"The Federation of Animal Science Societies (FASS) has released the third edition of the Guide for the Care and Use of Agricultural Animals in Research and Teaching (FASS Ag Guide). The first edition was published in 1988, and the first revised edition was published in 1999. The FASS Ag Guide serves as a primary reference document for meeting the needs and requirements of agricultural animals utilized in research and teaching. This third edition differs from the past editions in several meaningful ways. The full name of the FASS Ag Guide has changed. Previous editions were titled the Guide for the Care and Use of Agricultural Animals in Agricultural Research and Teaching. The new edition drops the second use of the word agricultural in the title. Chapters have been added to address species handling and transportation and environmental enrichment strategies. The authors of the third edition included experts in each species and in animal care and use, including animal scientists, veterinarians, teachers, and engineers; all were chosen for their prominence in the many fields of the animal sciences so that the best available science could be applied to this revision" -- FASS website.

Expert Oracle RAC Performance Diagnostics and Tuning provides comprehensive coverage of the features, technology and principles for testing and tuning RAC databases. The book takes a deep look at optimizing RAC databases by following a methodical approach based on scientific analysis rather than using a speculative approach, twisting and turning knobs and gambling on the system. The book starts with the basic concepts of tuning methodology, capacity planning, and architecture. Author Murali Vallath then dissects the various tiers of the testing implementation, including the operating system, the network, the

application, the storage, the instance, the database, and the grid infrastructure. He also introduces tools for performance optimization and thoroughly covers each aspect of the tuning process, using many real-world examples, analyses, and solutions from the field that provide you with a solid, practical, and replicable approach to tuning a RAC environment. The book concludes with troubleshooting guidance and quick reference of all the scripts used in the book. Expert Oracle RAC Performance Diagnostics and Tuning covers scenarios and details never discussed before in any other performance tuning books. If you have a RAC database, this book is a requirement. Get your copy today. Takes you through optimizing the various tiers of the RAC environment. Provides real life case studies, analysis and solutions from the field. Safe Medical Devices Act of 1990 Human Resource Development Challenging students to think critically about the complex web of social forces that leads to health disparities in the United States. The health care system in the United States has been called the best in the world. Yet wide disparities persist between social groups, and many Americans suffer from poorer health than people in other developed countries. In this revised edition of Health Disparities in the United States, Donald A. Barr provides extensive new data about the ways low socioeconomic status, race, and ethnicity interact to create and perpetuate these health disparities. Examining the significance of this gulf for the medical community and society at large, Barr offers potential policy- and physician-based solutions for reducing health inequity in the long term. This thoroughly updated edition focuses on a new challenge the United States last experienced more than half a century ago: successive years of declining life expectancy. Barr addresses the causes of this decline, including what are commonly

referred to as "deaths of despair"—from opiate overdose or suicide. Exploring the growing role geography plays in health disparities, Barr asks why people living in rural areas suffer the greatest increases in these deaths. He also analyzes recent changes under the Affordable Care Act and considers the literature on how race and ethnicity affect the way health care providers evaluate and treat patients. As both a physician and a sociologist, Barr is uniquely positioned to offer rigorous medical explanations alongside sociological analysis. An essential text for courses in public health, health policy, and sociology, this compelling book is a vital teaching tool and a comprehensive reference for social science and medical professionals.

PRODUCT DESCRIPTION This study guide provides one tool for the preparation and study for the CIP examination. It is a companion book to the CIP Exam Workbook. The sequence of chapters in the study guide follows the same sequence as in the CIP exam workbook and the flow of ideas in each chapter is concordant with the sequence of questions in the workbook. It is recommended that the two books be studied together for the most effective exam preparation. The study guide is organized in distinct chapters each of which covers one aspect of the regulations or guidances. The study material is designed to instruct on core information relevant to the examination. However it is hoped that the study guide can also function as an IRB Handbook. The study guide is therefore designed not only to prepare for the CIP examination but also to educate IRB professionals and Clinical Research Coordinators on matters which arise frequently in IRB administration. The Institutional Review Board (IRB) is responsible for the review of a wide variety of clinical research. As the complexity of clinical research has grown over the years, the duties and responsibilities of the IRB have grown increasingly complex. This complex environment demands that the IRB be staffed and managed by professionals. As a part of affirming the professionalism of IRB staff, administrators and directors the Public Responsibility in Research and Medicine (PRIM&R) provides an important forum for education and affirmation of ethical standards for the performance and management of clinical research. An important component of this program is the certification exam known as the CIP (Certified IRB Professional). This examination which is offered twice a year covers a wide range of regulatory topics. The book addresses the key issues in federal regulations outlined in statutes including Title 45 part 4 (Protection of Human Subjects) , Title 21 part 50 (Protection of Human Subjects), Title 21 part 56 (Institutional review Boards) Title 21 part 54 (Financial Disclosures by Clinical Investigators) . Also addressed are key FDA statutes involved in the regulation of clinical trials Title 21 part 312 (Investigational New Drug Application), Title 21 part 812 (Investigational Device Exemptions) and Title 21 part 11(Electronic Records and Electronic Signatures). The CIP exam covers material based not only on these regulations but also on guidances issued by OHRP and the FDA. Special attention has been devoted to material covered in these guidances. Also addressed are interactions of the IRB with other committees in the institutional environment.
