Special edition slipcase edition of John Green's *Paper Towns*, with pop-up paper town. From the bestselling author of *The Fault in our Stars*. Quentin Jacobsen has always loved Margo Roth Spiegelman, for Margo (and her adventures) are the stuff of legend at their high school. So when she one day climbs through his window and summons him on an all-night road trip of revenge he cannot help but follow. But the next day Margo doesn't come to school and a week later she is still missing. Q soon learns that there are clues in her disappearance . . . and they are for him. But as he gets deeper into the mystery - culminating in another awesome road trip across America - he becomes less sure of who and what he is looking for. Masterfully written by John Green, this is a thoughtful, insightful and hilarious coming-of-age story.

The Story of Captain Cousteau Springer
Moving to a new place isn't easy... Until a neglected ship and its owner make her feel at home After spying a boat in need of some TLC, single mom Andi Sterling strikes a deal with its owner, Zeke Donovan, who shares her passion for restoring old things. Remote Sensing of Sea Ice in the Northern Sea Route: Studies and Applications initially provides a history of the Northern Sea Route as an important strategic transport route for supporting the northern regions of Russia and cargo transportation between Europe and the Northern Pacific Basin. The authors then describe sea ice conditions in the Eurasian Arctic Seas and, using microwave satellite data, provide a detailed analysis of difficult sea ice conditions. Remote sensing techniques and the basic principles of SAR image formation are described, as well as the major satellite radar systems used for ice studies in the Arctic. The authors take a good look at the use of sensing equipment in experiments, including the ICE WATCH project used for monitoring the Northern Sea Route. The possibilities of using SAR remote sensing for ice navigation in the Northern Sea Route is also detailed, analysing techniques of automatic image processing and interpretation. A study is provided of regional drifting ice, fast ice and river ice in the coastal areas of the Arctic Seas. The book concludes with a review of the practical experience using SAR images for supporting navigation and offshore industrial activity, based on a series of experiments conducted with the Murmansk Shipping Company on board nuclear icebreakers.

New Abacus Springer

NEW YORK TIMES BESTSELLER From the bestselling author of *Fatherland* and *Munich* comes a WWII thriller about a German rocket engineer, a former actress turned British spy, and the Nazi rocket program. The first rocket will take five minutes to hit London. You have six minutes to stop the second. Rudi Graf is an engineer who always dreamed of sending rockets to the moon. But instead, he finds himself working alongside Wernher von Braun, launching V2 rockets at London for the Nazis from a bleak seaside town in occupied Holland. As the SS increases its scrutiny on

the project, Graf, an engineer more than a soldier, has to muster all of his willpower to toe the party line. And when rumors of a defector circulate through the German ranks, Graf becomes a prime suspect. Meanwhile, Kay Caton-Walsh, a young English intelligence officer, is living through the turmoil of war. After she and her lover, an RAF officer, are caught in a V2 attack, she volunteers to ship out for newly liberated Belgium. Armed with little more than a slide rule and a few equations, Kay and her colleagues hope to locate and destroy the launch sites. But at this stage in the war it's hard to know who, if anyone, she can trust. As the death toll soars, these twin stories play out against the background of the German missile campaign during the Second World War. And what the reader comes to understand is that Kay's and Graf's destinies are on a collision course.

Account of the life and adventures of Captain Cousteau.

Human-Computer Interaction --

INTERACT 2013 Imray, Laurie, Norie and Wilson Ltd

Over the last decade, we have witnessed a growing dependency on information technology resulting in a wide range of new opportunities. Clearly, it has become almost impossible to imagine life without a personal computer or laptop, or without a cell phone. Social network sites (SNS) are competing with face-to-face encounters and may even oust them. Most SNS-adepts have hundreds of "friends", happily sharing pictures and profiles and endless chitchat. We are on the threshold of the Internet of Things, where every object will have its RFID-tag. This will not only affect companies, who will be able to optimize their production and delivery processes, but also end users, who will be able to enjoy many new applications, ranging from

smart shopping, and smart fridges to geo-localized services. In the near future, elderly people will be able to stay longer at home due to clever health monitoring systems. The sky seems to be the limit! However, we have also seen the other side of the coin: viruses, Trojan horses, breaches of privacy, identity theft, and other security threats. Our real and virtual worlds are becoming increasingly vulnerable to attack. In order to encourage security research by both academia and industry and to stimulate the dissemination of results, conferences need to be organized. With the 11th edition of the joint IFIP TC-6 TC-11 Conference on C- munications and Multimedia Security (CMS 2010), the organizers resumed the tradition of previous CMS conferences after a three-year recess.

Judith Moffett returns to the future with this moving tale of the Hefn occupation of Earth and how it affects the planet's native humans - two in particular: Pam Pruitt, a talented young woman from Kentucky, and Liam O'Hara, whose unique friendship with the Hefn Humphrey saved his life. The two teens journey to a special place in remote Kentucky, Hurt Hollow, where the painter Orrin Hubbell and his wife, Hannah, found a way to live in peace with the planet during the twentieth century. The prospects of living peacefully seem distant for Pam and Liam, both of whom must find peace with themselves as well as with the Hefn Directive. The marvelous events that befall them en route to Kentucky and in the Hollow itself beautifully depict the subtle ways in which the world shapes them, and the stunning ways in which they change the world.
