Globe and Mail Her name was Henrietta
Lacks, but scientists know her as HeLa.
She was a poor Southern tobacco
farmer who worked the same land as
her slave ancestors, yet her cells—taken
without her knowledge—became one of
the most important tools in medicine:
The first “immortal” human cells grown
in culture, which are still alive today,
though she has been dead for more
than sixty years. HeLa cells were vital

for developing the polio vaccine; uncovered secrets of cancer, viruses, and the atom bomb's effects; helped lead to important advances like in vitro fertilization, cloning, and gene mapping; and have been bought and sold by the billions. Yet Henrietta Lacks remains virtually unknown, buried in an unmarked grave. Henrietta's family did not learn of her "immortality" until more than twenty years after her death, when scientists investigating HeLa began using her husband and children in research without informed consent. And though the cells had launched a multimillion-dollar industry that sells human biological materials, her family never saw any of the profits. As

Rebecca Skloot so brilliantly shows, the story of the Lacks family—past and present—is inextricably connected to the dark history of experimentation on African Americans, the birth of bioethics, and the legal battles over whether we control the stuff we are made of. Over the decade it took to uncover this story, Rebecca became enmeshed in the lives of the Lacks family—especially Henrietta's daughter Deborah. Deborah was consumed with questions: Had scientists cloned her mother? Had they killed her to harvest her cells? And if her mother was so important to medicine, why couldn't her children afford health insurance? Intimate in feeling, astonishing in scope, and impossible to

put down, *The Immortal Life of Henrietta Lacks* captures the beauty and drama of scientific discovery, as well as its human consequences.

This is a print on demand edition of a hard to
find publication. Explores whether sufficient
data exists to examine the temporal and spatial

relationships that existed in terrorist group
planning, and if so, could patterns of
preparatory conduct be identified? About one-
half of the terrorists resided, planned, and
prepared for terrorism relatively close to their
eventual target. The terrorist groups existed for
1,205 days from the first planning meeting to
the date of the actual/planned terrorist incident.
The planning process for specific acts began 2-3
months prior to the terrorist incident. This
study examined selected terrorist
groups/incidents in the U.S. from 1980-2002. It
provides for the potential to identify patterns of
conduct that might lead to intervention prior to
the commission of the actual terrorist incidents.

In this expanded and updated classic, Desmond Morton explores the history of the Canadian labour movement and brings the story to the present day with a discussion of globalization and its impact on workers. Working People examines the clash between the idealists, who fought for such "impossible" dreams as the eight-hour day, paid holidays, industrial democracy, and equality for woman, and the realists, who wrestled with the human realities of self-interest, prejudice, and fear. It focuses on workers - from 19th-century dock workers to

teenage "crews" at McDonald's today - and documents their struggle for dignity and security in a constantly changing world.
