Chris Anderson is the curator of phenomenally successful TED talks - over one billion views and counting. He is passionate about the importance of public speaking, something he describes as a crucial life skill and which we should be teaching in school, and of the amazing power of direct human-to-human communication, recorded on

video, in the internet age. It is now possible to share ideas with millions around the world (as evidenced by the success of TED itself, whose most popular talk has been viewed 31 million times). In his first book, *Talk This Way*, he shares his passion for public speaking and offers a master-class in how to do it - not just how to give a great TED talk, but how to stand up and speak persuasively in front of any size of audience, whether that is a school classroom, making a video blog, in a business meeting or at a conference. The book brings together his experience of over two decades as the curator of TED, in which time he has listened to over

one thousand stage talks, with advice from 30 of his all-time favourite TED speakers.

A requisite countertop companion for all home chefs, *Keys to Good Cooking* distils the modern scientific understanding of cooking and translates it into immediately useful information. The book provides simple statements of fact and advice, along with brief explanations that help cooks understand why, and apply that understanding to other situations. Not a cookbook, *Keys to Good Cooking* is, simply put, a book about how to cook well. A work of astounding scholarship and originality, this is a concise and authoritative guide designed to help home cooks navigate the ever-expanding universe of recipes and ingredients and appliances, and arrive at the promised land of a satisfying dish.

The Rough Guide to Scottish Highlands & Islands McGraw Hill Professional A revolutionary, collaborative approach to design and construction project delivery Integrated Project Delivery is the first book-length discussion of IPD, the emergent project delivery method that draws on each stakeholder's unique knowledge to address problems before they occur. Written by authors with over a decade of research and practical experience, this book provides a primer on IPD for architects, designers, and students interested in this revolutionary approach to design and construction. With a focus on IPD in everyday operation, coverage includes a detailed explanation and analysis of IPD guidelines, and case studies that show how real companies are applying these guidelines on real-world projects. End-of-chapter questions help readers quickly review what they've learned, and the online forum allows them to share their insights and ideas with others who either have or are in the process of implementing IPD themselves. Integrated Project Delivery brings together the owners, architect, engineers, and contractors early in the development stage to ensure that problems are caught early, and to address them in a collaborative way. This book describes the

parameters of this new, more efficient approach, with expert insight on real-world implementation. Compare traditional procurement with IPD Understand IPD guidelines, and how they're implemented Examine case studies that illustrate everyday applications Communicate with other IPD adherents in the online forum The IPD approach revolutionizes not only the workflow, but the relationships between the stakeholders – the atmosphere turns collaborative, and the team works together toward a shared goal instead of viewing one another as obstructions to progress. Integrated Project Delivery provides a deep exploration of this approach, with practical guidance and expert insight. While more than 25 percent of known species have been used for several centuries in traditional African medicine for the prevention and treatment of diseases, Africa remains a minor player in the global natural products market largely due to lack of practical information. This updated and expanded second edition of the Handbook of African Medicinal Plants provides a comprehensive review of more than 2,000 species of plants employed in indigenous African medicine, with full-color photographs and references from over 1,100 publications. The first part of the book contains a catalog of the plants

used as ingredients for the preparation of traditional remedies, including their medicinal uses and the parts of the plant used. This is followed by a pharmacognostical profile of 170 of the major herbs, with a brief description of the diagnostic features of the leaves, flowers, and fruits and monographs with botanical names, common names, synonyms, African names, habitat and distribution, ethnomedicinal uses, chemical constituents, and reported pharmacological activity. The second part of the book provides an introduction to African traditional medicine, outlining African cosmology and beliefs as they relate to healing and the use of herbs, health foods, and medicinal plants. This book presents scientific documentation of the correlation between the observed folk use and demonstrable biological activity, as well as the characterized constituents of the plants.
