Newbery Honor author Cynthia Lord likes fostering rabbits—or, as she fondly calls it, “ borrowing bunnies. ” This is the heartwarming true story of the author ’ s own journey with two very special rabbits. In the spring of 2016, Peggotty and Benjamin were saved by Maine ’ s Cottontail Cottage Rabbit Rescue after their previous owners had neglected them. But before the two Netherland Dwarf rabbits could be adopted, Cynthia had to help them learn to trust people and feel safe inside a home. The bunnies slowly settled in, enjoying their clean pens, nibbling new foods, and playing with fun toys, while Cindy ’ s husband, John Bald, photographed Benjamin and Peggotty ’ s every step toward adoption. At that time, hundreds of viewers were drawn to Cindy ’ s Facebook page to watch their progress. Now, she has adapted the rabbits ’ true story into a picture book that explores love, responsibility, empathy, and letting go—along with fostering ’ s many surprises, both big and small. Young readers will delight in watching these bunnies thrive while also learning a few fun animal facts. With Cindy ’ s pitch-perfect blend of warmth and real-life experience, *Borrowing Bunnies* is a new classic in narrative nonfiction.

Named a Best Book of the Year by the Seattle Times and Kirkus Review The final novel from a great American storyteller. Donal Cameron is being raised by his grandmother, the cook at the legendary Double W ranch in Ivan Doig’s beloved Two Medicine Country of the Montana Rockies, a landscape that gives full rein to an eleven-year-old’s imagination. But when Gram has to have surgery for “female trouble” in the summer of 1951, all she can think to do is to ship Donal off to her sister in faraway Manitowoc, Wisconsin. There Donal is in for a rude surprise: Aunt Kate—bossy, opinionated, argumentative, and tyrannical—is nothing like her sister. She henpecks her good-natured husband, Herman the German, and Donal can’t seem to get on her good side either. After one contretemps too many, Kate packs him back to the authorities in Montana on the next Greyhound. But as it turns out, Donal isn’t traveling solo: Herman the German has decided to fly the coop with him. In the immortal American tradition, the pair light out for the territory together, meeting a classic Doigian ensemble of characters and having rollicking misadventures along the way. Charming, wise, and slyly funny, *Last Bus to Wisdom* is a last sweet gift from a writer whose books have bestowed untold pleasure on countless readers.

Mark Wilson presents a highly original and broad-ranging investigation of the way we get to grips with the world conceptually, and the way that philosophical problems commonly arise from this. Words such as color, shape, solidity exemplify the commonplace conceptual tools we employ to describe and order the world around us. But the world's goods are complex in their behaviors and we often overlook the subtle adjustments that our evaluative terms undergo as their usage becomes gradually adapted to different forms of supportive circumstance. Wilson not only explains how these surprising strategies of hidden management operate, but also tells the astonishing story of how faulty schemes and great metaphysical systems sometimes spring from a simple failure to recognize the innocent wanderings to which our descriptive words are heir. Wilson combines traditional philosophical concerns about human conceptual thinking with illuminating data derived from a large variety of fields including physics and applied mathematics, cognitive psychology, and linguistics. *Wandering Significance* offers abundant new insights and perspectives for philosophers of language, mind, and science, and will also reward the interest of psychologists, linguists, and anyone curious about the mysterious ways in which

useful language obtains its practical applicability.

Appropriate for one-semester courses in Business Law at both college and university levels in Alberta.

This Alberta-specific text proceeds beyond general principles of law and describes the case law and particular statutory provisions that regulate business in Alberta. Legal concepts and Canadian business applications are introduced in a concise, one-semester format. The text is structured so that five chapters on contracts form the nucleus of the course, and the balance provides stand-alone sections that the instructor may choose to cover in any order. The design is more reader-friendly, with a visually appealing four-colour format as well as case synopses and extracts to enliven the solid text. The result is a book that maintains the strong legal content of previous editions while introducing more real-life examples of business law in practice.

There is a distinct hint of Armageddon in the air. According to *The Nice and Accurate Prophecies of Agnes Nutter, Witch* (recorded, thankfully, in 1655, before she blew up her entire village and all its inhabitants, who had gathered to watch her burn), the world will end on a Saturday. Next Saturday, in fact. So the armies of Good and Evil are amassing, the Four Bikers of the Apocalypse are revving up their mighty hogs and hitting the road, and the world's last two remaining witch-finders are getting ready to fight the good fight, armed with awkwardly antiquated instructions and stick pins. Atlantis is rising, frogs are falling, tempers are flaring. . . . Right.

Everything appears to be going according to Divine Plan. Except that a somewhat fussy angel and a fast-living demon -- each of whom has lived among Earth's mortals for many millennia and has grown rather fond of the lifestyle -- are not particularly looking forward to the coming Rapture. If Crowley and Aziraphale are going to stop it from happening, they've got to find and kill the Antichrist (which is a shame, as he's a really nice kid).

There's just one glitch: someone seems to have misplaced him. . . . First published in 1990, Neil Gaiman and Terry Pratchett's brilliantly dark and screamingly funny take on humankind's final judgment is back -- and just in time -- in a new hardcover edition (which includes an introduction by the authors, comments by each about the other, and answers to some still-burning questions about their wildly popular collaborative effort) that the devout and the damned alike will surely cherish until the end of all things.

Paris. The name alone conjures images of chestnut-lined boulevards, sidewalk caf é s, breathtaking fa ç ades around every corner--in short, an exquisite romanticism that has captured the American imagination for as long as there have been Americans. In 1995, Adam Gopnik, his wife, and their infant son left the familiar comforts and hassles of New York City for the urbane glamour of the City of Light. Gopnik is a longtime New Yorker writer, and the magazine has sent its writers to Paris for decades--but his was above all a personal pilgrimage to the place that had for so long been the undisputed capital of everything cultural and beautiful. It was also the opportunity to raise a child who would know what it was to romp in the Luxembourg Gardens, to enjoy a croque monsieur in a Left Bank caf é --a child (and perhaps a father, too) who would have a grasp of that Parisian sense of style we Americans find so elusive. So, in the grand tradition of the American abroad, Gopnik walked the paths of the Tuileries, enjoyed philosophical discussions at his local bistro, wrote as violet twilight fell on the arrondissements. Of course, as readers of Gopnik's beloved and award-winning "Paris Journals" in *The New Yorker* know, there was also the matter of raising a child and carrying on with day-to-day, not-so-fabled life. Evenings with French intellectuals preceded middle-of-the-night baby feedings; afternoons were filled with trips to the Mus é e d'Orsay and pinball games; weekday leftovers were eaten while three-star chefs debated a "culinary crisis." As Gopnik describes in this funny and tender book, the dual processes of navigating a foreign city and becoming a parent are not completely dissimilar journeys--both hold new routines, new languages, a new set of rules by which everyday life is lived. With singular wit and insight, Gopnik weaves the magical with the mundane in a wholly delightful, often hilarious look at what it was to be an American family man in Paris at the end of the twentieth century. "We went to Paris for a sentimental reeducation-I did anyway-even though the sentiments we were instructed in were not the ones we were expecting to learn, which I believe is why they call it an education."

A People ’ s Curriculum for the Earth is a collection of articles, role plays, simulations, stories, poems, and graphics to help breathe life into teaching about the environmental crisis. The book features some of the best articles from *Rethinking Schools* magazine alongside classroom-friendly readings on climate change, energy, water, food, and pollution—as well as on people who are working to make things better. A People ’ s Curriculum for the Earth has the breadth and depth of *Rethinking Globalization: Teaching for Justice in an Unjust World*, one of the most popular books we ’ ve published. At a time when it ’ s becoming increasingly obvious that life on Earth is at risk, here is a resource that helps students see what ’ s wrong and imagine solutions. Praise for A People's Curriculum for the Earth "To really confront the climate crisis, we need to think differently, build differently, and teach differently. A People ’ s Curriculum for the Earth is an educator ’ s toolkit for our times." — Naomi Klein, author of *The Shock Doctrine* and *This Changes Everything: Capitalism vs. the Climate* "This volume is a marvelous example of justice in ALL facets of our lives—civil, social, educational, economic, and yes, environmental. Bravo to the Rethinking Schools team for pulling this collection together and making us think more holistically about what we mean when we talk about justice." — Gloria Ladson-Billings, Kellner Family Chair in Urban Education, University of Wisconsin-Madison "Bigelow and Swinehart have created a critical resource for today ’ s young people about humanity ’ s responsibility for the Earth. This book can engender the shift in perspective so needed at this point on the clock of the universe." — Gregory Smith, Professor of Education, Lewis & Clark College, co-author with David Sobel of *Place- and Community-based Education in Schools*

A Framework for K-12 Science Education and Next Generation Science Standards (NGSS) describe a new vision for science learning and teaching that is catalyzing improvements in science classrooms across the United States. Achieving this new vision will require time, resources, and ongoing commitment from state, district, and school leaders, as well as classroom teachers. Successful implementation of the NGSS will ensure that all K-12 students have high-quality opportunities to learn science. Guide to Implementing the Next Generation Science Standards provides guidance to district and school leaders and teachers charged with developing a plan and implementing the NGSS as they change their curriculum, instruction, professional learning, policies, and assessment to align with the new standards. For each of these elements, this report lays out recommendations for action around key issues and cautions about potential pitfalls. Coordinating changes in these aspects of the education system is challenging. As a foundation for that process, Guide to Implementing the Next Generation Science Standards identifies some overarching principles that should guide the planning and implementation process. The new standards present a vision of science and engineering learning designed to bring these subjects alive for all students, emphasizing the satisfaction of pursuing compelling questions and the joy of discovery and invention. Achieving this vision in all science classrooms will be a major undertaking and will require changes to many aspects of science education. Guide to Implementing the Next Generation Science Standards will be a valuable resource for states, districts, and schools charged with planning and implementing changes, to help them achieve the goal of teaching science for the 21st century.
