Better transport is essential to Myanmar's development. After decades of underinvestment, Myanmar's transport infrastructure lags behind other regional countries. Sixty percent of trunk highways and most of the railways need maintenance or rehabilitation. River infrastructure does not exist, while 20 million people lack basic road access. Can the transport sector deliver upon the master plan's objectives? What is needed to improve the quality of the infrastructure and services for the industry? How can basic transport services be provided to all? How can Myanmar reduce the economic and social cost of transport? These reports attempt to answer these questions.

In today's globalised economic development, international transactions form an integral part of economic activities. Logistics Management encompasses planning and management of all activities, involving sourcing and procurement of cargo by effective and economically feasible coordination and collaboration with channel partners, and provision of product and service packages from point-of-origin to point-of-consumption at the right time and at the right place. This book gives, with theoretical and practical expertise, a comprehensive coverage of the logistic concepts, techniques, and their applications in the world cargo industry. Besides, it provides an in-depth understanding of the strategic framework of Logistics Management, the technologies, and the components used in logistic operations. It also covers export-import trade and documentations, shipping formalities, warehouse and inventory management, ERP concepts, logistics operation of major ports—and more. Key Feature : Case Studies are provided at the end of most chapters, which tend a practical orientation to the subject. This book is primarily intended as a text for postgraduate students of Management (MBA/MIB) and Commerce (M.Com.IB). It will also prove useful for the students of those engineering disciplines where the subject is prescribed as an elective course. In addition, practising managers in international business will find the book valuable as a reference

This text is intended to help students understand both the fundamental role and importance of transportation in companies and in our society, and the complex environment in which transportation service is provided today. The authors take a managerial approach to teaching transportation concepts and issues, providing students the tools to adapt to this fast-paced and rapidly changing industry. [In this book], the role and importance of transportation in the supply chain management and the economy are explored along with an overview of transportation regulation and public policy. [Next, the book] addresses the traditional modes of transportation including special carriers and global transportation. [Finally, it] discusses transportation management from both the shipper and carrier perspective.

For more than a century cars have symbolized autonomous, unfettered mobility and an increasingly global experience. And yet, they are often used differently outside the centers of global capitalism. This pioneering book considers how, through the lens of the automobile, we can assess the pleasures, dangers, and limits of global modernity in West Africa. Through new and provocative readings of famous plays, novels, and films, as well as recent popular videos, *Postcolonial Automobility* reveals the surprising ways in which automobility in the region is, at once, an everyday practice, an ethos, a fantasy of autonomy, and an affective activity intimately tied to modern social life. Lindsey B. Green-Simms begins with the history of motorization in West Africa from the colonial era to the decolonizing decades after World War II, and addresses the tragedy of car accidents through a close reading of Wole Soyinka's 1965 postindependence play *The Road*. Shifting to screen media, she discusses Ousmane Sembene's *Xala* and Jean-Pierre Bekolo's

Quartier Mozart and reviews popular, low-budget Nollywood films. Finally, Green-Simms considers how feminist texts rewrite and work in dialogue with the male-centered films and novels where the car stands in for patriarchal power and capitalist achievement. Providing a unique perspective on technology in Africa—one refusing to be confined to narratives of either underdevelopment or inevitable progress—and covering a broad range of interdisciplinary material, *Postcolonial Automobility* will appeal not only to scholars and students of African literature and cinema but also to those in postcolonial and globalization studies.

Success About the Expert Bruce Stimson started his factoring career in 2001, when he founded QLFS, which eventually became the Invoice Trucking Group. Mr. Stimson led the firm through its initial growth and established it as a leading provider to startups and small companies in the New England region. After QLFS, Mr. Stimson launched Trucking Capital LLC to provide services in the USA, Canada and Australia. Under his leadership, Trucking Capital LLC has expanded to offer a number of business finance products and can help companies in most industries. Trucking Capital LLC is one of the few companies that offers micro-factoring (also called small-ticket factoring), which helps early-stage companies with limited revenues. Small business factoring has been ignored by larger factoring firms and banks, establishing Mr. Terry as a pioneer in this market. Before starting his career in finance, Mr. Stimson held several management positions in operations and marketing in the telecommunications

industry for eight years. He earned a Master's Degree in Finance with a concentration in banking. HowExpert publishes quick 'how to' guides on all topics from A to Z by everyday experts.
