Decoro Design steel panel radiators are designed to be installed in closed hydronic heating systems, with a maximum operating temperature of 250° F. If the heating system contains antifreeze, the proper Ph must be maintained. High acidity will damage the radiator and void the manufacturer's warranty.

TRV - Thermostatic  
Valves (also known as  
TRVs), are similar in  
design to manual  
valves with the key  
difference being that  
they feature a  
temperature sensor.  
Although the sensor  
might sound quite high-  
tech (unless you  
already have or

looking to purchase an  
electronic version),  
TRVs typically feature  
a bit of wax or liquid  
that reacts to the  
surrounding air  
temperature and  
regulates the radiator
