Completely remove any metal shavings that are on the panels prior to installation. Panel Overlap Figure #4 - R Panel Overlap Figure #5 - PBR Panel Overlap Since the R Panel profile is symmetric, either edge of the panel can be overlapped. For the PBR panel, the non-purlin bearing leg side of the panel must lap over the purlin bearing leg side.

R-Panel / PBR Panel Install Guide

galvalume with a minimum yield of 80,000 PSI. The R-Loc panel also has a Class 4 UL2218 impact resistance rating, a Class A UL790 fire resistance rating, and a Class 90 UL580 uplift resistance rating. The recommended minimum roof slope for the 11/4" R-Loc is a 1/2:12 pitch. This will allow for sufficient drainage of water.

R Panel Installation Guide

Panel installation should begin at the gable end of the roof opposite the prevailing rain-bearing wind (this will provide added assurance against wind-driven rain being forced under the laps). Measure one full panel width in from the roof edge. At this point chalk a line from ridge to eave (avoid getting chalk on panels— it may discolor them!).
