherent units that yield focused and thoughtful learning. In the classroom, EQs are used to stimulate students' discussions and promote a deeper understanding of the content. Whether you are an Understanding by Design (UbD) devotee or are searching for ways to address standards—local or Common Core State Standards—in an engaging way, Jay McTighe and Grant Wiggins provide practical guidance on how to design, initiate, and embed inquiry-based teaching and learning in your classroom. Offering dozens of examples, the authors explore the usefulness of EQs in all K-12 content areas, including skill-based areas such as math, PE, language instruction, and arts education. As an important element of their backward design approach to designing curriculum, instruction, and assessment, the authors \*Give a comprehensive explanation of why EQs are so important; \*Explore seven defining characteristics of EQs; \*Distinguish between topical and overarching questions and their uses; \*Outline the rationale for using EQs as the focal point in creating units of study; and \*Show how to create effective EQs, working from sources including standards, desired understandings, and student misconceptions. Using essential questions can be challenging—for both teachers and students—and this book provides guidance through practical and proven processes, as well as suggested "response strategies" to encourage student engagement. Finally, you will learn how to create a culture of inquiry so that all members of the educational community—students, teachers, and administrators—benefit from the increased rigor and deepened understanding that emerge when essential questions become a guiding force for learners of all ages.

INSTANT NEW YORK TIMES BESTSELLER “ One of the most important books I ’ ve ever read—an indispensable guide to

thinking clearly about the world. ” – Bill Gates “ Hans Rosling tells the story of ‘ the secret silent miracle of human progress ’

as only he can. But Factfulness does much more than that. It also explains why progress is so often secret and silent and

teaches readers how to see it clearly. ” —Melinda Gates "Factfulness by Hans Rosling, an outstanding international public

health expert, is a hopeful book about the potential for human progress when we work off facts rather than our inherent

biases." - Former U.S. President Barack Obama Factfulness: The stress-reducing habit of only carrying opinions for which

you have strong supporting facts. When asked simple questions about global trends—what percentage of the world ’ s

population live in poverty; why the world ’ s population is increasing; how many girls finish school—we systematically get the

answers wrong. So wrong that a chimpanzee choosing answers at random will consistently outguess teachers, journalists,

Nobel laureates, and investment bankers. In Factfulness, Professor of International Health and global TED phenomenon

Hans Rosling, together with his two long-time collaborators, Anna and Ola, offers a radical new explanation of why this

happens. They reveal the ten instincts that distort our perspective—from our tendency to divide the world into two camps

(usually some version of us and them) to the way we consume media (where fear rules) to how we perceive progress

(believing that most things are getting worse). Our problem is that we don ’ t know what we don ’ t know, and even our

guesses are informed by unconscious and predictable biases. It turns out that the world, for all its imperfections, is in a

much better state than we might think. That doesn ’ t mean there aren ’ t real concerns. But when we worry about everything

all the time instead of embracing a worldview based on facts, we can lose our ability to focus on the things that threaten us

most. Inspiring and revelatory, filled with lively anecdotes and moving stories, Factfulness is an urgent and essential book

that will change the way you see the world and empower you to respond to the crises and opportunities of the future. ---

Exploring the complex arena of international planning for development has until now been uniquely the privilege of influential senior western planners. This book calls into question many of their hallowed principles and much of the conventional wisdom still evident in the halls of academe. At a time of increasing enrollment of foreign students in North American planning programs, the emergence of a new voice has coincided with a growing skepticism, worldwide, about old notions of planning and development in poorer and ex-colonial countries. Now there is a need for brave innovations to reshape our understanding of the global crisis and the potential for progressive and democratic local solutions in both rich and poor nations alike. This new voice is given expression by academics and professionals from Third World nations who received their planning education in the west and who now hold posts in major western planning schools. Breaking the Boundaries presents their views, and those of concerned colleagues, about the need for a radically changed curriculum

---

based on a comparative, one-world approach to planning education. Their personal experiences as young expatriate scholars, and later as teachers of both Third World and First World students in western planning schools are seen as crucial to this need for change. Through candid reflections and perceptive critiques of their own field- the spatial, environmental, social, design and communications disciplines - the contributors explore crucial issues in development planning from theoretical and professional practice perspectives.

Essential reading for scholars, poetry lovers, and anyone with an interest in Rainer Maria Rilke, German poetry, or the creative impulse, these ten letters of correspondence between Rilke and a young aspiring poet reveal elements from the inner workings of his own poetic identity. The letters coincided with an important stage of his artistic development and readers can trace many of the themes that later emerge in his best works to these messages—Rilke himself stated these letters contained part of his creative genius.
