Bridges' Translation of the Ten Qira'At of the Noble Qur'an <https://wisdompublications.co.uk>

This book contains numerous debates on the prophetic numerical system embedded in the Quran.

Edip Yksel responds and refutes critics and skeptics, such as: Abu Ameenah Bilal Philips: Sunni scholar Carl Sagan: astronomer, astrophysicist, cosmologist, and skeptic author Daniel Abdurrahman Lomax: Sunni computer engineer Ayman Mutaakher: anonymous Sunni critic James (Amazing) Randi: founder

of Randi Foundation, a skeptic activist Michael Shermer: editor and publisher of the Skeptic Magazine, author, columnist The miraculous function of the number 19 prophesized in Chapter 74 was unveiled in 1974 through a computerized analysis of the Quran. Though, in retrospect, the implication of 19 in Chapter 74 traditionally called Hidden One, were obvious, it remained a secret for 1406 (19x74) lunar years after the revelation of the Quran. Ironically, the first words of the Chapter 74, The Hidden One, was revealing, yet the

code was a divinely guarded gift allocated to the computer generation; they were the one who would need and appreciate it the most. As we have demonstrated in various books, hundreds of simple and complex algorithms, we witness the depth and breath of mathematical manipulation of Arabic, an arbitrary human language, to be profound and extraordinary. This is the fulfillment of a Quranic challenge (17:88). While the meaning of the Quranic text and its literal excellence was kept, all its units, from chapters,

| verses, words to its letters were also assigned universally recognizable roles in creation of mathematical patterns. Since its discovery, the number 19 of the Quran and the Bible has increased the appreciation of many of those who acknowledge the truth, has removed doubts in the minds of many People of the Book, and has caused discord, controversy and chaos among those who have traded the Quran with men-made sectarian teachings. This is indeed a fulfillment of a Quranic prophecy (74:30-31). 14.The improbability and | impossibility of the numerical structure of the Quran being produced by a medieval Arab genius becomes evident when we consider the following factors: It includes simple elements of the Quran and goes deeper to an interlocking system of complex numerical patterns and relationships. It involves not only frequencies of letters and words but also the numerical values of letters. It involves not only an intricate numerical pattern but also a huge set of data consisting of units with multiple functions, such as | letters that are also digits, words that are also numbers. The nemeroliteral aspect of the Quran were not known by the adherents of the Quran until late 1960s and especially, 1974. The literary aspect of the Quran has received praises from many literary giants throughout centuries. The scientific accuracy of Quranic statements on various fields has been immaculate. Muhammad was one of the busiest and greatest social and political reformists in human history. The timing of the discovery of the code is precise and prophetic. A series of |

It is the first

text is written in
accordance with the
Qira'a of Asem,
narrated by Hafs.
Variations from that

the variations of the

affect the meaning. 2.
It is the first

source of pondering for

denote whether a
pronoun like 'you' or
an imperative verb like
'say' is plural, dual,

or singular, the translators did not impose their understanding on the reader by adding text between brackets like (O Prophet) to denote singular form, or (O mankind) to denote plural form. Rather, this distinction was achieved by adding a superscript after pronouns and imperative verbs. For example: youpl is used for a plural pronoun, yousg for a singular pronoun, and youdl for a dual pronoun.

"This small treatise of Ibn Taymiyya (661/1263-728/ 1328), the extremely influential medieval

Hanbali jurist, has an importance belied by its size since it is, in fact, an investigation into the origin and nature of the Prophetic Sunna. In it he discusses the value of the consensus of the people of Madina and its standing as evidence. He also deals with the lawful and unlawful, food and drink, usury, acts of worship and other matters, and compares the school of the people of Madina regarding all these things with the other

schools, making it clear that the Madinan school is the soundest of all of them and the closest to the Sunna and the practice of the Salaf. Although usually associated with hadith-based legal reasoning, in this work Ibn Taymiyya demonstrates the unquestionable authority of the practice of the people of Madina, showing how it remained indisputably the authentic expression of the Sunna of the Prophet, may Allah bless him and grant him

peace, during the first three generations of Islam when it was definitively recorded by Imam Malik ibn Anas. The conclusion he reaches is that: "In the time of the Companions, the Followers and their Followers, their school was the soundest of the schools of the people in all the lands of Islam, east and west, both in respect of its fundamental principles and its secondary rulings". Textual Criticism

and Qur'an

Manuscripts BRILL

This unique work takes a method of textual analysis commonly used in studies of ancient Western and Eastern manuscripts and applies it to twenty-one early Qur'an manuscripts. Keith Small analyzes a defined portion of text from the Qur'an with two aims in view: to recover

the earliest form of text for this portion, and to trace the historical development of this portion to the current form of the text of the Qur'an. Small concludes that though a significantly early edited form of the consonantal text of the Qur'an can be recovered, its original forms of text cannot be

obtained. He also documents the further editing that was required to record the Arabic text of the Qur'an in a complete phonetic script, as well as providing an explanation for much of the development of various recitation systems of the Qur'an. This controversial, thought-provoking

book provides a rigorous examination into the history of the Qur'an and will be of great interest to Quranic Studies scholars. *Introduction to the Qur'an* John Wiley & Sons

| rooted in Islam's holy book, the Qur'an. English- speaking people, however, have found attempts to understand the Qur'an and Islam impeded by unclear, densely worded translations and explanatory notes written by Islamic apologists attempting to conceal, rather than reveal, how Islamic jihadis use the texts and teachings of the Qur'an to justify | violence and supremacism, and to make recruits of peaceful Muslims. The Critical Qur'an, in contrast, makes clear the passages that are used to incite violence.
