Incidents in the Life of a Slave Girl (EasyRead Super Large 20pt Edition)
Crown
This is a print on demand edition of a hard to find publication. Explores
whether sufficient data exists to examine the temporal and spatial
relationships that existed in terrorist group planning, and if so, could
patterns of preparatory conduct be identified? About one-half of the
terrorists resided, planned, and prepared for terrorism relatively close to
their eventual target. The terrorist groups existed for 1,205 days from the

first planning meeting to the date of the actual/planned terrorist incident.
The planning process for specific acts began 2-3 months prior to the
terrorist incident. This study examined selected terrorist
groups/incidents in the U.S. from 1980-2002. It provides for the
potential to identify patterns of conduct that might lead to intervention
prior to the commission of the actual terrorist incidents. Illustrations.

Henrietta Lacks, but scientists know her as HeLa. She was a
poor Southern tobacco farmer who worked the same land as her
slave ancestors, yet her cells—taken without her
knowledge—became one of the most important tools in
medicine: The first “ immortal ” human cells grown in culture,
which are still alive today, though she has been dead for more
than sixty years. HeLa cells were vital for developing the polio
vaccine; uncovered secrets of cancer, viruses, and the atom
bomb ’ s effects; helped lead to important advances like in vitro
fertilization, cloning, and gene mapping; and have been bought
and sold by the billions. Yet Henrietta Lacks remains virtually

unknown, buried in an unmarked grave. Henrietta ’ s family did not learn of her “ immortality ” until more than twenty years after her death, when scientists investigating HeLa began using her husband and children in research without informed consent. And though the cells had launched a multimillion-dollar industry that sells human biological materials, her family never saw any of the profits. As Rebecca Skloot so brilliantly shows, the story of the Lacks family—past and present—is inextricably connected to the dark history of experimentation on African Americans, the birth of bioethics, and the legal battles over whether we control the stuff we are made of. Over the decade it took to uncover this story, Rebecca became enmeshed in the lives of the Lacks family—especially Henrietta ’ s daughter Deborah. Deborah was consumed with questions: Had scientists cloned her mother? Had they killed her to harvest her cells? And if her mother was so important to medicine, why couldn ’ t her children afford health insurance? Intimate in feeling, astonishing in scope, and impossible to put down, The Immortal Life of Henrietta Lacks captures the beauty and drama of scientific discovery, as well as its human consequences.

Agricultural Libraries Information Notes Shortlisted for the Financial Times and McKinsey Best Book of the Year Award in 2011 “ A masterpiece. ” —Steven D. Levitt, coauthor of Freakonomics “ Bursting with insights. ” —The New York Times Book Review A pioneering urban economist presents a myth-shattering look at the majesty and greatness of cities America is an urban nation, yet cities get a bad rap: they're dirty, poor, unhealthy, environmentally unfriendly . . . or are they? In this revelatory book, Edward Glaeser, a leading urban economist, declares that cities are actually the healthiest, greenest, and richest (in both cultural and economic terms) places to live. He travels through history and around the globe to reveal the hidden workings of cities and how they bring out the best in humankind. Using intrepid reportage, keen analysis, and cogent argument, Glaeser makes an urgent, eloquent case for the city's importance and splendor, offering inspiring proof that the city is humanity's greatest creation and our best hope for the future.

In this expanded and updated classic, Desmond Morton explores the history of the Canadian labour movement and brings the story to the present day with a discussion of globalization and its impact on workers. Working People examines the clash between the idealists, who fought for such "impossible" dreams as the eight-hour day, paid holidays, industrial democracy, and equality for woman, and the realists, who wrestled with

the human realities of self-interest, prejudice, and fear. It focuses on workers - from 19th-century dock workers to teenage "crews" at McDonald's today - and documents their struggle for dignity and security in a constantly changing world.
