Maritime navigation has rapidly developed since the publication of the last edition of the title with methods of global position fixing for shipping becoming standardized. As in the previous two editions, this edition will provide a sound basis for the understanding of modern navigation systems and brings the student or professional up-to-date with the latest developments in technology and the growing standardization of maritime navigation techniques. Developed with close scrutiny from the US Merchant Marine Academy and the major maritime navigation centres in the UK, out-dated techniques have been replaced by an expanded section on the now standard Navstar GPS systems and the Integrated Nav. In addition, a new chapter on the application of electronic charts will also be included, as well as problems at the end of each chapter with worked solutions.

Chapter I 'A fair vestal, throned in the west' Elfride Swancourt was a girl whose emotions lay very near the surface. Their nature more precisely, and as modified by the creeping

hours of time, was known only to those who watched the circumstances of her history. Personally, she was the combination of very interesting particulars, whose rarity, however, lay in the combination itself rather than in the individual elements combined. As a matter of fact, you did not see the form and substance of her features when conversing with her; and this charming power of preventing a material study of her lineaments by an interlocutor, originated not in the cloaking effect of a well-formed manner (for her manner was childish and scarcely formed), but in the attractive crudeness of the remarks themselves. She had lived all her life in retirement—the monstrari gigito of idle men had not flattered her, and at the age of nineteen or twenty she was no further on in social consciousness than an urban young lady of fifteen. One point in her, however, you did notice: that was her eyes. In them was seen a sublimation of all of her; it was not necessary to look further: there she lived. These eyes were blue; blue as autumn distance—blue as the blue we see between the retreating mouldings of hills and woody slopes on a sunny September morning. A misty and shady blue, that had no beginning or surface, and was looked INTO rather than AT. As to her presence, it was not powerful; it was weak. Some women can make their personality pervade the atmosphere of a whole banqueting hall; Elfride's was no more pervasive than that of a kitten. Elfride had as her own the thoughtfulness which appears in the face of the Madonna della Sedia, without its rapture: the warmth and spirit of the type of woman's feature most common to the beauties—mortal and immortal—of Rubens, without their insistent fleshiness. The characteristic expression of the female faces of Correggio—that of the yearning human thoughts that lie too deep for tears—was hers sometimes, but seldom under ordinary conditions.

In 1964, Chrysler offered an optional V-8 with it's popular Dodge Valiant. Banking on the resulting success of this option package, Chrysler went on to release a decade worth of low-priced, high-performance muscle cars based on the "A-body" Valiant, including the Dodge Dart GT and GTS, the Swinger 340, and the Demon, as well as the Plymouth Duster. Today, these cars' phenomenal sales figures translate to a thriving Dart and Duster enthusiast scene. Color photography of restored and factory-original vehicles, along with archival black-and-white images, are accompanied by an authoritative history examining the development of the cars. In addition to model histories for each, there are in-depth discussions of vehicle design and production, driving impressions, accessories and options, popular performance upgrades of the period, and the cars' successful histories at the drag strip.
